

Annual Report 2023

Key figures

¹⁾ Earnings before taxes, depreciation and amortization

²⁾ Based on reported net profit and average equity for the preceding 12-month period after distribution of the respective dividends

Source: Bellevue Group, as at December 31, 2023

Developments

Market environment

- Market performance 2023 driven by interest rate developments and external events
- Market rally in the US and in the healthcare sector driven by only a few «mega caps»
- Weak relative performance of the healthcare sector compared to the overall market (especially for small and mid-cap companies)

Financial figures

- Substantial reduction in AuM base to 6.9 bn (–26%)
- Decline in operating income to CHF 81.9 mn (–15%)
- Reduction in operating expenses (despite investments) to CHF 58.2 mn (–5%)
- Lower net profit of CHF 15.2 mn (–40%)
- Attractive dividend proposal: CHF 1.15 per share (dividend yield of 4.7%)
- Strong equity-financed and debt-free balance sheet

Outlook 2024

- First signs of recovery on the market side visible since Q4/2023 with the interest rate turnaround – the healthcare sector represents an attractive long-term investment opportunity
- Bellevue products and investment solutions are well positioned to capture market upside
- Priorities for 2024:
 - Products and investment performance
 - Marketing, clients and distribution
 - Governance and platform

Shareholder letter

Gebhard Giselsbrecht, Chief Executive Officer, and Veit de Maddalena, Chairman of the Board

Dear Shareholders,

2023 was another challenging year for Bellevue Group. The below-average market performance of Bellevue's key markets in the healthcare sector once again impacted the development of our Group and tested us on both the investment and client side.

Challenging market environment for Bellevue Group persists in 2023

What made 2023 a remarkable year from an investment perspective is the continued staccato of extraneous events that impacted markets on the one hand, and the concentration of investment performance leadership with a few large cap stocks within major indexes on the other.

We have seen markets being buffeted by continued interest rate hikes (to 5.5% in the US), geopolitical tensions, the collapse of financial institutions, enthusiasm about AI and finally the reversal of interest rate and inflation expectations towards the end of the year. The «higher for longer» interest rate mantra lost weight in the second half of the year and gave way to expectations of lower interest rates towards the end of the year.

At the same time, a few mega cap tech companies largely drove the rally of major broad stock market indices in the developed world. For any active equity investor not allocated (or underallocated) to these select winners, absolute and relative underperformance was the consequence. It did not help that emerging markets and particularly China and Hong Kong continued to exhibit poor investment performance due to the deteriorating domestic economic situation as well as political concerns.

As a consequence, the healthcare sector overall saw one of the worst relative annual investment performances in 2023 with a similarly narrow investment performance leadership within the sector (by a few mega caps). In combination, these developments have been

particularly hard hitting on Bellevue Group given our focus within the healthcare sector on smaller and medium-sized growth companies and more balanced regionally weighted strategies including Asia/China.

We continue to consider the healthcare sector with its fundamental attractions and positive long-term drivers as very attractive.

We are convinced that this focus and specialization in line with our long-term oriented fundamental investment approach allows us to capture the attractive medium to long-term investment opportunities in the healthcare sector as we have shown in the past. We also continue to consider the healthcare sector with its fundamental attractions and positive long-term drivers as attractive, even if it means that we are seeing a significant impact of the above-mentioned market environment on our results today.

Financial results are reflecting the challenges

Our asset base (AuM) has decreased substantially from CHF 9.4 bn to CHF 6.9 bn (–26%). This was driven by negative absolute investment performance as well as reallocations by clients.

In line with this development, our revenues from management fees decreased by 24% to CHF 79.3 mn based on an average AuM base of around CHF 8.2 bn. Total operating income amounted to CHF 81.9 mn and were just 15% lower than the previous year mainly due to an improved net financial investment result but also due to the realization of performance fees from the private market business.

On the cost side, there was some offset from our performance-linked compensation model as a buffer. Despite continued investments into people and infrastructure we have been able to reduce operating costs by close to 5% year on year.

Nevertheless, with CHF 15.2 mn our group net profit is down 40% on a year-on-year basis. The resulting cost-income ratio of 71% is in excess of our medium-term target range of 60–65%.

We are not at all satisfied with the result we delivered for our investors and shareholders. It is and remains our ambition as a specialized asset manager to create added value for all our stakeholders.

Financial solidity as the basis for an attractive dividend policy

Our balance sheet has remained strong and free of debt. This affords us the requisite resilience to weather difficult market conditions like these and provides strategic flexibility, including the seeding of innovative investment strategies. Finally, it allows us to continue an attractive and shareholder-friendly dividend policy for investors – a dividend of CHF 1.15 is being proposed by the Board of Directors for approval at the upcoming Annual General Meeting of Bellevue Group (resulting in a dividend yield of about 4.7% based on the share price as per end of 2023).

Product range well positioned to capture growth opportunities in 2024

The current situation is an opportunity for us to take stock, refine our value proposition to investors and focus on what we do well as well as to lay the foundation for future growth with attractive investment propositions for our clients. We currently focus our internationally

Dividend 2024
(proposed)

CHF 1.15

recognized investment expertise on the three sectors healthcare, selected niches and private markets.

Our flagship products BB Biotech AG, Bellevue Medtech & Services, Bellevue Digital Health as well as the Bellevue Healthcare Trust are attractively positioned in different segments of the market and offer interesting upside potential thanks to an appealing valuation.

With the Bellevue AI Health and the Bellevue Obesity Solutions Fund, we are starting 2024 with two new strategies capturing long-term secular growth trends. The Bellevue Diversified Healthcare strategy, launched two years ago, offers a more benchmark-oriented strategy geared towards larger capitalized companies, which is performing very well in the current environment.

Our Entrepreneur investment solutions in Europe and Switzerland showed a significant revival based on a pleasing performance in 2023. We see valuation, momentum, and investment track record as being strong arguments for investments in these selected niches. For more absolute return-oriented clients our Bellevue Global Macro and Bellevue Option Premium products have exhibited attractive performances in 2023.

On the private markets side, we successfully exited one investment in 2023 despite the difficult market environment. Our well-diversified and mature portfolio of direct investments will create further opportunities for relevant exits and thus provide an attractive performance-based income (carry income). Following the promising development of our first private market vehicle Bellevue Entrepreneur Private KmGK, launched just over two and a half years ago, our ambition is to prepare the launch of a second product later in the year 2024.

Development of investment solutions

Central banks had a big impact on financial markets in 2023. Higher interest rates and signs of slowing economic activity kept investors on guard. The «higher for longer» mantra for interest rates began to resonate less during the second half of the year, ushering in strong gains for both equities and bonds. Several Bellevue strategies have already benefited from these tailwinds and others are well positioned for performance in 2024.

Continued progress made on ESG

Our commitment to environmental, social and governance (ESG) principles continues to guide our investment approach and the way we manage Bellevue Group. We believe that responsible and sustainable practices not only contribute to positive societal impact but also enhance long-term shareholder value. You will find details in our newly enhanced sustainability report.

Sustainability Report

Sustainability is and will remain an important factor in Bellevue Group's business strategy, because it is crucial to the success of our business over the long term and for creating value for all stakeholders. In order to deliver on this claim as best as possible going forward, we strengthened Bellevue's sustainability governance and organization in 2023. All relevant roles and responsibilities were reviewed at management level as well as throughout the workforce and changes were made where necessary.

Strengthening of the Executive Board of Bellevue Group

We started into the year 2024 with Gebhard Giselbrecht as the new Bellevue Group CEO. Gebhard has comprehensive international asset management experience across multiple functions. Our CFO Michael Hutter will leave Bellevue Group with Stefano Montalbano (previously Head Finance & Controlling) taking over as of March 1, 2024. The Board thanks both former CEO André Rüegg and Michael Hutter for their long tenure at Bellevue Group and their contribution to the transformation of Bellevue Group into a pure play asset manager.

To underpin and support the development of Bellevue Group going forward, the Group Executive Board will be extended with additional competencies as of March 1, 2024. Next to Gebhard Giselbrecht as CEO and Stefano Montalbano as CFO, Markus Peter will join as Head of Products & Investments and Patrick Fischli as Head of Distribution. Markus Peter and Patrick Fischli have been in management positions at Bellevue Asset Management since 2009 and have contributed substantially to the positioning of Bellevue Group as specialized asset manager.

Long-term growth prospects intact and a cautiously optimistic view on 2024

We believe in the attractive long-term growth prospects of our industry and particularly the healthcare sector within it. We are cautiously optimistic that 2024 will offer a more supportive market environment. The return to lower interest rates is constructive for the healthcare sector overall and in particular for Bellevue's investment focus on smaller and medium-sized growth stocks. The valuations for the sector and especially for smaller and medium-sized growth companies are now more attractive on both a market-relative and an absolute basis than they have been for a long time. Additionally, investor sentiment has improved significantly since last quarter of 2023 as the renewed focus is on company fundamentals rather than macro. The broadening of market leadership has been evident now for some months and has been already reflected in the performance of our strategies.

Bellevue Group is well positioned to capture the above-mentioned growth opportunities in an improving market environment leveraging our expertise, long-term investment track record and passionate employees.

However, we do not expect this to be a straight path and despite the cautious optimism, we are expecting continued volatility in the market throughout the year as inflation and rate expectations continue to adjust and recognize the potential uncertainties that may arise from

any geopolitical escalations, and the changes that will inevitably come to pass in such a busy election year.

Bellevue Group remains committed to fostering innovation, exploring new investment horizons, and maintaining transparency with our valued customers and shareholders. Rest assured that we are working hard to capture the growth opportunities ahead and we appreciate your trust and support.

The acknowledged expertise and tireless commitment of all our employees is an essential ingredient for the success of Bellevue Group. We thank our team for their vigour and commitment in these challenging times.

Veit de Maddalena

Summary of fiscal 2023

Investor presentation

AuM reduced by around 26% compared to the previous year...

Change in AuM 2018 – 2023

Source: Bellevue Group, as at December 31, 2023

Development of assets under management

- Assets under management down 26% or around CHF 2.5 bn compared to the previous year

- Healthcare strategies represent around 88% of assets under management

...with investment performance and customer reallocations as the main drivers

Development of AuM base in 2023

Source: Bellevue Group, as at December 31, 2023

Development of assets under management

- Reduction due in equal measure to negative investment performance and client reallocations
- Gross new money won of around CHF 600 mn shows that our investment expertise continues to be sought after and appreciated

Asset Management service income declines with assets under management

Operating income from asset management activities, 2018 – 2023

Source: Bellevue Group, as at December 31, 2023

Development of income from asset management services

- Decline in revenues from asset management services of around 22% in line with the development of the average AuM base
- Average AuM base of around CHF 8.2 bn for 2023
- High proportion of recurring income (management fees)
- Only a small contribution from transaction-based fees and performance fees

Operating expenses

Cost-income ratio (CIR)
(based on operating profit)

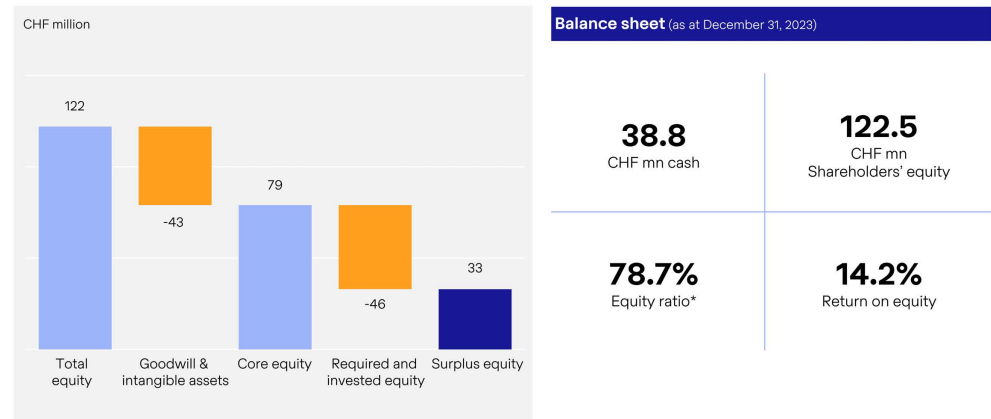

Source: Bellevue Group, as at December 31, 2023

- Increase in cost/income ratio (CIR) to 71% due to lower earnings base
- Entrepreneurial compensation model helps to smooth out the CIR during difficult periods

Continued solid capitalised and equity-financed balance sheet

As at December 31, 2023 (consolidated)

Source: Bellevue Group, as at December 31, 2023

* Balance sheet without leverage, debt relates to operating liabilities, accruals and deferrals

- Strong balance sheet creates resilience for difficult market phases, enables the launch of innovative products and allows for an attractive dividend policy
- Reduction in goodwill & intangible assets (prior year: CHF 45 mn), due to ordinary amortisation of intangible assets

¹⁾ Based on the ordinary dividend and closing share price at year-end
Source: Bellevue Group, as at December 31, 2023

Proposed dividend of CHF 1.15 per share

- Attractive dividend of CHF 1.15 per share despite difficult market environment
- The payout amount is based on the Group net profit and the available surplus equity

Shareholder-friendly dividend policy confirmed

- Proposed dividend of CHF 1.15 corresponds to a payout ratio of 100% or a dividend yield of 4.7%

Shareholder base

Structure of the shareholder base as of December 31, 2023

Source: Bellevue Group, as at December 31, 2023

Attractive value creation leads to stable shareholder base

- Strong commitment of core shareholders
- Reduction in the proportion of management and employees to 11.3% (31.12.2022: 13.9%) due to personnel changes in the Group Executive Board
- Hansjörg Wyss, a long-term oriented shareholder (9.7%) won in 2020
- Very transparent shareholder base: 89% registered (2,883 shareholders)
- Shareholder-friendly dividend policy unchanged, strengthening sense of continuity

Development of investment solutions

Central banks had a big impact on financial markets in 2023. Higher interest rates and signs of slowing economic activity kept investors on guard. The «higher for longer» mantra for interest rates began to resonate less during the second half of the year, ushering in strong gains for both equities and bonds. Several Bellevue strategies have already benefited from these tailwinds and others are well positioned for performance in 2024.

2023 was quite an eventful year for global financial markets, and rather challenging for investors, too. The collapse of Silicon Valley Bank sent tremors through the market already in March. That was followed by the demise of the once-prestigious Swiss big bank Credit Suisse. Meanwhile growing investor enthusiasm for artificial intelligence (AI) and its potentially growth-boosting impact led to big gains for a few big tech companies. Statements from the US Federal Reserve that it would keep its rates high for longer to fight inflation triggered a sharp correction in the bond market from the summer on; yields on 10-year US Treasuries rose above the 5% mark for the first time since the global financial crisis in 2007. As the year ended several asset classes staged a strong rally, fueled primarily by falling inflation and the general expectation that central banks would engineer a soft landing. There was a growing conviction that interest rates had probably reached their peak, i.e. that the monetary policy reins were tight enough to bring inflation under control. This was also signaled by US Fed Fund futures, which reflect market expectations about the future course of the Fed's monetary policy.

US Fed Funds Rate (in %)

Fed Funds rate rose from 4.5% to 5.5% in 2023

US Fed Funds Rate – projected (in %)

Significant shift in fed funds futures curve over time

Source: Bloomberg, Bellevue Group, as of December 31, 2023

Broad-based equity indexes such as S&P 500 (+14.9%), the Stoxx Europe 600 (+8.9%) and the SPI (+6.1%) closed the year with good gains. The strong performance of the US market in 2023 pales when measured instead by the S&P 500 Equal Weight Index (+3.6%), which is an equal-weighted version of the cap-weighted S&P 500. At one point the «Magnificent Seven» accounted for more than 90% of the S&P 500's total return last year. Looking at sector returns at the global level, tech (+38.6%), communication services (+31.1%) and consumer cyclicals

(+21.6%) were the top performers, while healthcare (–6.8%), consumer staples (–8.9%), energy (–9.6%) and utilities (–11.3%) brought up the rear. All performance data is in CHF.

Healthcare – not the primary focus of investors in 2023, with only a few exceptions

The overall performance of healthcare stocks in 2023 was disappointing. To some extent, this is attributable to the fact that sales growth at many sector companies fell back to more normal levels after surging during the pandemic. These swings were quite pronounced at high-profile companies such as Roche, Thermo Fisher and Moderna. The steep rise in interest rates posed another big challenge, particularly for the biotech sector and digital health players. Companies that had not yet passed the breakeven point were confronted with a higher equity risk premium. Meanwhile the results of GLP-1 studies propelled the shares of the two global heavyweights Eli Lilly and Novo Nordisk to higher ground.

Specialized healthcare strategies

Absolute performance 2023, in USD

* Launched as of November 30, 2023

** Realigned as of November 30, 2023

Source: Bellevue Group, as at December 31, 2023

BB Biotech's NAV advanced 1.8% in USD during the year under review (NBI +4.6%). Its share price ended the year down 10.1% and the share premium receded to 0.9% at year-end 2023 from 12.6% a year earlier. Looking at the returns of the largest positions in the portfolio, Vertex, Intra-Cellular and Ionis made the strongest performance contributions, while Moderna, Sage Therapeutics and Incyte were the weakest. Shares of the Bellevue Healthcare Trust Fund closed the year 12.8% higher and ranked among the top-performing healthcare strategies in its peer group, reversing a period of extended volatility thanks to its strong performance in Q4.

With a gain of 5.2% for the year, Bellevue Medtech & Services outperformed the broad healthcare sector (MSCI World Healthcare +3.8%). The fund's performance took a hit after Novo Nordisk published trial results for its weight-loss drug Wegovy (GLP-1 drug). The data showed that patients who had preexisting cardiovascular disease experienced a 20%

reduction in major adverse cardiovascular events such as heart attacks and strokes after treatment with Wegovy. This news triggered a sell-off in the stocks of cardiology and orthopedics companies, and growth stocks in the diabetes space also suffered big losses. After detailed trial data was published in November indicating that GLP-1 drugs might have an only marginal impact on the business of medical technology companies in the mid to long term, these same stocks staged a rebound as the year came to end.

The Digital Health Fund's strong performance in December (+14.2%) is a good sign that digital health companies have turned the corner after a prolonged period of weakness. Digital health stocks thus ended the year well off their lows. Leading digital health companies continued to report very solid growth rates in 2023 and made considerable progress towards their strategic goals, but this positive news was overshadowed by a prolonged and steep contraction in valuations, which resulted in the fund's unsatisfactory performance of -4.1% for the year.

In August Chinese officials intensified their crackdown on corruption in the country's healthcare system. Hundreds of hospital directors and pharma managers are now under investigation. The generally good earnings announcements have shown, however, that the anti-corruption campaign has not slowed the growth of Chinese healthcare companies offering top-quality products and services. Nevertheless, the anti-corruption headlines weighed on the performance of equity strategies with emerging market exposure, including Bellevue Sustainable Healthcare (-1.4%), Bellevue Healthcare Strategy (-2.3%), Bellevue Asia Pacific Healthcare (-7.2%) and Bellevue Emerging Markets Healthcare (-7.6%).

At the J.P. Morgan Conference held in San Francisco early in 2024, several companies issued positive statements about the current fiscal year, which can often be traced to the approval and launch of relevant new products. Acquisition activity has picked up considerably, and the tepid growth outlook for the world economy could actually benefit non-cyclical sectors such as healthcare.

As a «House of Healthcare Investment Ideas», we pride ourselves on offering our clients access to mega trends as early as possible through the most efficient and effective means possible. At the end of November 2023, Bellevue launched two new funds, Bellevue AI Health and Bellevue Obesity Solutions, to specifically address the investment themes of AI healthcare and the obesity pandemic with actively managed equity funds.

Regional strategies and multi-asset solutions – a broad-based comeback

After giving up ground in 2022, both the equity and the bond market recovered in 2023. That led to positive returns for multi-asset funds as well, in contrast to 2022, when they were unable to benefit from the typical diversification effects these two asset classes offer. Compared to the US stock market, which is dominated by the «Magnificent Seven», the positive performance of Swiss and European equities in 2023 was clearly more broadly based. The equity strategies Bellevue Entrepreneur Europe Small (+17.0%) and Bellevue Sustainable Entrepreneur Europe (+10.5%) performed well, delivering double-digit returns (in EUR). Small-cap stocks in particular were back in favor. The Swiss-focused equity strategies Bellevue Entrepreneur Switzerland (+8.6%) and Bellevue Entrepreneur Swiss Small & Mid (+5.9%) also generated positive returns but were unable to match the returns of their European sister funds in CHF.

European small- and mid-cap stocks are still inexpensive and they stand to benefit from a more benign interest rate environment. Besides the future course of interest rates, there are other factors that could trigger a good performance and a valuation re-rating in the small and mid-cap space, namely 1) the slow economic recovery in China, 2) the gradual end to the global destocking trend, and 3) Europe is likely to display better economic momentum than

the US economy, where growth is leveling off, which should benefit export-oriented Swiss small and mid caps as well.

Traditional and alternative investment strategies *

Absolute performance 2023, in base currency

* Only related to liquid investment strategies (excl. Private Equity)

** Transferred to Bellevue Emerging Market Healthcare in Q1 2024

Source: Bellevue Group, as at December 31, 2023

Bellevue African Opportunities (–6.1% in USD) continued to face a challenging environment, particularly after war broke out between Hamas and Israel. Foreign investors in Egypt have been unable to repatriate their foreign assets via official foreign exchange channels for several months, so we decided to exit the Egyptian stock market.

The Bellevue Global Macro Fund ended the year with a gain of 8.5% (in EUR) thanks to the excellent performance of bond and equity markets in November and December. Every asset class in its portfolio made a positive contribution to its performance. The StarCapital Multi Income Fund closed the year with a positive return of 5.2%. The fixed income strategies Bellevue Global Income (+5.3%) and StarCapital Dynamic Bonds (+7.8%) ended the year in the green as well and outperformed the Bloomberg Global Aggregate EUR Hedged Index (+4.7%).

The Bellevue Option Premium Fund, a volatility-driven strategy, proved to be a valuable complement to a core investment portfolio. With a full-year return of 11.4% (in EUR), this product delivered a convincing performance, also in comparison with its peer group, and profiled itself as a successful diversification strategy.

Private Markets – focus on SME growth investments

Bellevue Private Markets has maintained its focus on its core business of providing growth financing to SMEs in the DACH region. Despite the volatile macroeconomic situation and geopolitical tension, attractive new investments were made during the course of 2023, and lucrative partial exits were successfully completed as well..

With adbodmer AG's exclusive group of investors and Bellevue Entrepreneur Private LPCI («LPCI») – our specialist investment company – Bellevue can muster significant financial resources and it has a broad and deep pool of entrepreneurial experience and collective know-how as well as an extensive and valuable business network at its disposal. This knowledge and capability are also appreciated and valued by both existing and potential investment targets.

Bellevue adbodmer continues to focus its deal sourcing on key themes and trends such as e-mobility, in order to capture growth opportunities with the least sensitivity to business cycles.

As an example, the adbodmer investor group and LPCI increased their stake in an Austrian SME by participating in a capital increase during the second half of 2023. Since the initial investment made in 2022, the company – which produces high-performance wires and cables for engines and power units in EV, among other products – has seen a significant improvement in its order intake. Within less than a year, additional capex was needed to expand the production capacity of the company, which is the leading high-tech supplier in this field, so it can profit even more from the market's explosive growth.

LPCI's existing portfolio companies displayed pleasing operational developments considering the challenging environment. At some companies, the pendulum swung back to more normal levels in the wake of the pandemic. Whereas inventory buildup was still widespread in 2022 (due to worries about further global supply chain disruptions) and helped to fuel sales growth, destocking activity among business customers was observed by a few portfolio companies in 2023. Declining consumer confidence was also increasingly noticed as the year progressed. However, thanks to strict cost management and flexible cost structures, most of the portfolio companies were able to cushion the impact of the above-mentioned trends. Several companies continued to grow despite the difficult environment and even managed to generate significantly higher earnings.

Bellevue adbodmer's strategic focus on companies with very solid financials and low levels of debt served the company well given the volatile environment. It also enabled some very

successful partial exits in 2023, despite the general contraction in direct private equity valuations. Adverse market headwinds have sharpened the market's focus on reliable and profitable revenue streams, which is further confirmation of our strategic focus on solidly funded champions operating in niche markets.

Distribution developments

Bellevue has a well-established client network in its three core markets Switzerland, Germany and the United Kingdom, augmented by strategic secondary markets in Austria, the Benelux and Spain. Demand in all targeted markets, especially for specialized healthcare investment vehicles, was muted in 2023 due to challenging market conditions as bond yields climbed higher and small and mid caps sold off.

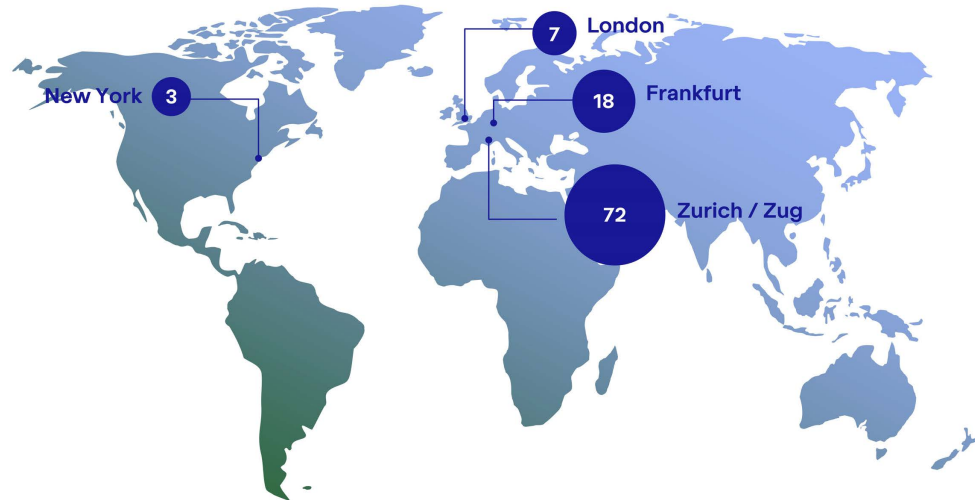

International expansion and diversification

Progressive expansion of Bellevue's international activities is a core element of its business strategy. Switzerland, Germany and the United Kingdom remain Bellevue's core markets and account for the lion's share of assets under management. Operations in each core market are handled directly by a country team. The Spanish market has grown over the years to become Bellevue's fourth-largest market thanks to successful collaboration with atl Capital, a local partner. All four markets experienced asset outflows in 2023 as clients became more risk-averse.

Distribution activities in Bellevue's domestic market of Switzerland were intensified, especially in the country's French- and Italian-speaking regions. In Germany the sales and distribution team was expanded and its organizational structure modified, enabling it to address the needs of all relevant client segments efficiently and effectively. The focus of the Germany team in 2024 will be on business opportunities with savings and cooperative banks. Bellevue has a stable client base in Austria with growth potential and it is steadily building up its presence in the Benelux. In Singapore collaboration with a local partner has been fruitful. The United Kingdom has been an attractive market for BB Biotech AG and Bellevue Healthcare Trust in the past and both investment companies expect this to remain so going forward. The ramp-up of distribution activities for the Luxembourg funds in the still young Italian market has experienced some delay due to the uncertain market situation, but progress on this front should gain momentum in 2024.

In the Private Markets business, a dedicated private equity strategy was successfully launched in Switzerland in 2022. The Bellevue Entrepreneur Private Fund, which is focused on growth financing for unlisted small- and mid-sized Swiss companies, has attracted considerable interest from prominent investors. A follow-on product is at an advanced stage of planning and greater engagement of non-Swiss clients is being considered in order to extend our reach and strengthen our market position.

International reach, locally anchored

Source: Bellevue Group, as at December 31, 2023, number of employees (headcount).

Strategic growth initiatives

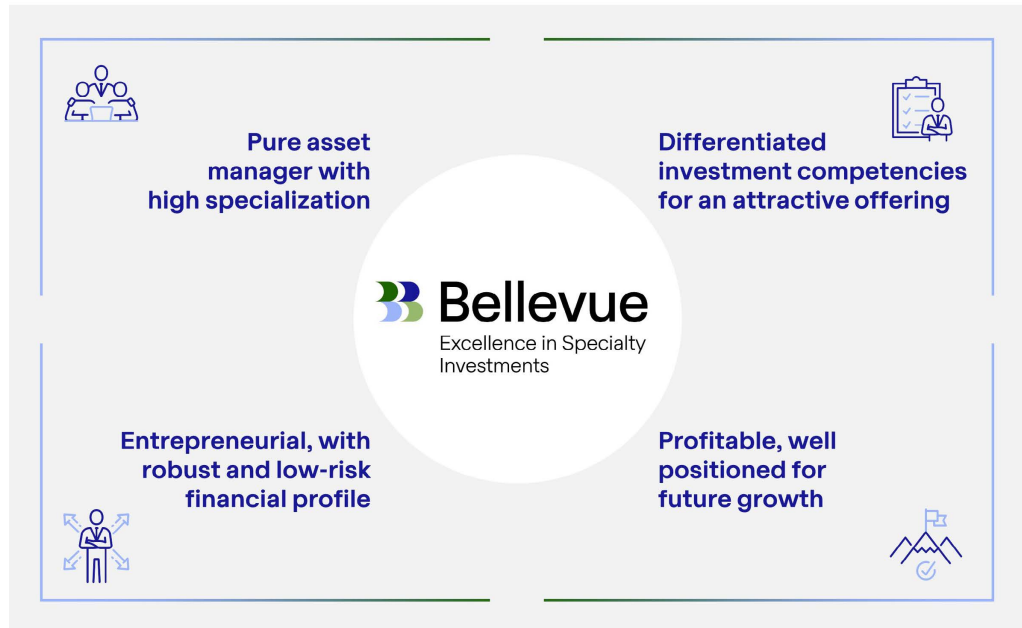

As part of its growth strategy, Bellevue is selectively developing new markets and client groups to enhance its operating efficiency and increase its international reach. Initial progress has been made in selected Latin American markets such as Chile and Peru. This expansion is being pursued through the recruitment of promising talent for our sales and distribution operations and through selective distribution partnerships.

Business model and strategy

A proudly independent company founded in 1993, Bellevue Group – based in Kusnacht/Switzerland – and its approximately 100 employees offer access to attractive and innovative investment ideas that generate value for investors and the company's shareholders. We employ highly qualified investment specialists with many years of experience in the areas that are relevant to us – with a particular focus on healthcare and other growth strategies. As a «House of Investment Ideas», we know that quality and innovation are vital for creating value. We are constantly exploring and exploiting promising opportunities for value growth. Our teams are guided by an entrepreneurial mindset distinguished by mutual trust and creative autonomy at all points of interaction. Our strong convictions in the investment decisions we make is why we also have an active stake in our investments – and thus in the success of the clients we serve.

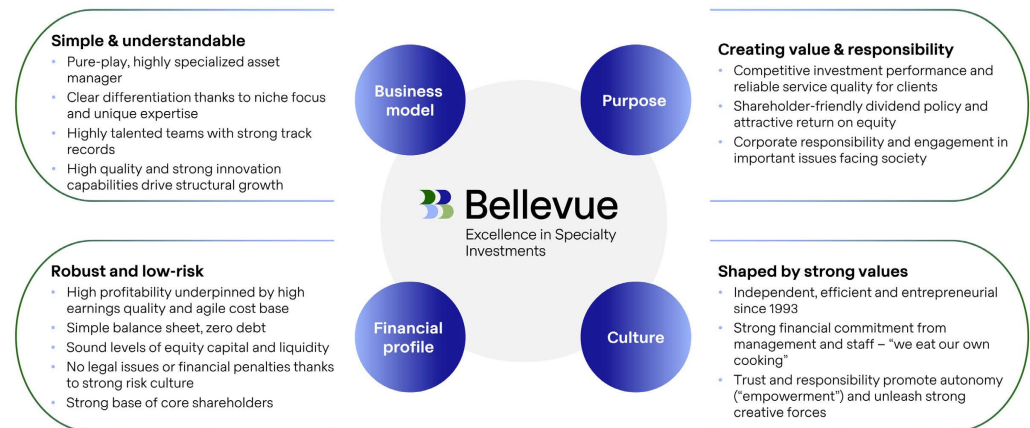

At a glance

- Bellevue is a pure play, highly specialized asset manager with a distinctive focus on healthcare and other attractive growth strategies
- Expertise and innovation are what make us unique
- Creating value for clients and shareholders is our mission
- Our business model is straightforward, transparent and highly scalable
- Our financial profile is robust and low on risk
- Responsibility towards all employees, business partners and the environment is non-negotiable

Clear-cut strategy and distinctive business profile

Robust, time-tested foundation engenders trust and confidence during uncertain times

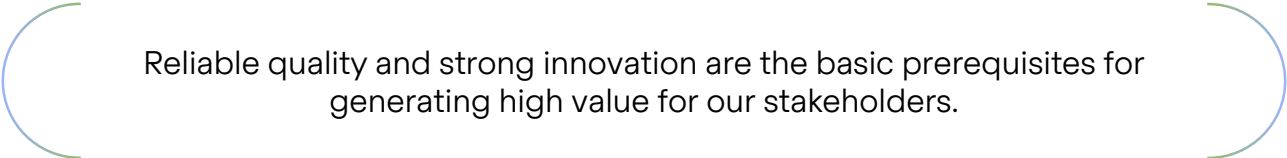

A forward- and growth-oriented strategy focused on profitability

Future growth will primarily be fueled by the investment performance of existing products, the development of interesting new products and the acquisition of new clients. We have a sound platform and clear strategy to grow on all three fronts.

Growing with our established products is a priority. Our existing products offer us substantial growth potential and the best returns. «Grow with the products» is only possible by maintaining and innovating top-quality products. Continuous investment in modern platforms and infrastructure ensures our ability to meet that goal.

A steady expansion of the underlying client base is also needed to grow with the products. Here we are pursuing various strategies to expand already strong positions in existing markets and to establish new positions in strategic secondary markets.

Reliable quality and strong innovation are the basic prerequisites for generating high value for our stakeholders.

Besides quality, innovation is another key growth driver. The development of innovative concepts for non-traditional and traditional products enables us to take full advantage of our business model's growth potential. We therefore strive to expand «Bellevue Private Markets» and in other specialized areas.

The pipeline of ideas and products for the coming years is well-filled. At the same time, existing products or services that no longer have a truly distinctive or sharp competitive edge will be re-positioned or discontinued. We are not seeking growth in and of itself, but rather sustained, quality earnings potential with an attractive cost/income ratio.

Cash at the end of the period	38 834	64 681

The accompanying notes are an integral part of the consolidated financial statements.

Notes to the consolidated financial statements

1 Segment information

The Group Executive Board is the Group's chief operating decision maker and reviews the results from a product-related as well as a geographical perspective. Bellevue Group is focusing exclusively on the Asset Management business unit and therefore reports only one reportable segment. As of December 31, 2023, the segment consists of the operating business units Bellevue Asset Management and Bellevue Private Markets. The offering includes a broad-based range of investment funds as well as investment solutions for institutional, intermediary and private clients. Bellevue Asset Management has a clear focus on managing equity portfolios for selected sector and regional strategies, based on a fundamental and research-driven stock picking approach («bottom up»). A small part of the product range pursues a holistic asset management approach based on quantitative and experience-driven investment approaches. Bellevue Private Markets specializes in developing exclusive investment opportunities in unlisted companies for its investor group. In addition, it acts as investment advisor for private equity funds. This represents a further diversification of the investment universe with low correlation to the capital markets. The two business units operate in similar regions. Group Management monitors the results of the two business units both on a consolidated basis and separately.

The geographical breakdown of operating income is as follows:

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Operating income		
Switzerland	71 490	81 598
United Kingdom	8 662	10 717
Germany	4 098	4 504
Other countries	- 2 359	- 957
Total	81 891	95 862

Non-current assets for this purpose consist of property and equipment as well as goodwill and other intangible assets:

CHF 1 000	31.12.2023	31.12.2022
Non-current assets		
Switzerland	33 967	34 805
Germany	13 043	14 730
Other countries	327	23
Total	47 337	49 558

2 Details on the consolidated income statement

2.1 Revenues from asset management services

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Management fees	79 268	103 789
Performance fees	1 995	184
Other commission income	3 330	3 873
Fee and commission expense	- 2 800	- 3 463
Revenues from asset management services	81 793	104 383

Management fees are generated from asset management mandates with listed investment companies, regulated funds in various countries, private equity funds or institutional counterparties. The fees are mostly collected on a monthly basis.

Various funds and mandates as well as the exclusive investment opportunities of the investor group include performance fees. These are only taken into account when a formal claim exists and Bellevue Group has fulfilled its performance obligation. The definitions are set out in the respective legal documents and can be summarized as follows:

- Regulated funds: after the end of the calendar year
- Private equity funds: depending on the partnership agreement - in the case of distributions or closure of the fund
- Investment group: in the case of exits of investments
- Mandates: individual – quarterly or yearly

Other commission income includes transaction-related fees.

2.2 Net other income

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Dividend income	589	771
Interest income	500	192
Interest expenses	- 92	- 49
Net foreign exchange income/losses	- 18	389
Other	34	178
Total net other income	1 013	1 481

2.3 Personnel expenses

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Fix and variable salaries	37 943	41 588
Pension cost	1 929	1 829
Other social benefits	2 867	2 998
Other personnel expenses	1 084	573
Total personnel expenses	43 823	46 988

The compensation system for Bellevue Group employees is conceived to motivate employees at all operating units to do excellent work. It is a compensation model based on «personal ownership» and merit system principles. In setting fixed salaries, a restrained policy prevails from a business point of view. On the other hand, variable compensation is offered under an attractive ownership-oriented profit-sharing plan. This profit-sharing plan is tied directly to Bellevue Group's operating results. Moreover, part of this bonus is paid in the form of restricted stock awards and shares of in-house products. This system is conducive to a culture of high performance with a long-term horizon.

The basis for calculating Bellevue Group's variable compensation pool is adjusted consolidated earnings before taxes.

A fixed portion of the adjusted Group profit before taxes is allocated to the employees (total pool of variable compensation). Due to the direct link between the Group's results and the total pool of variable compensation, there is a mechanism in place to ensure that variable compensation is commensurate with the Group's operating performance (variabilization of profit-sharing).

2.4 Operating expenses

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Occupancy and maintenance expenses	717	1 036
IT and telecommunications	4 676	3 873
Travel and representation, PR, advertising	3 777	3 442
Consulting and audit fees	1 667	2 327
Research expenses	2 129	1 906
Other expenses	1 396	1 472
Total other operating expenses	14 362	14 056

2.5 Depreciation and amortization

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Depreciation of property and equipment	242	479
Depreciation of rights of use	1 989	1 676
Depreciation of intangible assets	1 432	1 469
Total Depreciation and amortization	3 663	3 624

2.6 Tax

2.6.1 Income taxes

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022

No transfer between levels of the fair value hierarchy took place in 2023 or in the previous period.

Level 1 instruments

If a financial instrument is traded in an active market, its fair value is based on listed market prices. In the fair value hierarchy prescribed in IFRS 13, this type of financial instrument is classified as a level 1 instrument. The fair value of these positions corresponds to the current price (e.g. settlement price or closing price) multiplied by the number of units of the financial instruments held.

Level 2 instruments

If there is no active market, the fair value is determined on the basis of valuation models or other generally accepted valuation methods (primarily option pricing and discounted cash flow models). If all the significant inputs can be observed directly or indirectly in the market, the instrument is classified as a level 2 instrument. The valuation models take account of the relevant parameters such as contract specifications, the market price of the underlying asset, foreign exchange rates, yield curves, default risks and volatility.

Level 3 instruments

If at least one significant input cannot be observed directly or indirectly in the market, the instrument is classified as a level 3 instrument. These instruments include private equity funds. The fair value of private equity funds is determined based on the last available net asset values, less necessary value adjustments according to own assessment.

3.1.3 Level 3 financial instruments

CHF 1 000	31.12.2023	31.12.2022
	Financial investments	Financial investments
Holdings at the beginning of the year as of 01.01.	7 850	7 867
Investments	1 106	1 775
Redemptions/Payments	– 162	– 38
Losses recognized in the income statement	– 2 112	– 1 527
Losses recognized in other comprehensive income	– 413	– 227
Gains recognized in the income statement	–	–
Gains recognized in other comprehensive income	444	–
Total book value at balance sheet date	6 713	7 850
Unrealized profit/losses from level 3 instruments which were held on the balance sheet date recorded in the income statement in the period	– 2 112	– 1 527

Key assumptions for the valuation of level 3 financial instruments vary from investment to investment. The following table shows the effect on the valuation when these assumptions are changed:

Sensitivity analysis	Fair value	Key assumption	Changes in key assumption	Change in fair value in CHF 1 000
Private equity funds	6 713	Net asset value	+ 5 percentage points	336
			- 5 percentage points	– 336

CHF 1 000	31.12.2023	31.12.2022
	Other financial liabilities	Other financial liabilities
Holdings at the beginning of the year as of 01.01.	–	27
Gains recognized in the income statement	–	– 27
Total book value at balance sheet date	–	–
Unrealized profit/losses from level 3 instruments which were held on the balance sheet date and recorded in the income statement in the period	–	–

The contingent purchase price payment from the acquisition of REALWERK AG in 2020 is included in the balance sheet item «Other financial liabilities» and represents the remaining purchase price liability owed. The valuation is mainly based on the underlying share purchase agreement provisions. In the first half year of 2021 a payment of TCHF 45 has taken place. The remaining liability was derecognized in profit or loss in the first half of 2022.

3.1.4 Derivative financial instruments

CHF 1 000	Positive replacement value	Negative replacement value	Contract volume
31.12.2023			
Futures ¹⁾	-	-	3 316

Bellevue Group basically examines the value of the goodwill annually, based on the estimated recoverable amount that can be obtained per each single cash-generating unit, or group of such units (depending on allocation). If events or a change of circumstances indicate a possible impairment, the test is carried out more frequently.

The recoverable amount is determined to be the value-in-use and is calculated using the discounted cash flow method. The projected free cash flows for the respective cash-generating units are estimated based on five-year financial plans. The business plans approved by management serve as the basis for these estimates of projected free cash flows. These cash flows are discounted to present value.

The following key parameters and their single components have been taken into account in the discounted cash flow method:

- Income on the average assets under management and the expected return on assets (management and performance fees)
- Transaction-related income
- Discount rate

An impairment test was carried out for all CGUs at the end of December 2023. The discount rate used in these calculations was 12.3% (31.12.2022: 12.3%) and the assumed growth rate was 1.5% (31.12.2022: 1%).

As of December 31, 2023, and December 31, 2022, Bellevue Group did not identify any impairment. The goodwill as of December 31, 2023 is attributable to the CGU-groups Bellevue Asset Management (Bellevue Asset Management AG, CHF 23.8 mn and Bellevue Asset Management (Deutschland) GmbH, CHF 10.7 mn) and Bellevue Private Markets (CHF 5.8 mn).

At the time of preparation of the consolidated financial statement, Bellevue Group's management does not assume that a reasonably possible change in a parameter underlying the impairment test would lead to a goodwill impairment.

Non-current	5 178	9 751
Total	26 285	42 973

3.8 Employee benefit plans

There are pension plans for most of the employees at Bellevue Group. These plans provide benefits in the event of death, disability, retirement or termination of employment. There were no unfunded liabilities due to employee pension plans as at the balance sheet date (previous year: no liabilities either). In Switzerland, pension contributions are paid equally by the employer and the employee. The foundation board is composed of an equal number of employee and employer representatives. According to Swiss law and the pension regulations, foundation boards are obliged to act solely in the interest of the foundation and its beneficiaries (active workforce and recipients of pensions). Hence, the employer cannot single-handedly determine the benefits and the funding; all resolutions have to be agreed on by both sides. The members of the foundation board are responsible for defining the investment strategy, for deciding on amendments to the pension regulations, and in particular for determining the funding of the pension benefits.

In the events of death and disability, pension benefits are based on the insured salary. In the event of old age, they are based on pension assets. At the time of retirement, insured persons can choose between a life annuity, which includes a prospective spouse pension, and a lump sum payment. Apart from retirement benefits, pension benefits also include disability and surviving spouse or partner pensions. Furthermore, insured persons can improve their pension situation up to the regulatory maximum by paying in additional amounts, or withdraw money early to acquire property that they occupy themselves. At the time of termination of an employment contract, the vested benefits will be transferred to the pension plan of the new employer or a vested benefits scheme. This type of benefit can result in pension payments fluctuating considerably from year to year.

When determining the benefits, the minimum requirements of the Federal Act on Occupational Old Age, Survivors' and Invalidity Pension Provision (OPA) and its implementing provisions must be considered. The LOB defines minimum insured salary and minimum retirement assets. The Federal Council determines the minimum interest on these minimum retirement assets at least every two years. In 2022, it amounts to 1% (previous year: 1%).

Due to the nature of the pension plans and the provisions of the OPA, the employer is exposed to actuarial risks. The risks of death, disability and longevity are largely covered by an insurance policy. The major remaining risks include investment risk, interest risk and the risk of the insurer adjusting the premiums.

All employer and employee contributions are determined by the foundation board. The employer is to bear a minimum of 50% of the required contributions. In the case of underfunding, both employer and employee are entitled to pay in amounts to close the funding gap.

CHF 1 000	31.12.2023	31.12.2022

Liquidity	9 740	9 199
Total	47 069	45 030

The plan assets allocation as at December 31, 2023, as well as at December 31, 2022, do not include shares of Bellevue Group AG. The foundation board issues investment guidelines for the investment of plan assets. These guidelines include tactical asset allocation and benchmarks for comparing the results with a general investment universe. The plan assets are well diversified. In terms of diversification and security, the Swiss pension plan is subject to the provisions of the OPA. As a rule, bonds receive at least a rating of A.

The foundation board regularly reviews the selected investment strategy as to whether it meets the requirements of the pension plan and whether the risk budget is in line with the demographic structure. Adherence to investment guidelines as well as results achieved by investment advisors are reviewed on a quarterly basis. Furthermore, an external consultancy periodically examines the investment strategy with regard to whether it is effective and appropriate.

Through its defined benefit pension plan, the Company is exposed to a number of risks. These risks are shared between the employer, employees and the provider of the pension fund as the retirement benefits are currently financed over an insurance contract. The calculation of the defined benefit obligation allows for this risk sharing by reducing the defined benefit obligation related to employees. Further, the provider determines the level of conversion rates. Hence, the defined benefit obligation is based on the assumption that future conversion rates will change in line with the changes in future interest rates.

As at December 31, 2023, the retirement age for women was adjusted from 64 to 65 (due to a revision of the «Old Age and Survivors Insurance»). These adjustment result in a plan amendment and as a consequence in a past service cost loss of CHF 0.1 mn.

Defined-benefit obligations are distributed as follows:

CHF 1 000	31.12.2023	31.12.2022
Active workforce	41 703	39 708
Pensioners	2 190	2 050
Total	43 893	41 758

The maturity of the obligation is 16.5 years as at December 31, 2023 (previous year: 15.8 years). The expected employer's contributions for 2024 are estimated at CHF 1.6 mn.

	31.12.2023	31.12.2022

4 Significant estimates, assumptions and judgments

4.1 Estimates, assumptions and the exercising of discretion by management

In applying the accounting principles, management must make estimates, assumptions and discretionary decisions that influence the level of reported assets and liabilities, expense and income, as well as the disclosure of contingent assets and liabilities. Management reviews its estimates and assumptions on an ongoing basis and adjusts them according to new findings and conditions. This may, among other things, have a material impact on the following positions of the consolidated financial statements.

Income taxes

Bellevue Group AG and its subsidiaries are liable for income tax in most related countries. The current tax assets and current tax liabilities reported as at the balance sheet date as well as the resulting current tax expense for the period under review are based on estimates and assumptions and may therefore differ from the amounts determined in the future by the tax authorities.

Provisions

A provision is recorded if, as the result of a past event, Bellevue Group has a current liability as at the balance sheet date that will probably lead to an outflow of funds and if the amount of the liability can be reliably estimated. When determining whether a provision should be recorded and whether the amount is appropriate, best possible estimates and assumptions as at the balance sheet date are applied. These estimates and assumptions may be subject to change according to new findings and conditions.

Level 3 financial instruments (fair value)

Level 3 financial instruments are valued based on the inputs that are not based on observable market data. For details to the valuation methods applied for level 3 financial instruments refer to the notes to the consolidated financial statements on note [3.1.2](#) «Fair value financial instruments».

For details to the effect of significant changes on the assumptions behind the classification method for level 3 financial instruments refer the notes to the consolidated financial statements on note [3.1.3](#) «Level 3 financial instruments».

Pension plan

Management sets the actuarial assumptions and determines whether a pension plan surplus can be capitalized as an economic benefit for Bellevue Group. Pension costs are also subject to estimates and assumptions. The management believes that the assumptions and estimates which have been made are appropriate.

Review of goodwill and other intangible assets for impairment

Bellevue Group basically examines the value of the goodwill annually, based on the estimated recoverable amount that can be obtained per each single cash-generating unit, or group of such units (depending on allocation).

Established that an event or any circumstances cause a reduction in value of the goodwill, examinations will be performed more frequently.

The Group's approach to determine the key assumptions and related growth expectations is based on management's knowledge and reasonable expectations of future business, using internal and external market information, planned business initiatives and other reasonable intentions of management. For that purpose, the Group uses historical information by taking into consideration the current and expected market situations.

Changes in key assumptions: deviations of future actual results achieved vs forecasted/ planned key assumptions, as well as future changes of any of the key assumptions based on a future different assessment of the development of relevant markets, and/or the businesses, may occur. Such deviations may result from changes in the market environment and the related profitability, required types and intensity of personnel resources, general and company specific driven personnel cost development and/or changes in the implementation of known or addition of new business initiatives and/or other internal and/or external factors. These changes may cause the value of the business to alter and therefore either increase or reduce the difference between the carrying value in the balance sheet and the unit's recoverable amount or may even lead to a partial impairment of goodwill.

5 Risk management and risk control

5.1 Risk evaluation and risk policy

Risk management is based on the evaluation of risks by the Board of Directors and is ensuing risk policy, which is reviewed periodically. Independent risk control bodies monitor the risks at the individual operating unit level and at Group level. The Group Executive Board is informed on a regular basis about the assets, financial positions, liquidity and earnings of the Group and all related risks by means of financial and risk reporting procedures commensurate with each particular level of management. Risk reports are prepared at the individual operating unit level as well as at the Group level.

5.2 Market risk

Market risks arise through fluctuations in market pricing of interest rates, exchange rates and equities as well as the corresponding volatilities. Market risk management entails the identification, measurement, control and regulation of market risk exposure. This exposure primarily pertains to the financial investments.

Market risks are monitored by an independent function on a daily basis. Risk reports are prepared at the individual operating unit level as well as at Group level. Market risks are minimized through constant monitoring of risk.

Price change risks

The Group's exposure to foreign exchange risk arises from financial assets held by the Group, which are either recognized at fair value through profit or loss or directly in equity. To manage the price risk, the Group diversifies the portfolio and partially hedges it with index futures or listed index options. Financial assets are mainly investments in own products (equities, investment funds and private equity funds) and other financial assets (equities, private equity funds and various). Investments in own products for the fulfillment of long-term incentive plans are held to secure liabilities from entitlements of such plans and are therefore considered as economic hedges. All positions in financial assets are valued at fair value. Wherever possible, stock market prices are automatically imported into our systems and used for valuation purposes. The positions are monitored on a daily basis. Any change in price is fully reflected in profit or loss or comprehensive income.

A change in fair value of 10% in relation to the year-end value (net after hedging) would result in a change in equity of CHF 5.0 mn (previous year: CHF 4.3 mn) for the financial assets measured at fair value, of which CHF 4.4 mn (previous year: CHF 3.8 mn) would be recognized in profit or loss.

Interest risk

The Group's exposure to interest rate risk is marginal. On the one hand, the Group's cash and cash equivalents available on demand bear interest at market rates and, on the other hand, the influence of debt interest is low due to the high equity ratio. If borrowings are necessary, these are short-term fixed loans that bear interest at market rates.

Currency risk

The Group's foreign currency risk consists of recognized assets and liabilities as well as future transactions (mainly management fees) that are denominated in a currency other than the functional currency of the Group company concerned. The Group deliberately refrains from hedging these currency risks. The net balance sheet items are as follows:

CHF 1 000	CHF	EUR	USD	Other
Net position as of 31.12.2023		22 238	7 577	13 380
10% change in fair value	+/- 4320			
Net position as of 31.12.2022		22 736	9 665	177
10% change in fair value	+/- 3258			

5.3 Default risk

The Group is exposed to default risk, which is the risk that a counterparty is unable to pay the amount due in full when due. The Group measures default risk and expected default losses based on the probability of default, exposure at default and loss given default. In determining expected default losses, the Group considers both historical analysis and forward-looking information. The Group manages and controls its default risk by maintaining business relationships only with counterparties with an acceptable credit rating.

The following table shows the maximum credit risk exposure of Bellevue Group at the balance sheet date:

CHF 1 000	31.12.2023	31.12.2022
Cash and cash equivalents	38 834	64 681
Trade and other receivables	7 728	12 128
Financial investments	12 210	–
Other assets	1 105	1 506
Total	59 877	78 315

As of December 31, 2023, there are no financial assets that are impaired (December 31, 2022: none) and there are no indications of material adverse effects on the credit quality of financial assets. In 2023, no impairments were identified on financial assets exposed to credit risk.

The following table provides an analysis of the maturity of financial assets with credit risk:

CHF 1 000	Due within 3 months	Due within 3 to 12 months	Due between 1 and 5 years	Total
31.12.2023				
Cash and cash equivalents	38 834	–	–	38 834
Trade and other receivables	7 305	423	–	7 728
Financial investments	12 210	–	–	12 210
Other assets	3	–	1 102	1 105
Total	58 352	423	1 102	59 877
31.12.2022				
Cash and cash equivalents	64 681	–	–	64 681
Trade and other receivables	11 186	942	–	12 128
Other assets	2	–	1 504	1 506
Total	75 869	942	1 504	78 315

As of December 31, 2023 and 2022, the ECL impairment model had no material impact as (i) the majority of financial assets are measured at fair value through profit or loss and the impairment requirements do not apply to such instruments; and (ii) the financial assets «at amortized cost» are mainly current. Consequently, no impairment loss has been recognized based on expected credit losses.

5.4 Liquidity risk

The CFO of Bellevue Group is responsible for managing liquidity and financing risks. Financing risks refer to the risk of Bellevue Group or one of its operating units being unable to refinance its current or anticipated obligations on an ongoing basis at acceptable conditions. Liquidity risks refer to the risk of Bellevue Group or one of its operating units being unable to fulfill its payment obligations when due. Whereas financing risks relate to the ability to finance business operations at all times, liquidity risks primarily concern the ability to ensure sufficient liquidity at any point in time.

Bellevue Group manages its liquidity and financing risks on an integrated basis at the consolidated level. Day-to-day liquidity management is performed at the level of the individual Group companies by functions responsible for this. Financing capacities are managed through appropriate diversification of funding sources and the provision of collateral, thereby reducing liquidity risks.

Risk management ensures that Bellevue Group always has sufficient liquidity to be able to fulfill its payment obligations, even in stress scenarios. The liquidity risk management system therefore comprises functional risk measurement and control systems to ensure its continuous ability to pay its obligations at any time. It also defines strategies and requirements for the management of liquidity risk under stress conditions as part of the defined liquidity risk tolerance. They mainly include risk mitigation measures, the holding of a liquidity buffer comprising highly liquid assets, and a contingency plan to manage any liquidity shortfalls. In the event of an unexpected tightening of liquidity, the Group can also access a portfolio of positions that retain their value and can easily be liquidated and has access to two existing credit lines at different banks.

The maturity structure of financial liabilities is as follows:

CHF 1 000	Due within 3 months	Due within 3 to 12 months	Due between 1 and 5 years	Total
31.12.2023				
Trade and other payables	15 891	5 216	5 178	26 285
Leasing liabilities ¹⁾	544	1 639	1 628	3 811
Total	16 435	6 855	6 806	30 096

¹⁾ According to IFRS 7 B11D, the undiscounted contractual cash flows relating to the gross lease liabilities must be disclosed. The corresponding undiscounted cash flows differ from the amount recognized in the balance sheet because the amount is based on discounted cash flows.

CHF 1 000	Due within 3 months	Due within 3 to 12 months	Due between 1 and 5 years	Total
31.12.2022				
Trade and other payables	26 283	6 939	9 751	42 973
Leasing liabilities ¹⁾	484	1 130	1 774	3 388
Other financial liabilities	27	–	–	27
Total	26 794	8 069	11 525	46 388

¹⁾ According to IFRS 7 B11D, the undiscounted contractual cash flows relating to the gross lease liabilities must be disclosed. The corresponding undiscounted cash flows differ from the amount recognized in the balance sheet because the amount is based on discounted cash flows.

5.5 Operational risk

Operational risks represent the risk of losses resulting from the inadequacy or failure of internal processes, people and systems or from external events.

All business activities entail operational risks, which are prevented, mitigated, transferred or even assumed based on cost/benefit considerations. During this process, potential legal, regulatory and compliance-related risks are taken into account, as are follow-on risks in the form of reputational risks.

The Group-wide process model represents the basis for the management of operational risks. As part of the systematic assessments that are performed annually, the operational risks in all critical processes and process entities are identified and evaluated. In addition, further attention is focused on core security topics such as data protection and business continuity management, which are guaranteed through the use of extra tools.

All measures to control operational risks from part of the Internal Control Systems (ICS).

5.6 Legal and compliance risks

Legal and compliance risks refer to risks related to legal and regulatory issues, primarily liability and default risks. These risks are minimized when processing orders by requiring standardized master agreements and individual agreements. Risk related to the acceptance of client assets and adherence to due diligence obligations are monitored at the respective operating unit level. When appropriate, external attorneys will be consulted to limit legal risks.

6 Major subsidiaries

Company name	Domicile	Purpose	Currency	Share capital/ Nominal capital	31.12.2023		31.12.2022

Minority shareholders' equity ownership of BB Pureos Bioventures GP Limited is 1%. Due to the non-materiality of this ownership with respect to the overall Bellevue Group's equity and comprehensive income, no separate disclosure of minority shareholders has been published on the Group's financial statements.

7 Guarantees and contingent liabilities

CHF 1 000	31.12.2023	31.12.2022
Rent deposit accounts in connection with leasing contracts	1 144	1 178
Contingent liabilities	3 468	4 731

8 Events after the balance sheet date

No events have occurred since the balance sheet date that would have a material impact on the information provided in the year 2023 consolidated financial statements and would therefore need to be disclosed.

9 Transactions with related companies and persons

9.1 Compensation paid to members of the Board of Directors and to members of the Group Executive Board

CHF 1 000	01.01.-31.12.2023		01.01.-31.12.2022	
	Board of Directors	Group Executive Board	Board of Directors	Group Executive Board
Fixed compensation	721	764	613	1 018
– in cash	531	764	613	1 018
– in shares ¹⁾	190	–	–	–
Non-monetary benefit from voluntary stock purchase programs ²⁾	14	–	34	63
Short-term variable compensation	–	611	147	915
– in cash	–	611	–	632
– in shares ³⁾	–	–	147	283
– in shares with vesting period ⁴⁾	–	665	–	1 136
Long-term variable compensation	–	– 65	–	– 110
– in shares ⁵⁾	–	– 65	–	– 110
Total	735	1 975	794	3 022

¹⁾ The allocation is made in freely available shares

²⁾ The purchase/allocation is made in 3 years blocked and discounted shares

³⁾ The allocation is made in 4 years restricted shares

⁴⁾ The allocation is made in 4 years restricted shares with one-year service period and right of redemption (taking into account the service/vesting period in accordance with IFRS 2)

⁵⁾ Members of the Group Executive Board partially participate in an employee stock ownership plan in connection with the asset management mandate of BB Biotech AG. Within the scope of these plans, some of the members of the Group Executive Board are entitled to receive a maximum number of shares in BB Biotech AG. The actual number of shares awarded depends on various conditions. Awarded shares are subject to a three-year vesting period beginning on the date of grant. In addition, the actual number of shares distributed will depend on the achievement of certain performance targets over the subsequent three fiscal years in connection with the respective investment mandates. The cost of this employee program is recognized as long-term variable compensation.

The amounts listed for fixed and variable compensation also include any employer contributions to statutory or regulatory social security schemes.

In the financial years 2023 and 2022, no compensation was paid to related parties of members of the Board of Directors and Group Executive Board, nor to former members of the Board of Directors.

9.2 Transactions with related companies and persons

As of December 31, 2023 and 2022, there were neither receivables nor liabilities to related companies and persons.

10 Share-based payments

10.1. Variable compensation (share of profit) with service conditions

According to the rules for the payment of variable compensation set by the Board of Directors, higher variable compensation (>TCHF 200) is partly paid in blocked shares with a 1-year (pro rata) service condition. The cost of this portion of the variable compensation is recognized over the service period from the grant date. In 2023, TCHF 1 653 (2022: TCHF 1 140) of share-based compensation costs were recognized in personnel expenses.

10.2. Voluntary employee stock ownership plan

In 2023, the Board of Directors approved a voluntary employee stock option program for a total of 135 000 shares (2022: 100 000 shares). Depending on the management level, the Board of Directors, Executive Board and employees were offered a certain number of Bellevue Group AG shares at a discounted purchase price of CHF 18.00 per share (2022: CHF 23.75 per share). This corresponded to a discount of almost 25% on the volume-weighted average price of the quarter prior to the grant date of the entitlements. The difference between the market value at the effective grant date and the purchase price corresponds to a monetary benefit of TCHF 25 (2022: CHF 0.6 Mio.), which was recognized in personnel expenses. 23 169 rights (2022: 66 310 rights) were exercised, thereof 10 000 (2022: 4 500) by the Board of Directors. The members of the Group Executive Board didn't exercise any rights (2022: 8 200) in 2023.

11 Earnings per share

CHF 1 000	01.01.–31.12.2023	01.01.–31.12.2022
Group net profit	15 223	25 300
Weighted average number of issued registered shares	13 461 428	13 461 428
Less weighted average number of treasury shares	– 230 813	– 170 904
Weighted average number of shares outstanding (undiluted)	13 230 615	13 290 524
Weighted average number of shares outstanding (diluted)	13 230 615	13 290 524
Earnings per share		
Undiluted earnings per share (in CHF)	1.15	1.90
Diluted earnings per share (in CHF)	1.15	1.90

12 Dividend payment

The Board of Directors will propose a dividend distribution of CHF 1.15 per registered share to the Annual General Meeting of Bellevue Group AG on March 20, 2024. This corresponds to a total distribution of CHF 15.5 mn.

13 Approval of the consolidated financial statements

The Audit & Risk Committee discussed and approved the consolidated financial statements at its meeting on February 16, 2024, and the Board of Directors at its meeting on February 19, 2024. The consolidated financial statement will be submitted to the Annual General Meeting on March 20, 2024, for approval.

14 Summary of significant accounting policies

14.1. Company and business activity

Bellevue Group AG is a public limited company listed on the SIX Swiss Exchange and has its registered office at Seestrasse 16, 8700 Küsnacht/Switzerland. The company acts as a pure asset manager with a multi-boutique approach and specializes in investment themes that require an active investment style.

14.2 Accounting principles

The consolidated financial statements of Bellevue Group AG have been prepared in accordance with International Financial Reporting Standards (IFRS) and comply with the listing regulations of the Swiss Stock Exchange.

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. The application of the underlying principles is unchanged from the previous year, with the exception of the accounting standards newly applied in item [14.3](#).

14.3 New accounting standards used

The following new or revised standards and interpretations did not have any material impact on Bellevue Group when they were applied for the first time as of January 1, 2023:

	To be applied as of
IFRS 17: Insurance Contracts	01.01.2023
IAS 8 Amendments: Definition of Accounting Estimates	01.01.2023

14.4 International Financial Reporting Standards and interpretations which will be introduced in 2024 or later

Based on early stage analysis, the following new standards and/or standards' updates will not have a significant effect on Bellevue Group's financial statements:

	To be applied as of
IAS 1 Amendments: Classification of Liabilities as Current or Non-current	01.01.2024
IFRS 16 Amendments: Lease Liability in a Sale and Leaseback	01.01.2024
IAS 7 / IFRS 7 Amendments: Supplier Finance Arrangements	01.01.2024

14.5 Important accounting principles

14.5.1 Consolidation principles

Fully consolidated companies

The annual consolidated financial statements comprise the annual accounts of Bellevue Group AG and its subsidiaries. All companies that are directly or indirectly controlled by Bellevue Group AG are consolidated. Subsidiaries are fully consolidated from the date on which control is transferred to the Group, and deconsolidated from the date when control ceases.

Method of consolidation

The Group applies the acquisition method to account for business combinations. Under this method, the book value of the participation held by the parent company is offset against its share of the shareholders' equity of the subsidiary at the time of the acquisition. The effects of intercompany transactions are eliminated during the preparation of the consolidated financial statements.

Business combinations

In a business combination, the acquirer obtains control of the net assets of one or more businesses. The business combination is accounted for using the acquisition method. This requires the recognition of the identifiable assets acquired, including previously unrecognized intangible assets, and liabilities assumed of the acquired business at their fair values at the acquisition date. Any excess of the consideration transferred over the net identifiable assets acquired is recognized as goodwill. Consideration transferred is assets or equity instruments issued that are measured at fair value at the acquisition date. Transaction costs are immediately charged to the income statement.

Contingent consideration, which is accounted for as part of the consideration transferred for the acquiree, is measured at fair value at the acquisition date. Subsequent changes in the fair value of contingent consideration are recognized in the income statement in accordance with IFRS 9.

14.5.2 General principles

Foreign currency translation

The items included in the financial accounts of each of the Group's company are measured using the currency of the primary economic environment, in which the company operates (functional currency). The consolidated financial statements are presented in Swiss Francs, which is also the functional and presentation currency of Bellevue Group AG.

Assets and liabilities denominated in foreign currencies at foreign group member companies are converted into Swiss francs using the applicable exchange rates for the balance sheet date. For the income and cash flow statements, year-average exchange rates are used. The differences resulting from consolidation are booked directly in other comprehensive income.

In the individual year-end accounts of group member companies transactions are booked in foreign currency at the respective daily exchange rates. Monetary assets are translated at the respective daily exchange rate and any gains or losses are recognized in the income statement. Monetary items carried on the balance sheet at historical cost in a foreign currency are translated at the historical exchange rate.

The following exchange rates apply to the translation of significant currencies:

	2023		2022	
	Year-end rate	Average rate	Year-end rate	Average rate
EUR	0.92887	0.97071	0.98956	1.00295
USD	0.84140	0.89768	0.92450	0.95344
GBP	1.07160	1.11848	1.11870	1.17416

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and current accounts as well as call money at banks with a maturity of less than three months. These are measured at nominal value, which corresponds to fair value due to the short-term maturities.

Accrual of income

The Group's revenue consists mainly of asset management fees. A distinction is made between the following fees: Management fees result from the management of collective capital contributions and institutional asset management mandates. Performance fees are only recognized when all performance criteria have been met. Interest is accrued on an accrual basis.

14.5.3 Financial instruments

Initial recognition

Purchases and disposals of financial assets are recognized in the balance sheet on the trade date. At the time of initial recognition, financial assets or financial liabilities are classified in the respective category according to criteria set forth in IFRS 9 and measured at the fair value of the consideration given or received, including directly attributable transaction costs. In the case of trading portfolio assets and other financial instruments carried at fair value, transaction costs are immediately recognized in the income statement, except of value changes of financial instruments, which are recorded in the comprehensive income.

Determination of fair value

At initial recognition, the fair value of financial instruments is ascertained from quoted market prices provided that the financial instrument is traded on an active market (level 1). Whenever possible, the fair value of other financial instruments is determined using generally recognized valuation models (level 2). These models are based on input parameters other than level 1 that can be observed on the market. For a residue of financial instruments, there

are no available market listings or valuation models or methods based on market prices. For such instruments, in-house valuation methods or models are used (level 3). In such cases, the fairness of the valuation is assured by clearly defined methods and processes and by independent checks.

Financial investments at amortized costs

Investments whereby the objective is to hold financial assets to collect contractual cash flows and for which the contractually agreed cash flows comprise only interest and the repayment of parts of the nominal value are entered on the balance sheet as amortized costs using the effective interest method. Any expected credit losses are deducted from the book value of the item.

Financial assets and liabilities from financial assets

Financial instruments that do not meet the criteria for recognition at amortized cost are recognized at fair value. The resulting income is reported under the item «Income from financial investments». Liabilities from financial assets are reported under the item «Other financial liabilities».

Investments at fair value with fair value changes recognized in other comprehensive income

Investments in equity instruments that are not held for trading purposes are carried fair value in the balance sheet. Changes in value are recognized in the income statement except in cases where Bellevue Group has irrevocably decided to recognize them at fair value through other comprehensive income.

Derivative financial instruments

Derivative financial instruments are recognized in the balance sheet under «Financial assets» or «Other financial liabilities». No offsetting takes place on the basis of master netting agreements. Realized and unrealized gains and losses are recognized in «Income from financial investments».

14.5.4 Other principles

Treasury shares

Bellevue Group AG shares held by Bellevue Group are designated as treasury shares and are deducted from shareholders' equity at weighted average cost. Changes in fair value are not recognized. The difference between the sales proceeds of treasury shares and the corresponding acquisition cost is recorded in retained earnings.

Share-based payments

Bellevue Group maintains various share-based payment plans in the form of share plans for selected employees. When such payments are made to these employees, the fair value of these payments at grant date serves as the basis for calculating the personnel expenses. Share-based payments that are not subject to any further conditions are expensed immediately at grant date. Share-based payments that are subject to the completion of a service period or to other vesting conditions are expensed over the respective vesting period starting at grant date. The amount recognized as an expense is adjusted to reflect the number of share awards for which the related services and non-market performance vesting conditions are expected to be met.

Property and equipment

Property and equipment include leasehold improvements, information technology and telecommunications equipment, capitalized right of use from leases and other fixed assets. The acquisition or production costs of property and equipment are capitalized when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Bellevue Group mainly acts as a lessee in the context of the leasing of business premises. At the lease commencement date, a lease liability corresponding to the present value of lease payments over the lease term is recognized. The lease term basically corresponds to the non-cancellable period during which Bellevue Group has the right to use the business premises but it also takes account of the period covered by an option to extend the lease if Bellevue Group is reasonably certain to exercise that option, and the period covered by an option to terminate the lease if Bellevue Group is reasonably certain not to exercise that option.

At the same time as the lease liability is recognized, a right to use the underlying asset, which corresponds to the lease liability plus prepaid lease payments, directly attributable costs and any reinstatement obligations, is capitalized. After initial recognition, the interest component on the lease liability is accrued in the period in which it is incurred using the effective interest method and is recognized in «Net other income». The lease liability is adjusted to reflect interest recognized and lease payments made. The right-of-use asset is depreciated on a straight-line basis over the lease term. The depreciation charge and any impairment charge are recognized in the income statement in «Depreciation and amortization».

If there is any change to the lease term or if lease payments are adjusted to an index, the lease liability is remeasured. In the first case, the current incremental borrowing rate is used to calculate the present value; in the second case, the original incremental borrowing rate is used. The amount of the remeasurement of the lease liability is recognized as an adjustment to the right-of-use asset. Right-of-use assets are recognized in the balance sheet item «Property and equipment». The carrying amount of the right-of-use assets and changes in that value are shown in note 3.5. Lease liabilities related to leased office space are recognized in the balance sheet item «Lease liabilities». Bellevue Group applies the accounting exceptions for short-term leases and leased assets of low value. Neither a lease liability nor a right-of-use asset is recognized for these leases.

Property and equipment are depreciated on a straight-line basis over their estimated useful life as follows:

Leasehold improvements	max. 10 years
Information technology and communications equipment	max. 5 years
Rights of use	over leasing contract duration
Other fixed assets	max. 5 years

Property and equipment are reviewed for impairment if events or circumstances indicate that the carrying amount may be impaired. If the carrying amount exceeds the realizable amount, an impairment loss is charged. Any reversals of impairments at a later date will be recognized in the income statement.

Goodwill and other intangible assets

Goodwill arises from the acquisition of subsidiaries and represents the future economic benefits from other assets acquired in a business combination that are not individually identified and are recognized separately. For the purposes of impairment testing, goodwill acquired in a business combination is allocated to each of the CGUs (cash-generating unit) or group's of CGUs, that is expected to benefit for synergies from combination. Each unit or group of units to which goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the level of the CGU respectively group of CGUs, taking into account the internal reporting and management structure. Goodwill is capitalized and tested for impairment at least on an annual basis, or if events or changed circumstances indicate a potential impairment. The test is carried out more frequently to determine whether the book value exceeds its recoverable

amount. The recoverable amount is the higher of fair value less costs to sell and the value in use. If the book value exceeds the recoverable amount an impairment loss is recorded.

Other intangible assets include client relationships and brands acquired during business combination as well as softwares. Such intangible assets are capitalized if their fair value can be reliably determined. They are amortized on a straight-line basis over their useful life of not more than 5 years (software), 10 to 15 years (client relationships) or 5 years (brands). Other intangible assets are reviewed for impairment if events or circumstances indicate that the carrying amount may not be recoverable. If the carrying amount exceeds the realizable amount, an impairment loss is charged. Any reversals of impairments at later date will be recognized in the income statement. At present, there are no other intangible assets with an indefinite useful life capitalized in Bellevue Group's balance sheet.

Income taxes

The current income tax charge is calculated on the basis of the applicable tax laws enacted or substantially enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income and recognized as expense in the period in which the related profits are made. Receivables or liabilities related to current income taxes are reported in the balance sheet in the items «Current tax assets» or «Current tax liabilities». Tax effects arising from temporary differences between the carrying amounts of assets and liabilities in the balance sheet and their corresponding tax values are recognized as «Deferred tax assets» and «Deferred tax liabilities» respectively. Deferred tax assets arising from temporary differences and from tax loss carry forwards can be offset. Deferred tax assets and deferred tax liabilities are calculated at the tax rates expected to apply in the period in which the tax assets will be realized, or the tax liabilities settled. Tax receivables and tax liabilities are offset when they refer to the same taxable entity, fall under the same jurisdiction, and the enforceable rights to offset exists.

Current and deferred taxes are credited or charged directly to shareholders' equity if the taxes are related to items that are credited or charged under other comprehensive income in the same or a different period.

Provisions

A provision is recognized if Bellevue Group has, as a result of a past event, a current liability at the balance sheet date that will probably lead to an outflow of funds and whose amount can be reliably estimated. If an outflow of funds is unlikely to occur, or the amount of the liability cannot be reliably estimated, a contingent liability is shown. If there is, as a result of a past event, a possible liability as at the balance sheet date whose existence depends on future developments that are not fully under Bellevue Group's control, a contingent liability is likewise shown. The recognition and reversal of provisions are recognized under «Valuation adjustments and provisions» except for changes in actuarial pension provisions, which are recognized under «Other comprehensive income», with the exception of changes in actuarial provisions which are recorded in the income statement.

Pension funds

Bellevue Group maintains in Switzerland a defined-contribution pension plan. The pension fund is set up in accordance with Swiss defined-contribution regulations, but does not meet all of the criteria of a defined-contribution plan as defined by IAS 19. Therefore, this plan is treated as a defined-benefit plan.

Pension obligations are met exclusively with pension fund assets held by a pension foundation legally separated from and independent of Bellevue Group. It is managed by a Board of Trustees, consisting in equal parts of representatives of management and employees. The organization, operational management and financing of the pension fund are conducted in accordance with legal regulations, the foundation's charter and applicable pension fund regulations. Employees and pensioners, or their survivors, receive legally

determined benefits upon leaving the Company, during retirement, at death, and in the event of invalidity. These benefits are financed by employee's and employer's contributions.

For defined-benefit plans, pension costs are determined on the basis of different economic and demographic assumptions using the projected unit credit method. This method uses the number of service years until the key date. The assumptions to be evaluated by the Group include expectations of future salary development, long-term interest on retirement assets, retirement trends and life expectancy. The valuations are carried out by independent actuaries every year. The pension assets are valued annually at fair value.

Pension cost is composed of three components:

- Service cost, which is recorded as personnel expenses in the income statement;
- Net interest expenses, which are recorded in the position «Other financial income» in the income statement; and
- Revaluation components, which are recognized in the statement of comprehensive income.

Service cost encompasses the current service cost, past service cost, and gains and losses from non-routine plan settlements. Gains and losses from plan curtailments are treated the same way as past service cost. Employee contributions and third-party contributions reduce the service cost and are deducted from it, provided they are required by the benefit regulations or are the result of a factual obligation.

Net interest expenses are the result of the assumed interest rate multiplied by the pension obligations or the pension assets. Capital flows and changes of less than a year are included on a weighted basis.

Revaluation components include actuarial gains and losses from changes in the net present value of the pension obligations and the pension assets. Actuarial gains and losses are calculated on the basis of changes in assumptions and experience adjustments. Gains and losses on assets are the result of income on assets less the amounts contained in net interest expenses. The revaluation component also includes changes in unrecognized assets less effects included in net interest expenses. Revaluation components are recorded in the statement of comprehensive income and cannot be recycled. Amounts recorded in the statement of comprehensive income can be reallocated within equity.

Pension obligations or assets recorded in the consolidated financial statements correspond to the funding surplus or shortfall of the defined-benefit plans. However, pension assets are restricted to the net present value of the Group's economic benefit from future curtailments or repayments. Pension obligations in Swiss benefit plans are currently valued on the basis of employers and employees sharing the risk.

Report of the statutory auditor to the General Meeting of Bellevue Group AG Küsnacht

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Bellevue Group AG and its subsidiaries (the Group), which comprise the consolidated balance sheet as at 31 December 2023, and the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of shareholders' equity, the consolidated cash flow statement for the year then ended, and notes to the consolidated financial statements, including material accounting policies.

In our opinion, the accompanying consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2023 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards and comply with Swiss law.

Basis for opinion

We conducted our audit in accordance with Swiss law, International Standards on Auditing (ISAs) and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the 'Auditor's responsibilities for the audit of the consolidated financial statements' section of our report. We are independent of the Group in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, as well as the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach

Overview

Overall Group materiality: CHF 818 000

We concluded full scope audit work at Bellevue Group AG and three group entities in three countries. For additional two group entities (one domiciled in Switzerland and one domiciled abroad), we have performed specified audit procedures in relation to one or more account balances and types of business transactions.

In addition, analytical procedures were conducted at a further six group entities in four countries. We assess the coverage of the balance sheet total and the net sales of the group as sufficient

As key audit matter the following area of focus has been identified:

Impairment of goodwill and other intangible assets

Materiality

The scope of our audit was influenced by our application of materiality. Our audit opinion aims to provide reasonable assurance that the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall Group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

Overall Group materiality

CHF 818 000

Benchmark applied

Income

Rationale for the materiality benchmark applied

We chose the income as the benchmark because in our view, the income represents a generally recognized benchmark for materiality considerations for asset managers and accordingly depicts the economic and operational performance of the Group without the influence of volatile value adjustments.

We agreed with the Audit & Risk Committee that we would report to them misstatements above CHF 40 500 identified during our audit as well as any misstatements below that amount which, in our view, warranted reporting for qualitative reasons.

Audit scope

We designed our audit by determining materiality and assessing the risks of material misstatement in the consolidated financial statements. In particular, we considered where subjective judgements were made; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Impairment of goodwill and other intangible assets

Key audit matter

Goodwill in the amount of CHF 40.3 million and other intangible assets in the amount of CHF 2.8 million have been recognized in the financial statements under «Goodwill and other intangible assets».

Bellevue Group AG uses the discounted cash flow method in order to test goodwill and other intangible assets for impairment. The valuation is calculated based on the expected future cash flows to the investor.

We consider the assessment of the impairment of goodwill and other intangible assets as a key audit matter because the Board of Directors has to apply judgement in setting the assumptions relating to future business results and the discount rate to be applied on the fore-casted cash flows; significant estimation uncertainty exists and material impairments have been recognized in past financial years.

Please refer to note [4.1](#) Estimates, assumptions and the exercise of discretion by management and note [3.6](#) Goodwill and other intangible assets as well as note [14.5](#) important accounting principles.

How our audit addressed the key audit matter

We have analyzed and assessed the assumptions applied by the Board of Directors to the valuation of the goodwill and other intangible assets in the consolidated financial statements of Bellevue Group AG.

Management adheres to a documented process in forecasting cash flows. The Board of Directors monitored this process and regularly challenged the assumptions that were used. We assessed the appropriateness and proper application of the valuation method used to determine the value of the goodwill and other intangible assets.

We compared the business results of the year under review with the year's budgeted results, in order to retrospectively assess the accuracy of assumptions used in the forecasting of the cash flows.

We compared Management's assumptions concerning revenue growth and long-term growth rates with economic and industry-specific developments.

We compared the discount rate with the cost of capital of the Group and of comparable enterprises, taking into account country-specific particularities.

We assess the process of the impairment assessment and the determination of impairment applied by the Board of Directors as appropriate. The process ensured an analysis of the valuation factors and represented an appropriate and sufficient basis for the assessment of the recoverability of the goodwill and other intangible assets.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements, the consolidated financial statements, the remuneration report and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the consolidated financial statements

The Board of Directors is responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with IFRS Accounting Standards and the provisions of Swiss law, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law, ISAs and SA-CH will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Swiss law, ISAs and SA-CH, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them regarding all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In accordance with article 728a para. 1 item 3 CO and PS-CH 890, we confirm the existence of an internal control system that has been designed, pursuant to the instructions of the Board of Directors, for the preparation of the consolidated financial statements.

We recommend that the consolidated financial statements submitted to you be approved.

Notes to the financial statements

1 Accounting Principles

General approach

The annual financial statements of Bellevue Group AG were prepared in accordance with the guidelines of the Swiss Code of Obligations. Balance sheet items are valued at historical costs.

Cash and cash equivalents, receivables and liabilities

Assets are recognized at acquisition costs and liabilities are recognized at their nominal value. Specific valuation adjustments are made for identifiable risks of loan losses.

Participations

Participations are recognized at acquisition costs less impairments necessary for commercial reasons.

Accruals and deferrals

Accruals and deferrals are expenditures of the current financial year, which are recognized as expenses in the subsequent financial year as well as revenues of the current financial year, which are recognized as income in the subsequent financial year.

Treasury shares

Treasury shares are recognized at acquisition cost and deducted from shareholders' equity at the time of acquisition. In case of a resale, the gain or loss is recognized through the income statement as profit or loss. For treasury shares held by subsidiaries, a reserve for treasury shares is booked to the value of the acquisition price.

Waiver of cash flow statement, management report and additional disclosures in the notes

As Bellevue Group AG has prepared its consolidated financial statements in accordance with a recognized accounting standard (IFRS), it has decided to waive the disclosure of additional information on interest-bearing liabilities and audit fees in the notes, the management report as well as the cash flow statement in accordance with the law.

2 Notes to the financial statements

Cash and cash equivalent

CHF 1 000	31.12.2023	31.12.2022
Due from banks	450	1 239
Total	450	1 239

Other short-term receivables

CHF 1 000	31.12.2023	31.12.2022
Due from group companies	5 712	3 500
Due from third parties	7	22
Total	5 719	3 522

Other short-term receivables from group companies include short-term loans and bore interest of 1.5% in the financial year (2022: 0.25%). The recorded interest is shown in the position «Finance income».

Participations

Balance carried forward to new financial year	82 660	71 650

¹⁾ Including treasury shares possibly held directly by Bellevue Group AG.

Upon approval of this proposal, the dividend of CHF 1.15 per registered share of CHF 0.10 will be paid less the federal withholding tax of 35%.

Report of the statutory auditor to the General Meeting of Bellevue Group AG Küssnacht

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Bellevue Group AG (the Company), which comprise the balance sheet as at 31 December 2023, and the profit and loss account for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements comply with Swiss law and the Company's articles of incorporation.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the 'Auditor's responsibilities for the audit of the financial statements' section of our report. We are independent of the Company in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach Overview

Overall materiality: CHF 818 000

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which the Company operates.

As key audit matter the following area of focus has been identified:

Impairment of participations

Materiality

The scope of our audit was influenced by our application of materiality. Our audit opinion aims to provide reasonable assurance that the financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the financial statements as a whole.

Overall materiality

CHF 818 000

Benchmark applied

Equity

Rationale for the materiality benchmark applied

We chose equity as the benchmark because the company considered for itself is conducting limited operational activities and, in our view, the equity is a generally accepted benchmark for holding companies.

We agreed with the Audit & Risk Committee that we would report to them misstatements above CHF 40 500 identified during our audit as well as any misstatements below that amount which, in our view, warranted reporting for qualitative reasons.

Audit scope

We designed our audit by determining materiality and assessing the risks of material misstatement in the financial statements. In particular, we considered where subjective judgements were made; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Impairment of participations

Key audit matter

The shares of the capital of subsidiaries held by the Company are recognized in the financial statements under 'Participations' (TCHF 109 279).

Participations are recognized at acquisition cost less any economically necessary impairments. Bellevue Group AG uses the discounted cash flow method for selected subsidiaries in order to test whether any impairments are necessary. For other subsidiaries, the net asset value method respectively the net realizable-value method is used for the impairment assessment. The valuation is calculated based on the expected future cash flows to the investor respectively by comparing the book value of the participation to the equity of the respective subsidiary. For participations that are already managed and assessed internally as an economic business unit, the impairment of the participations is tested at the level of the economic business unit.

We consider the assessment of the impairment of participations as a key audit matter because the Board of Directors has to apply judgement in setting the assumptions relating to future business results and the discount rate to be applied on the forecasted cash flows; significant estimation uncertainty exists and moreover, participations represent a significant amount on the balance sheet (95% of total assets).

We refer to [note 1](#) (Accounting principles) and [note 2](#) (Notes to the financial statements).

How our audit addressed the key audit matter

We have analysed and assessed the assumptions applied by the Board of Directors to the valuation of the participations in the financial statements of Bellevue Group AG.

Management adheres to a documented process in forecasting cash flows. The Board of Directors monitors this process and regularly challenges the assumptions that are used. We assessed the appropriateness and proper application of the valuation method used to determine the value of the participations.

We compared the business results of the year under review with the year's budgeted results, in order to retrospectively assess the accuracy of assumptions used in the forecasting of the cash flows.

We compared Management's assumptions concerning revenue growth and long-term growth rates with economic and industry-specific developments.

We compared the discount rate with the cost of capital of the company and of comparable enterprises, taking into account country-specific particularities.

In respect of the analysis of the net asset value, we compared the book value of the participations recorded in the balance sheet with the proportionate equity of the subsidiaries.

Further, we assessed whether the subsidiaries had prepared their financial statements based on the assumption of continuing as going concern and whether this was appropriate.

We assess the process of the examination of recoverability and determination of value adjustments of participations as appropriate.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements, the consolidated financial statements, the remuneration report and our auditor's reports thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the financial statements

The Board of Directors is responsible for the preparation of financial statements in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them regarding all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

In accordance with article 728a para. 1 item 3 CO and PS-CH 890, we confirm the existence of an internal control system that has been designed, pursuant to the instructions of the Board of Directors, for the preparation of the financial statements.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Company's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Information relating to Corporate Governance

Bellevue Group views good corporate governance as a challenge that must be met and an essential precondition for achieving strategic company goals and for creating sustainable value for the Company's shareholder and all other stakeholders. Bellevue Group is committed to open and consistent information policies and procedures.

As a listed company, Bellevue Group reports annually on matters relating to corporate governance in accordance with the Directive on Information relating to Corporate Governance (DCG). A Remuneration Report that is audited by independent auditors provides information on compensation paid to the members of the Board of Directors and the Group Executive Board. The four-member Board of Directors is international and interdisciplinary in its composition and has profound knowledge in various subjects.

A clearly defined, balanced separation of roles and responsibilities between the Board of Directors and the Group Executive Board is an important element of corporate governance. All country-specific legal requirements are adhered to.

Law and regulations

Bellevue Group is subject to Swiss law, in particular to stock corporation and stock exchange law, the regulations of the Swiss stock exchange (SIX Swiss Exchange).

The Swiss stock exchange SIX Swiss Exchange Ltd has published a Directive on Information Relating to Corporate Governance for the first time with effect from July 1, 2002. The following information complies with the requirements of this directive (in the current version dated June 29, 2022) taking into account the SIX commentary last updated as of January 1, 2023, including the requirements imposed by reference to the Swiss Code of Obligations (CO). If the information required by the directive is disclosed in the notes to the financial statements, reference is made to the corresponding note in the notes.

Group structure and shareholders

Corporate structure as of December 31, 2023

Source: Bellevue Group, as of December 31, 2023

Scope of consolidation

Bellevue Group AG is the only listed company within the Group. The investment companies we manage, BB Biotech AG and Bellevue Healthcare Trust, are independent companies listed on their respective stock exchanges. The companies consolidated by Bellevue Group are listed, together with information regarding their domicile and share capital and the interest held by the Group, in the notes to the consolidated financial statements, note 6 «Major subsidiaries».

Major shareholders

Based on the notifications received and published by Bellevue Group AG, the following parties hold significant voting rights:

Shareholder or beneficial owner	31.12.2023 Voting rights held	31.12.2023 Number of shares held	31.12.2022 Voting rights held	31.12.2022 Number of shares held
Martin Bisang, Küssnacht	20.43%	2 750 000	20.43%	2 750 000
Hansjörg Wyss, Cambridge MA (USA)	9.66%	1 300 000	9.66%	1 300 000
Jürg und Manuela Schächli, Rapperswil-Jona	9.05%	1 217 799	9.05%	1 217 799

The shareholders Martin Bisang (Küssnacht), as well as Jürg und Manuela Schächli (Rapperswil-Jona) signed a shareholder agreement on October 25, 2018. Martin Bisang will represent the Group and controls 29.48% of the voting rights by December 31, 2023 (December 31, 2022: 29.48%).

Disclosure notifications are retrievable from the SIX Swiss Exchange website at: <https://www.ser-ag.com/en/resources/notifications-market-participants/significant-shareholders.html#/>

Cross-shareholdings

There are no cross-shareholdings between Bellevue Group AG or its subsidiaries and other corporations.

Capital structure

Capital

The share capital of Bellevue Group AG amounts to CHF 1 346 143 and is divided into 13 461 428 registered, fully paid-in unit shares with a par value of CHF 0.10. The registered shares of Bellevue Group AG (Valor 2 842 210, ISIN CH0028422100) are listed on the SIX Swiss Exchange. The market capitalization as of December 31, 2023, was CHF 330 mn.

Bellevue Group AG does not have any participation certificates or non-voting equity certificates outstanding nor has it issued any.

Conditional and authorized capital as well as capital band in particular

As at 31 December 2023, there was neither conditional nor authorized capital nor a capital band. For prior-year figures, please refer to the disclosures on conditional and authorized capital in the Notes to the Consolidated Financial Statements, «[Share capital](#)».

Capital changes

Information on the composition of capital, changes in capital over the last two years, and conditional and authorized capital is provided in the [statement of changes in equity](#) and in the notes to the consolidated financial statements, «[Share capital](#)». For information dating back further, please refer to the Annual Report 2022 ([statement of change in equity and note to the consolidated financial statements](#), note 3.9 «Share capital»).

Restriction of the transferability and nominee registrations

The restrictions on transfer and the rules concerning nominee registrations are governed by Art. 5 of the [Articles of Association](#). The relevant provisions of the [Articles of Association](#) may be amended by the General Meetings of Shareholders with the quorum pursuant to Art. 11 of the [Articles of Association](#) or with a higher legal quorum, if any.

Board of Directors

The Board of Directors of Bellevue Group AG consists of the following persons as per December 31, 2023:

Name	Function	Nationality	Member of Board Committee ¹⁾	First elected	Elected until
Veit de Maddalena	Chairman	CH	CC	2018	2024
Prof. Dr. Urs Schenker	Member	CH	ARC ²⁾	2019	2024
Katrin Wehr-Seiter	Member	DE	ARC/CC ³⁾	2019	2024
Barbara Angehrn Pavik	Member	CH	ARC/CC	2023	2024

¹⁾ Further information on the committees is given below under «[Internal organization](#)».

²⁾ Chair Audit & Risk Committee.

³⁾ Chair Compensation Committee.

No member of the Board of Directors of Bellevue Group AG had any operational management responsibilities for the company or a subsidiary in 2023 or in the three preceding financial years, nor do they maintain any significant business relationships with the company or a subsidiary.

CHAIRMAN OF THE BOARD

Veit de Maddalena (born 1967)

Veit de Maddalena is lic. rer. pol. (Economics) from the University of Berne and holds an MSc/ Master in Finance from the London Business School. He has many years of leadership experience in the financial industry and is now exclusively active as an independent director on the boards of several family-owned companies. He was elected to the Board of Directors of Bellevue Group in 2018 and has served as its chairman since 2019. Earlier in his career Veit de Maddalena was a Global Partner and Executive Board member with Rothschild & Co Group, where he was responsible for its global private banking business. He concurrently acted as CEO of Rothschild & Co Bank AG, Switzerland. He began his professional career at Credit Suisse.

MEMBER OF THE BOARD**Prof. Dr. Urs Schenker (born 1957)**

Urs Schenker holds a doctorate in law from the University of Zurich (Dr. iur.) and Harvard (LLM). He is a titular professor at the University of St. Gallen and an attorney at Walder Wyss in Zurich, where he specializes in corporate, finance and capital markets law. Prior to that he worked for approx. 20 years as a lawyer (14 years as a partner) for Baker & McKenzie in Zurich. Urs Schenker has been a member of the Board of Directors of Bellevue Group since 2019.

**MEMBER OF THE BOARD****Katrin Wehr-Seiter (born 1970)**

Katrin Wehr-Seiter holds a degree in engineering from the Technical University of Chemnitz/DE as well as an MBA from INSEAD Business School, Fontainebleau/FR. Katrin Wehr-Seiter is Partner and Managing Director of BIP Capital Partners and BIP Investment Partners SA, Luxembourg. Previously, she was a Principal at the international private equity firm Permira and worked as an independent advisor for medium-sized companies and as a Senior Advisor for the financial investor Bridgepoint. She started her professional career at Siemens AG. Since 2019, she has been a member of the Board of Directors of Bellevue Group.

MEMBER OF THE BOARD

Barbara Angehrn Pavik (born 1974)

Barbara Angehrn Pavik holds a Master's degree in economics from the University of St. Gallen. She has worked in the international healthcare industry for over 20 years in various management positions, currently as CEO of Asceneuron SA, Lausanne. Prior to that, she held management positions at Vifor Pharma Group, Stepstone Pharma, Exelixis Pharmaceuticals International, Onyx Pharmaceuticals International and Amgen International, among others. Since 2023, she has been a member of the Board of Directors of Bellevue Group.

Dr. Daniel H. Sigg was not available for re-election at the 2023 Annual General Meeting and therefore stepped down from the Board of Directors on March 21, 2023.

The other mandates of the members of the Board of Directors are shown in the [Compensation Report](#).

Election procedures

All members of the Board are elected individually by the general meeting of shareholders. The Board of Directors constitutes itself. The members of the Board of Directors are elected to a term of one year and may be reelected. There is no restriction in the number of reelections.

Statutory rules in relation to the number of permissible activities of the Board of Directors pursuant to Art. 62 (2)(1) CO

Pursuant to Article 30 of the [Articles of Association](#), the members of the Board of Directors may each execute a maximum of 20 activities, of which a maximum of five in listed companies. Excluded from this are activities in legal entities controlled by the company or which control the company. Also excluded from the restrictions are activities in foundations, charitable institutions and employee pension funds; however, these are restricted to a maximum of ten such activities.

According to Art. 30 of the [Articles of Association](#), the term «activity» within the meaning of this provision refers to membership in the highest management and administrative bodies of other companies with a commercial purpose. Several activities in legal entities which are under unitary control or under the control of the same beneficial owner are considered to be one activity.

Internal organization

The Board of Directors meets as often as necessary to perform its duties but at least once per quarter. The Board of Directors constitutes a quorum when an absolute majority of its members is present. Board resolutions and elections are decided in accordance with the internal rules and regulations by an absolute majority of the votes cast. In the event of a tie vote, the Chairman has the casting vote. Decisions by way of circular letter need to be passed by majority of all members of the Board of Directors. The Board of Directors carries out an annual self-assessment of its work and that of its committees.

The following table provides an overview of the meetings, conference calls and circular resolutions of the Board of Directors in 2023:

	Meetings	Video calls	Circular resolutions
Total	4	7	3
Average duration (in hours)	3:58	0:46	–
Participation:			
Veit de Maddalena, Chairman	4	7	–
Prof. Dr. Urs Schenker	4	7	–
Katrin Wehr-Seiter	4	7	–
Barbara Angehrn Pavik ¹⁾	3	5	–
Dr. Daniel H. Sigg ²⁾	1	1	–

¹⁾ Barbara Angehrn Pavik was elected to the Board of Directors by the 2023 Annual General Meeting.

²⁾ Dr. Daniel H. Sigg stepped down from the Board of Directors on March 21, 2023.

The Board of Directors can delegate some of its duties to committees. The standing committees are as follows: Compensation Committee (CC) and Audit & Risk Committee (ARC).

Compensation Committee (CC)

The CC assists the Board of Directors in the definition and implementation of the compensation principles. It is the applicant in regards of the compensation policy for the Board of Directors and the Executive Board. Furthermore, it is responsible for the employment conditions for senior executives and for the shares and profit sharing plans. It takes position on all compensation related affairs, which are situated in the decision making authority of the Board of Directors. The Compensation Committee meets as often as business requires, at least every six months.

The following table provides an overview of the meetings, conference calls and circular resolutions of the Compensation Committee in 2023.

	Meetings	Video calls	Circular resolutions
Total	5	–	–
Average duration (in hours)	1:43	–	–
Participation:			
Katrin Wehr-Seiter, Chairwoman	5	–	–
Veit de Maddalena	5	–	–
Barbara Angehrn Pavik ¹⁾	3	–	–
Prof. Dr. Urs Schenker ²⁾	2	–	–

¹⁾ Barbara Angehrn Pavik was elected to the Compensation Committee by the 2023 Annual General Meeting.

²⁾ Prof. Dr. Urs Schenker stepped down from the Compensation Committee on March 21, 2023.

Audit & Risk Committee (ARC)

The ARC examines whether all systems created to monitor compliance with legal and statutory provisions are appropriate and whether they are being applied properly. It reports to the Board of Directors and makes recommendations to the same.

The ARC also monitors and evaluates the integrity of the financial reports, internal controls, the effectiveness of the external auditor and the Internal Audit as well as risk management and compliance, taking into consideration the risk profile of Bellevue Group. It guides and monitors the activities of the Internal Audit, maintains Board level contact with the external auditors and monitors their performance and independence as well as their collaboration with the Internal Audit.

All members of the ARC are independent. The ARC meets at least once a quarter.

The following table provides an overview of the meetings, conference calls and circular resolutions of the Audit & Risk Committee in 2023.

	Meetings	Video calls	Circular resolutions
Total	4	1	–
Average duration (in hours)	1:25	0:15	–
Participation:			
Prof. Dr. Urs Schenker, Chairman ¹⁾	4	1	–
Katrin Wehr-Seiter	4	1	–
Barbara Angehrn Pavik ²⁾	3	1	–
Dr. Daniel H. Sigg ³⁾	1	–	–

¹⁾ Prof. Dr. Urs Schenker was appointed as Chairman of the Audit & Risk Committee with effect from March 21, 2023.

²⁾ Barbara Angehrn Pavik was appointed as Member of the Audit & Risk Committee with effect from March 21, 2023.

³⁾ Dr. Daniel H. Sigg stepped down as Chairman of the Audit & Risk Committee with effect from March 21, 2023.

Internal Audit

PEQ GmbH has been assigned the function of Internal Audit by the Board of Directors since the 2008 fiscal year. The Internal Audit helps the Board of Directors to exercise its statutory supervisory duties within Bellevue Group and it performs the audit functions assigned to it. It has an unlimited right of inspection within all Group companies and may inspect any and all business documents at any time. The Internal Audit coordinates its activities with the external auditors and reports directly to the Chairman of the Board of Directors.

Definition of powers of authorization

Board of Directors

The Board of Directors is responsible for the ultimate direction of the company and the supervision and oversight of Bellevue Group. It passes and periodically revises Company strategy, issues directives and guidelines as necessary and determines Bellevue Group's organizational structure and risk policies. It also receives reports about the existence, appropriateness and effectiveness of the internal control system. It supervises and monitors persons entrusted with executive management duties. The Board of Directors is responsible for appointing and dismissing the CEO. It approves the appointment, promotion, and dismissal of Bellevue Group's senior management. Furthermore, it performs the duties assigned to it by law (Art. 716a CO). The delegation of powers between the Board of Directors, its committees, the CEO and the Group Executive Board is specified in Bellevue Group's regulations. The competencies of the Board of Directors include the purchase and disposal of shareholdings, the establishment of group subsidiaries and regional offices, securing loans, issuing bonds as well as granting credit above certain limits. Investment plans and other decisions having an impact on cash flows must likewise be approved by the Board of Directors above a certain threshold.

Group Executive Board

The Group Executive Board is Bellevue Group's executive body and reports to the Board of Directors. It is responsible for all Group issues that do not expressly fall within the remit of the Board of Directors of Bellevue Group AG or of a Group company according to legislation, the Articles of Association or the internal rules and regulations. It functions as a committee and all decisions have to be reached by the entire body. It is responsible, in particular, for developing a Group-wide business strategy for presentation to the Board of Directors, implementing the decisions reached by the Board of Directors within the Group, monitoring the execution of these decisions, and managing and supervising Bellevue Group's everyday operations, which must be effected within the scope of the financial plan, annual objectives, annual budget and risk policy and in accordance with the other regulations and instructions issued by the Board of Directors. It is responsible for ensuring compliance with legal and regulatory requirements as well as applicable industry standards.

Its responsibilities also include drawing up and application of the annual budget and defining annual targets for Bellevue Group. The Group Executive Board is responsible for issuing rules and regulations relating to the implementation of the risk policy, i.e. governing the basic aspects of risk responsibility, risk management and risk control. It reports to the Board of Directors and the ARC about the existence, appropriateness and effectiveness of the internal controls and issues corresponding directives as necessary. It is responsible for issuing directives regarding compliance. Its competencies include granting loans in accordance with the powers of authorization defined in the internal rules and regulations as well as entering proprietary trading positions within the defined limits. The Group Executive Board can delegate the permissible limits to the competent divisions and units within Bellevue Group.

Information and control instruments relating to the Group Executive Board

The Board of Directors meets at least four times a year as specified in the [internal rules and regulations](#). The ordinary meetings usually last half a day. The members of the Group Executive Board attend these meetings. The Board of Directors receives monthly reports about the course of business and is periodically informed about risk exposure developments as well as the adherence to legal, regulatory and internal rules and regulations. Its control instruments include the semi-annual reporting requirements, the annual budget process, the external audits and, in particular, the internal audit, which reports directly to the Chairman of the Board of Directors (see also [Internal organization](#)).

During the meetings of the Board of Directors, every director can request other board members or the CEO to provide them with information about any matters relating to Bellevue Group. In the interim between meetings every Board member can request information about the course of business from the CEO and can also, upon approval by the Board Chairman, receive information about specific business transactions and inspect business documents.

Group Executive Board

The Group Executive Board comprised the following persons as at December 31, 2023:

Name	Function	Nationality
André Rüegg	CEO Bellevue Group AG CEO Bellevue Asset Management AG	CH
Michael Hutter	CFO Bellevue Group AG	CH

André Rüegg will leave the Group on January 1, 2024, and Michael Hutter on February 29, 2024. They will be replaced by Gebhard Giselsbrecht (January 1, 2024, CEO) and Stefano Montalbano (March 1, 2024, CFO). Markus Peter (Head Products & Investments) and Patrick Fischli (Head Distribution) will also join the Group Executive Board from March 1, 2024.

Additional information on the members of the Group Executive Board:

CEO BELLEVUE GROUP

André Rüegg

André Rüegg holds an MBA from the Universities of Zurich and Columbia New York/USA and attended various Leadership-, Executive and Senior-Executive Programs at IMD Lausanne. He has held senior positions in asset management since 1995. He built up global distribution at Julius Bär and led the unit for more than a decade, also as a member of the extended Executive Board. In 2009, he joined Bellevue Asset Management and was instrumental in driving its strategic repositioning. Since 2012, he has been responsible for its business as CEO. Since 2016 he has been CEO of Bellevue Group.

CFO BELLEVUE GROUP

Michael Hutter

Michael Hutter is a certified public accountant and Business Economist HWV. He has held the position of CFO, COO and CRO at Bellevue Asset Management and its investment companies since 2008. Since 2020, he has been CFO of Bellevue Group. Prior to that, he worked for ten years as a senior manager in the audit division at PricewaterhouseCoopers.

Further mandates of the members of the Group Executive Board are shown in the compensation report.

Statutory rules in relation to the number of permissible activities of the Executive Board pursuant to Article 626(2)(1)

Pursuant to Art. 30 of the [Articles of Association](#), subject to prior approval of the Board of Directors or the Compensation and Nomination Committee, the members of the Executive Board may each execute a maximum of ten activities, of which a maximum of two in listed companies. Excluded from this are activities in legal entities controlled by the company or which control the company. Also excluded from the restrictions are activities in foundations, charitable institutions and employee pension funds; however, these are restricted to a maximum of ten such activities.

According to Art. 30 of the [Articles of Association](#), the term «activity» within the meaning of this provision refers to membership in the highest management and administrative bodies of other companies with a commercial purpose. Several activities in legal entities which are under unitary control or under the control of the same beneficial owner are considered to be one activity.

Compensations, shareholdings and loans

The information on compensation, shareholdings and loans can be found in the Remuneration Report ([Board of Directors](#), [Group Executive Board](#)).

Participatory rights of shareholders

Voting rights restrictions, shareholder representation and electronic participation

In relation to the Company, a person entered in the share register is considered to be a shareholder. The shareholder may represent his shares at the general meeting of shareholders himself, based on a written or electronic proxy (incl. issuance of instructions), by the independent proxy or electronically (including issuing instructions) by the independent proxy or, based on a written power of attorney, have another representative of his choice to represent them. The Board of Directors may specify or supplement the requirements in the invitation to the General Meeting or in general regulations or guidelines. The Board of Directors may also provide that shareholders who are not present on site can exercise their rights electronically or waive the requirement to specify a meeting venue and order a purely virtual Annual General Meeting to be held. The provisions pursuant to Art. 5 and 9 f. of the [Articles of Association](#) shall apply.

There are no restrictions on voting rights; each share entitles the holder to one vote (the rules on nominee registrations are governed by Art. 5 of the [Articles of Association](#) cf also the above remarks under «[Restriction on the Transferability and Nominee registrations](#)»).

Statutory quorums

There are no resolution quorums that are higher than provided for in the law.

Notice convening the general meeting of shareholders

The notice convening the general meeting of shareholders shall be in conformity with Article 9 of the [Articles of Association](#).

Placing items on the agenda

Shareholders who represent at least 0.5% of the share capital may request an item to be added to the agenda. The agenda must be sent in writing at least fifty days before the meeting, including a list of agenda items to be discussed and the shareholder's motions to be voted on.

No resolutions may be adopted regarding motions on agenda items which have not been properly announced. This does not include motions for convening an Extraordinary General Meeting, for the performance of a special investigation and for the election of an auditor at the request of a shareholder. Prior notice is not required for the submission of motions in relation to the agenda items or for deliberations not resulting in the adoption of resolutions.

Entry in the share register

In the invitation to the general meeting of shareholders, the Board of Directors announces the cut-off date of the entry in the share register that is decisive for the right to attend and vote. Normally, for administrative reasons, the share register is blocked eight to ten days before the General Meeting.

Change of control and defense measures

Mandatory public offer («opting out»)

Persons who purchase or acquire Bellevue Group AG shares are not required to issue a public offer as stipulated by Art. 135 FMIA («opting out» to Art. 125 FMIA).

Change of control clause

Members of the Board of Directors, executive Board members and employees of Bellevue Group are not contractually entitled to any severance payments. Employment contracts of Bellevue Group employees may be terminated within a maximum period of six months.

Transparency on non-financial matters

Bellevue Group is not obliged under Swiss law to report on non-financial matters. Nevertheless, as sustainability and social responsibility are key concerns of Bellevue Group, it reports these topics on a voluntary basis. The relevant information can be found in the [ESG report](#).

Statutory auditor

Duration of mandate and term of office of Lead auditor

The financial statements and the consolidated financial statements of Bellevue Group AG are audited by PricewaterhouseCoopers (PwC). In addition, most of the subsidiaries are also audited by PwC. As the responsible Group auditor, PwC ensures an appropriate and sufficient audit of the consolidated companies.

The group and statutory auditor of Bellevue Group AG is elected for a one-year period at the general meeting of shareholders. PwC was elected for the first time for the 1999 fiscal year. The auditor in charge is Philippe Bingert. He has exercised this function since the 2021 fiscal year. The rotation period for this function is seven years.

Fees paid to auditor

CHF 1 000	01.01.– 31.12.2023	01.01.– 31.12.2022
Auditing fees	426	421
- thereof PwC	380	376

In the business years 2023 and 2022 no additional fees were charged by the auditor.

If an auditor is considered for additional mandates, there is no prescribed catalogue of criteria that has to be consulted when approving these types of additional mandates. The Audit & Risk Committee (ARC) decides on an individual basis whether the issuing of an additional mandate would impact on the auditor's independence.

Instruments for supervising and monitoring the auditors

The Board of Directors is responsible for the supervision and control of the statutory auditor and the group auditor and it is supported in this function by the Audit & Risk Committee (ARC). The ARC receives and evaluates reports from representatives of the external auditors on a regular basis. It confers regularly with the head auditor about the effectiveness of the internal control systems taking into consideration Bellevue Group's risk profile. In addition, the ARC reviews the scope of the auditing work, the quality of the work performed and the independence of the external auditors. The external auditors have direct access to the ARC at all times. The external auditors usually attend meetings of the ARC twice a year. The external auditors attended three ARC meetings in the reporting year. The internal auditors usually attend all meetings of the ARC. In the reporting year, the internal auditors attended three meetings of the ARC.

Trading blackout periods

Bellevue Group has defined recurring trading blackout periods and may introduce additional trading blackout periods at any time.

During the semi-annual trading blackout periods, transactions in securities and/or related financial instruments of Bellevue Group are prohibited for the company, all employees and members of the Board of Directors of Bellevue Group as well as their related parties.

Exceptions to this rule are share allocations (no market transactions) to employees under «Long-Term Incentive Plans».

The trading blackout periods are communicated by «Legal & Compliance» to all persons involved.

The trading blackout periods begin at least 30 days before publication of the annual or interim financial statements and end on the day of publication of the financial results. The trading blackout periods are set out in Bellevue Group's Regulations on employee transactions.

The trading blackout periods start on December 24 for the annual financial statements and 30 days before publication for the interim financial statements.

Bellevue Group will generally implement special trading blackout periods when the Company is aware of material developments that have not yet been disclosed to the public. For example, the Company may institute a special trading blackout period in anticipation of the announcement of a preliminary earnings forecast or a significant transaction or business development. However, special trading blackout periods may be implemented for any reason.

Bellevue Group will notify those persons subject to a special trading blackout period. Any person so identified and notified by the Company shall not engage in any transactions in securities and/or related financial instruments of the Company unless otherwise instructed by «Legal & Compliance».

Information policy

As a company listed on the stock exchange, Bellevue Group AG pursues a consistent and transparent information policy in relation to its shareholders, clients and employees as well as to the financial community and the general public. Its regular reporting activities and venues comprise the publication of the annual and semi-annual reports and letters to shareholders as well as a media conference on the annual results and the general meeting of shareholders. When important events occur, the above-mentioned stakeholders will be concurrently informed by way of press releases.

Remuneration Report

Remuneration Report	111–133
1. Introduction	112
2. Compensation policy	112
3. Determination of compensations	113
4. Compensation system framework	115
5. Board of Directors: Compensation, loans and stock ownership	120
6. Group Executive Board: Compensation, loans and stock ownership	124
7. Compensation of the Board of Directors and Executive Board subject to approval at the Annual General Meeting in 2024	129
Report on the audit of the remuneration report	131

1. Introduction

The Remuneration Report provides an overview of Bellevue Group's compensation policy and stock ownership plans. It describes the method used to calculate compensation and provides detailed information on the compensation paid to the members of Board of Directors and the Group Executive Board in the 2023 financial year. The report presents the information shareholders need in order to make informed decisions regarding the votes on the compensation of the Board of Directors and the Group Executive Board at the Annual General Meeting 2024.

The content and scope of this Remuneration Report are based on Articles 734 et seq. of the Swiss Code of Obligations (CO), the Directive on Information Relating to Corporate Governance (DCG) issued by the SIX Swiss Exchange, as well as the Swiss Code of Best Practice for Corporate Governance.

2. Compensation policy

2.1 Basic principles

The following basic compensation principles apply throughout Bellevue Group:

- The methods used to determine compensation for the Board of Directors and the Group Executive Board and for all Company employees are transparent, understandable, fair and reasonable.
- All pay packages are well balanced and take into consideration the operational and strategic responsibilities of each individual role as well as individual performance levels and the demands placed on each individual.
- Compensation is commensurate with the position held and should reflect individual achievement of specific quantitative as well as qualitative goals as well as the operating results of Bellevue Group and the relevant Group companies.
- Pay packages should be appropriate and competitive compared to the compensation offered by companies operating in the same field and labor market, and they must be sound and sustainable irrespective of the current course of business.
- Variable compensation will be reduced or forfeited in the event of serious violations of internal or external rules, regulations or the law (incl. ESG/sustainability).

All governing bodies and individuals at Bellevue Group with the authority to make decisions concerning compensation policies and payouts must abide by and uphold these basic compensation principles.

2.2 Pay-for-performance principle

The compensation system for Bellevue Group employees is conceived to motivate employees at all operating units to do excellent work. It is a compensation model based on personal «ownership» and merit system principles. In setting fixed salaries, a restrained policy prevails from a business point of view. On the other hand, variable compensation is offered under an attractive ownership-oriented profit-sharing plan. This profit-sharing plan is tied directly to Bellevue Group's operating results. Moreover, part of this bonus is paid in the form of restricted stock awards and shares of in-house products («we eat our own cooking»). This system is conducive to a culture of high performance with a long-term horizon.

3. Determination of compensations

3.1 Articles of Association

As required by the CO, the principles of compensation for the members of the Board of Directors and the Group Executive Board is presented in the Company's current Articles of Association. They include the following provisions:

- Compensation paid to the Board of Directors that is subject to approval of shareholders at the Annual General Meeting (Art. 24)
- Compensation paid to the Group Executive Board that is subject to approval of shareholders at the Annual General Meeting (Art. 25)
- Basic principles of performance-based variable compensation (Art. 26)
- An additional amount of compensation for persons who are promoted or appointed to the Group Executive Board after the Annual General Meeting (Art. 27)
- Reimbursement of business expenses (Art. 28)
- Loans, credit lines and other benefits (Art. 29)

The provisions of the Articles of Association are formulated in general terms to give the Board of Directors the flexibility to adjust compensation levels, the compensation policy and employee stock ownership plans if and when necessary.

3.2 Compensation Committee

In accordance with the Company's Articles of Association and organizational regulations, the Compensation Committee supports the Board of Directors in the performance of its duties pertaining to compensation and personnel policy. These include:

- Formulation of compensation policy for the members of the Board of Directors and the Group Executive Board and presentation thereof to the Board of Directors for approval
- Monitoring of compliance with the compensation principles of Bellevue Group AG («the Company») and Bellevue Group and advising and informing the Board of Directors on all matters relating to compensation policy and issues
- Presenting proposals regarding the maximum aggregate fixed compensation for the Board of Directors and the Group Executive Board and the aggregate variable compensation for the Group Executive Board that will subsequently be submitted to the Annual General Meeting for approval
- Presenting proposals to the Board of Directors regarding the approval of individual compensation paid to members of the Board of Directors and the Group Executive Board, subject to and based on the aggregate compensation approved by the Annual General Meeting
- Presenting proposals to the Board of Directors regarding changes to the Articles of Association concerning compensation policy that will be subsequently submitted to the Annual General Meeting for approval
- Preparation of the Remuneration Report and presentation thereof to the Board of Directors for approval
- Formulating bonus guidelines for variable compensation elements in accordance with the provisions of the Articles of Association and presentation of the bonus guidelines to the Board of Directors for approval

Power and authority regarding compensation matters:

Decision on	CEO	CompC	BOD	AGM
Compensation policy and guidelines	–	Proposal	Approval	–
Maximum total compensation of the Board of Directors	–	Proposal	Review	Approval
Individual compensation of the members of the Board of Directors	–	Proposal	Approval	–
Maximum total compensation of the Group Executive Board	–	Proposal	Review	Approval
Individual compensation of the CEO	–	Proposal	Approval	–
Individual compensation of the other members of the Group Executive Board	Proposal	Review	Approval	–
Remuneration Report	–	Proposal	Approval	Consultative approval

The Compensation Committee holds at least four meetings a year and consists exclusively of independent, non-executive Board members who are elected to one-year terms by shareholders at the Annual General Meeting. Katrin Wehr-Seiter (chair), Veit de Maddalena and Barbara Angehrn Pavik have been elected at the Annual General Meeting 2023 as members of the Compensation Committee. All members were present at every meeting during the period under review. In principle, all Compensation Committee members, the CEO, the CFO and the head of Human Resources attend the meetings of the Compensation Committee – unless their own compensation is being discussed. The committee chair may invite other employees to attend the meetings if necessary.

3.3 Say-on-pay

In accordance with the requirements of the Articles of Association and the CO, the proposed compensation for the members of the Board of Directors and the Group Executive Committee is computed by Bellevue Group as an annual figure and submitted to a vote at the Annual General Meeting. If one or more compensation proposals are rejected at the Annual General Meeting, the Board of Directors may submit new proposals at the same Annual General Meeting. If it does not submit any new proposals or if these are likewise rejected, the Board of Directors may either convene an Extraordinary General Meeting or submit new aggregate compensation proposals at the next scheduled Annual General Meeting. The following table summarizes the results of shareholder votes on compensation matters at the last three Annual General Meetings:

	FOR votes AGM 2023	FOR votes AGM 2022	FOR votes AGM 2021
Maximum total amount of fixed compensation for the Board of Directors (prospective)	93.02%	97.44%	95.78%
Total amount of variable compensation for the Board of Directors (retrospective)	93.01%	81.35%	80.87%
Maximum total amount of fixed compensation and long-term variable compensation for the Group Executive Board (in part prospective)	97.81%	88.62%	97.86%
Total amount of short-term variable compensation for the Group Executive Board (retrospective)	94.82%	86.09%	84.20%
Consultative vote on the compensation report	86.77%	n/a	n/a

3.4 Pool for variable compensation

The basis for calculating Bellevue Group's variable compensation pool is adjusted consolidated earnings before taxes. It is derived by adding the total pool of variable compensations (share of profit) to the earnings before taxes (according to the audited IFRS financial statements), eliminating adjustments for IFRS entries that cannot be influenced operationally and by deducting the cost of capital employed. The interest rate for the cost of capital is determined annually by the Board of Directors. For the business year 2023 the rate amounted to 10% (2022: 10%). A fixed proportion of the adjusted consolidated earnings before taxes (total pool of variable compensation) is allocated to employees. This is understood to be the employee share of the Company's financial results.

The adjusted consolidated earnings before taxes is an important internal indicator of the performance of Bellevue Group and is considered by the Compensation Committee to be a reliable metric. It already reflects the effects of other key indicators such as the cost/income ratio and changes in AuM or net new money.

The Compensation Committee also prepares a qualitative performance review for the Group Executive Board. This covers issues such as conduct, leadership and corporate development.

The allocation of the total bonus pool among the subsidiaries is determined by taking into consideration the contribution of each operating unit and team to the bonus pool.

4. Compensation system framework

4.1 Board of Directors

4.1.1 Fixed compensation

Each member of the Board of Directors receives a fixed compensation, which is prospectively determined by the Annual General Meeting, and which can vary depending on membership in boards of subsidiaries and board committees. The compensation system thus takes into account the responsibility and roles assigned to individual members of the Board of Directors. The additional duties of the Chairman in leading the Board of Directors and his function as a link between the Company's operational and strategic management are compensated with a higher fee. The amount of fixed compensation paid is determined at the Board's own discretion, in compliance with the general compensation principles (see section [2.1](#) above).

The base compensation of every member of the Board of Directors is determined annually and paid out on a quarterly basis. If a director leaves the Board before their term of office expires, the fixed compensation will be calculated on a pro rata basis to the end of the quarter of separation.

4.1.2 Variable compensation

Since the 2023 Annual General Meeting, the Board of Directors will no longer receive a variable remuneration.

In the previous year, the variable compensation was determined at the Board's own discretion, in compliance with the general compensation principles (see section 2.1 above), and paid in the form of shares of the Company, and are subject to a four-year lock-up period. The shares were awarded after the corresponding amount of compensation has been approved by shareholders at the Annual General Meeting.

4.1.3 Business expenses

Members of the Board of Directors do not receive fixed expense allowances; the actual expenses incurred are reimbursed.

4.1.4 Pension plan coverage

The members of the Board of Directors are not covered by the Company's pension plan.

4.1.5 Voluntary employee stock ownership plan

The Board of Directors occasionally offers voluntary employee stock ownership plans under which members of the Board of Directors may also be entitled to purchase Company shares at a discount to the given market price. The maximum discount on the date of the offer is 25%. The difference between the 10-day VWAP at the time the shares are transferred and the purchase price corresponds to the monetary benefit. The allotment is made in shares blocked for 3 years.

4.1.6 Advisory services

Subject to approval at the Annual General Meeting, members of the Board of Directors can be compensated in cash at standard market rates for advisory services benefiting the Company or a Group subsidiary that go beyond their duties and responsibilities as a director.

4.2 Group Executive Board

The components of compensation paid to the Group Executive Board are as follows:

Functions	Fixed compensation	Variable compensation			
	Criteria	Assessment criteria and distribution		Payout ¹⁾	
				in cash	in shares
Members of the Group Executive Board	<ul style="list-style-type: none"> • Management/functional responsibility • Seniority • Regional location 	CEO Group	<ul style="list-style-type: none"> • Profit contribution of the directly managed operating unit • Individual performance assessment based on Group KPIs 	50%	50%
		CFO Group	<ul style="list-style-type: none"> • Individual performance assessment based on Group KPIs 	50%	50%

¹⁾ Please refer to the chart under 4.2.2 for the detailed payout provisions.

4.2.1 Fixed compensation

The members of the Group Executive Board receive a fixed amount of base compensation that is determined annually for each financial year and that is partially prospective approved by the Annual General Meeting. The payout is in cash. These amounts are determined individually at the Board's own discretion in compliance with the general compensation

principles (see section 2.1 above), taking into account the duties and responsibilities assigned to each member of the Group Executive Board. From an entrepreneurial point of view, a restrained policy is applied to the determination of fixed compensation of the members of the Group Executive Board.

4.2.2 Variable compensation (share of profit)

The variable compensation of the members of the Group Executive Board is based on a performance review, measured against goals and expectations that are fixed in advance annually. The pool for variable remuneration described under 3.4 changes depending on target achievement. The individual allocation takes into account each individual's role, experience and personal performance as well as the market environment. The weighting of these elements is determined individually.

Variable compensation is basically structured and paid out as follows:

- Short-term variable compensation in cash
- Short-term variable compensation in the form of restricted shares
- Short-term variable compensation in the form of restricted shares with a vesting period and claw back provisions
- Other short-term variable compensation
- Long-term variable compensation

The structure of the variable compensation and the lock-up, vesting and claw back provisions are determined by the Board of Directors or its Compensation Committee, depending on the role and the amount of the designated individual variable compensation.

Variable compensation in the form of restricted shares is reported as short-term compensation despite the long-term nature of such compensation. This is because there are no stock option plans that confer a right to acquire shares of the Company; Company stock awards are exclusively direct grants of shares.

Short-term variable compensation components are subject to retrospective approval by the Annual General Meeting, while the long-term variable compensation components are partially subject to a prospective vote.

The following provisions apply with respect to the payment of short-term variable compensation:

Long-term variable compensation is paid out in shares.

4.2.3 Business expenses

Members of the Group Executive Board do not receive fixed expense allowances; the actual expenses incurred are reimbursed.

4.2.4 Pension plan coverage

The members of the Group Executive Board are enrolled in the standard pension plan offered to all employees in Switzerland. This pension plan only covers the base pay of all employees.

4.2.5 Long-term incentive plans at investment companies

BB Biotech AG and Bellevue Healthcare Trust, Bellevue Group's investment companies, are independent companies listed on multiple stock exchanges and they are managed and overseen by their own independent Board of Directors. Among the requirements stipulated by the boards of these companies with respect to the investment teams at Bellevue Group that have been retained by these companies was the establishment of long-term incentive plans that are in alignment with the expectations and interests of the shareholders of the investment companies.

Team members in the operating units who provide services related to mandates from the listed investment companies may participate in employee stock ownership plans that have been set up in conjunction with the asset management mandates of BB Biotech AG and Bellevue Healthcare Trust. Within the scope of these plans, some of the members of the Group Executive Board can be entitled to receive a maximum number of shares in BB Biotech AG and/or Bellevue Healthcare Trust. The actual number of shares awarded depends on various conditions. Awarded shares are subject to a three-year vesting period beginning on the date of grant. In addition, the actual number of shares distributed will depend on the achievement of certain performance targets over the subsequent three fiscal years in connection with the respective investment mandates. The maximum number of shares will be distributed only if the absolute performance of the respective mandates during the subsequent three years exceeds the mark of 10% p.a. and the relative performance of the respective mandates is better than that of the relevant indexes. There is no entitlement of shares if the absolute performance of the respective investment mandates during the three-year period is less than 5% p.a. and does not exceed the performance of at least one of the relevant indexes.

The long-term incentive plans in place at the investment companies are treated as long-term variable compensation.

4.2.6 Voluntary employee stock ownership plan

The Board of Directors occasionally offers voluntary employee stock ownership plans under which all Company employees are entitled to purchase Company shares at a discount to the market price. The maximum discount on the date of the offer is 25%. The difference between the 10-day VWAP at the time the shares are transferred and the purchase price corresponds to the monetary benefit. The allotment is made in shares blocked for 3 years.

In essence, the voluntary employee stock ownership plans described above are not elements of the Company's compensation policy.

4.2.7 Employment conditions

Members of the Group Executive Board have permanent employment contracts with a notice period of three months. Members of the Group Executive Board are not entitled to severance pay.

4.3 Management and employees

Compensation components paid to management and other employees are as follows:

Functions	Fixed compensation	Variable compensation		Payout ¹⁾	
	Criteria	Assessment criteria and distribution		in cash	in shares ²⁾³⁾
Member of Executive Board of operating Units (excl. Lead PM)	<ul style="list-style-type: none"> • Specialization • Management/functional responsibility • Seniority • Regional location 	<ul style="list-style-type: none"> • Executive Board Members with monitoring and control functions: discretionary compensation based on market standards. • Individual performance assessment 		50%	50%
PM Teams	<ul style="list-style-type: none"> • Specialization • Management/functional responsibility • Seniority • Regional location 	Investment companies	<ul style="list-style-type: none"> • Base: net income from products • Addition: LTI with quantitative and qualitative KPIs (defined by BoD of investment company) • Team distribution defined by Lead PM 	50%	50%
		Funds and mandates	<ul style="list-style-type: none"> • Base: net income from products • Addition: relative outperformance against benchmark and peer group • Team distribution defined by Lead PM 	50%	50%
Other Management and Staff	<ul style="list-style-type: none"> • Specialization • Management/functional responsibility • Seniority • Regional location 	<ul style="list-style-type: none"> • Bandwidth based on functional responsibility and Seniority • Individual performance assessment 		50%	50%

¹⁾ Please refer to the chart under 4.2.2 for the detailed payout provisions.

²⁾ Portfolio managers have the choice between shares of the Company or funds, which are managed by the team.

³⁾ Employees from foreign subsidiaries receive also this part in cash, with a one-year deferral.

As with the Group Executive Board, a restrained policy applies to the determination of fixed compensation for management and employees from an entrepreneurial point of view. For further details on the compensation system for middle management and other employees, please refer to section 4.2, as it does not differ from the compensation system in place for the Group Executive Board.

5. Board of Directors: Compensation, loans and stock ownership

5.1 Compensation

In the past, the Board of Directors received fixed compensation in cash and variable compensation in the form of Company shares as the Articles of Association did not permit stock-based fixed compensation for directors. Upon the approval of the amendments to the Articles of Association by the Annual General Meeting 2023, directors' fixed compensation can be paid in cash and/or shares of the Company. Consequently, variable compensation will no longer be paid to the Board of Directors as of the 2023 fiscal year. In addition, fixed compensation includes a potential non-monetary benefit for participation in voluntary stock purchase programs (restricted shares) at a discount. This position was in the past disclosed as short-term variable compensation. The comparative figures have been adjusted to the new presentation.

CHF	Veit de Maddalena	Katrin Wehr-Seiter	Urs Schenker	Barbara Angehrn Pavik ¹⁾	Daniel Sigg ²⁾	Total
01.01.–31.12.2023						
Fixed compensation	250 375	154 875	150 875	114 750	36 625	707 500
– in cash	185 875	112 875	110 125	76 500	36 625	522 000
– in shares ³⁾	64 500	42 000	40 750	38 250	-	185 500
Non-monetary benefit from voluntary stock purchase programs ⁴⁾	3 373	3 373	3 373	3 373	-	13 492
Social insurance contributions	-	-	8 355	5 666	-	14 021
Total compensation	253 748	158 248	162 603	123 789	36 625	735 013

¹⁾ Barbara Angehrn Pavik was elected to the Board of Directors by the Annual General Meeting on March 21, 2023.

²⁾ Dr. Daniel H. Sigg stepped down from the Board of Directors on March 21, 2023.

³⁾ Compulsory employee contributions to social insurance plans on the amounts above were settled in cash, not in the form of shares.

⁴⁾ This is the amount of the monetary benefit which reflects the difference between the discounted purchase price and the 10-day VWAP for the effective share allocation.

CHF	Veit de Maddalena	Daniel Sigg	Katrin Wehr-Seiter	Urs Schenker	Total
01.1.–31.12.2022					
Fixed compensation – in cash	227 500	147 854	115 500	114 500	605 354
Non-monetary benefit from voluntary stock purchase programs ¹⁾	11 267	-	11 267	11 267	33 801
Social insurance contributions on fixed compensation	277	-	-	8 108	8 385
Total fixed compensation	239 044	147 854	126 767	133 875	647 540
Variable compensation – in restricted shares ²⁾	36 000	36 000	36 000	36 000	144 000
Social insurance contributions on variable compensation	-	-	-	2 871	2 871
Total variable compensation	36 000	36 000	36 000	38 871	146 871
Total compensation	275 044	183 854	162 767	172 746	794 411

¹⁾ This is the amount of the monetary benefit which reflects the difference between the discounted purchase price and the 10-day VWAP for the effective share allocation.

²⁾ Compulsory employee contributions to social insurance plans on the amounts above were settled in cash, not in the form of shares.

In compliance with Art. 8 para. 1, section 1 of the Articles of Association, fixed compensation must be approved by the Annual General Meeting for the term of office extending to the next scheduled Annual General Meeting. Fixed compensation of CHF 618 000 (2021/2022: CHF 618 000) was approved for the period from the 2022 AGM to the 2023 AGM. The actual amount paid (including compulsory employer contributions to social insurance plans) for the aforementioned period was CHF 610 617 (2021/2022: CHF 615 795). For the period from 2023 AGM to the 2024 AGM an amount of CHF 880 000 (including the monetary benefit from voluntary employee stock ownership plans) was approved.

The resolutions of the Annual General Meeting regarding the fixed remuneration for the Board of Directors for the period from the Annual General Meeting 2022 to the Annual General Meeting 2023 were therefore complied with.

The variable remuneration totaling CHF 146 871 reported for the 2022 financial year was approved by the 2023 Annual General Meeting in accordance with Art. 8 para. 1 no. 2 of the Articles of Association and paid out in blocked shares in the first half of 2023. The shares are blocked for a period of four years from the date of transfer. In addition, the Annual General Meeting 2023 approved the non-monetary benefit from voluntary stock purchase programs in 2022 totalling CHF 34 226.

In 2023 and 2022, the Board of Directors authorized a voluntary employee stock ownership plan. The members of the Board of Directors were allocated to purchase 10 000 shares (2022: 4 500 shares) of the Company from the given pool at a discounted price of CHF 18.00 per share (2022: CHF 23.75 per share). This represented a discount of approximately 25% on the quarterly VWAP prior to the date the purchase right was granted. The difference between the 10-day VWAP on the date the shares are actually transferred and the purchase price corresponds to the monetary benefit. This cash compensation is subject to the approval of shareholders at the AGM. The shares were blocked for three years from the date of transfer.

The compensation of the Board of Directors has not changed significantly compared to the previous year. The changes shown are related to the valuation of the shares allocated or acquired under the voluntary participation programs.

In fiscal year 2023, no compensation was paid (2022: none) to related parties of members of the Board of Directors on conditions other than the customary market conditions.

No compensation was paid to former members of the Board of Directors after their resignation in the 2023 financial year, nor in the preceding year.

5.2 Loans and credits

As of the end of 2023 and 2022, no loans and no credits had been granted either to members of the Board of Directors or to former members of the Board of Directors or any related parties.

5.3 Holdings of shares in the Company

The number of shares in the Company held by the members of the Board of Directors at the end of 2023 and 2022 were as follows:

Number of shares	31.12.2023	31.12.2022
Veit de Maddalena, Chairman	268 705	287 024
Urs Schenker, Member	27 184	21 769
Katrin Wehr-Seiter, Member	20 570	14 958
Barbara Angehrn Pavik, Member ¹⁾	5 400	n/a
Daniel Sigg, Member ²⁾	n/a	51 705

¹⁾ Barbara Angehrn Pavik was elected to the Board of Directors by the Annual General Meeting on March 21, 2023.

²⁾ Dr. Daniel H. Sigg stepped down from the Board of Directors on March 21, 2023.

6. Group Executive Board: Compensation, loans and stock ownership

6.1 Goals and achievement of goals

For the 2023 financial year, the following goals were defined for the Group Executive Board and assessed by the Compensation Committee:

Quantitative targets		Target	Assessment
KPIs	– Assets under management	10% Growth	Performance below expectation
	– Cost-Income ratio	<65%	Performance below expectation
	– Return on equity	>20%	Performance below expectation
Qualitative targets			
KPIs	– Performance quality of products	50% outperform benchmark	Performance below expectation
	– ESG	Further development of the ESG-initiatives	Performance above expectation

The year 2023 was characterized by the persistently very challenging market environment for small and mid-cap growth stocks in the healthcare sector with below-average, and in some cases even negative, developments on the capital market, making it a very demanding year for the company and its employees. Bellevue was unable to escape the trend on the capital markets and recorded a reduction in client assets under management. With the investment performance of the products falling short of expectations, there was no compensatory momentum. In the overall evaluation, the performance of the Group Executive Board fell short of expectations against the backdrop of a significantly reduced earnings base and Group result.

In addition to focusing on stabilizing the Group in the core area of established investment strategies, the Executive Board used 2023 to flesh out new growth initiatives and further embed ESG criteria in the corporate and investment strategy. For example, new product ideas were launched in growth areas such as Bellevue Obesity Solutions and Bellevue AI Health, and attractive transactions were realized in the area of private market investments. Further investments in the expansion of investment expertise and the modernization of the infrastructure should further underpin the medium to long-term growth prospects as a specialist asset manager and provide a solid foundation for future development.

6.2 Compensation

As with the Board of Directors, fixed compensation includes a potential non-monetary benefit for participation in voluntary stock purchase programs (restricted shares) at a discount. A maximum amount for this position was already approved at the 2023 Annual General Meeting. This position was in the past recognised as short-term variable compensation. The comparative figures have been adjusted to the new presentation.

CHF	01.01.–31.12.2023		01.01.–31.12.2022

¹⁾ André Rüegg is the CEO of Bellevue Group AG and Bellevue Asset Management AG.

²⁾ As of December 31, 2023, the Group Executive Board consists of André Rüegg, CEO and CEO Bellevue Asset Management AG, and Michael Hutter, CFO.

³⁾ As of December 31, 2022, the Group Executive Board consisted of André Rüegg, CEO and CEO Bellevue Asset Management AG, and Michael Hutter, CFO. Jan Kollros, CEO ad bodmer AG and Bellevue Private Markets AG, has left the Group Executive Board as of August 31, 2022.

⁴⁾ This is the amount of the monetary benefit which reflects the difference between the discounted purchase price and the 10-day VWAP for the effective share allocation.

⁵⁾ The social insurance contributions include compulsory employer contributions to social insurance plans, employer contributions to pension plans and employer contributions to health and accident insurance plans.

⁶⁾ All shares of the Company were or are valued at market value (volume-weighted average prices during the 10-day trading preceding the date of grant). Compulsory employee contributions to social insurance plans on these amounts were settled in cash, not in the form of shares.

⁷⁾ The shares are subject to a one-year service period and a one-year claw back right clause.

⁸⁾ The social insurance contributions include compulsory employer contributions to social insurance plans. With respect to variable compensation that has not yet been paid out, a prospective rate of 6.5% is used to calculate prospective employer contributions to social insurance plans and rounded up. The actual amount due (in the subsequent year) may be lower. Pension plan contributions are not levied on any components of variable compensation, which is not included in the respective insurance coverage.

⁹⁾ Entitlement to a maximum of 1 700 shares of BB Biotech (2022: 1 700 shares of BB Biotech), valued at fair value (closing price on 31.12.2022 and 31.12.2021, respectively).

In compliance with Art. 8 para. 1, section 2 of the Articles of Association, fixed compensation for the current financial year is subject to approval by the Annual General Meeting. Fixed compensation (including the monetary benefit from voluntary stock purchase programs) of CHF 1 072 400 (2022: CHF 1 175 000) was approved for the 2023 financial year. The actual payout for the aforementioned financial year (including compulsory employer contributions to social insurance plans) was CHF 764 339 (2022: CHF 1 017 634).

The resolutions of the Annual General Meeting regarding the fixed remuneration for the Group Executive Board for the 2023 financial year were therefore complied with.

The reported short-term variable compensation totaling CHF 611 000 must be approved by the 2023 Annual General Meeting in compliance with Art. 8 para. 1 section 3 of the Articles of Association. Subject to approval, the variable compensation for work performed in 2023 of CHF 611 000 will be paid out in the first half of 2024 in cash due to the departure of the two members of the Group Executive Management.

In 2023 and 2022, the Board of Directors authorized a voluntary employee stock ownership plan. The members of the Group Executive Board did not exercise any rights to buy shares (2022: 8 200 shares) at a discounted price. In 2022, 8 200 shares at a discounted price of CHF 23.75 per share were allocated to the Group Executive Board. This represented a discount of approximately 25% on the quarterly VWAP prior to the date the purchase right was granted. The difference between the 10-day VWAP on the date the shares are actually transferred and the purchase price corresponds to the monetary benefit. The shares were blocked for three years from the date of transfer.

The short-term variable compensation (profit-sharing) of the Group Executive Board essentially decreased by more than 50% in the financial year compared to the previous year due to the reduced operating performance of the company.

Under the « BB Biotech Long-term Incentive Plan 2023», André Rüegg received in 2023 an entitlement of 1 700 shares (2022: 1 700 shares) in BB Biotech. The following performance criteria apply to the entitlement for the assessment period from January 1, 2023 to December 31, 2023:

KPIs	Weighting in %	Parameter
Absolute Performance (share price incl. dividends)	60	> 10% p.a. = 100% > 9% p.a. = 90% > 8% p.a. = 80% > 7% p.a. = 70% > 6% p.a. = 60% ≥ 5% p.a. = 50% <5% p.a. = 0%
Performance relative to NBI (Nasdaq Biotech Index)	20	Outperform = 100% Underperform = 0%
Performance relative to SPI (Swiss Performance Index)	20	Outperform = 100% Underperform = 0%

The effective number of shares will be allocated based on the KPIs achieved in January 2026. Due to the retirement of André Rüegg as of January 1, 2024 the number of shares has already been reduced on a pro rata basis.

Under the « BB Biotech Long-term Incentive Plan 2021», André Rüegg received an entitlement to 1 700 shares in BB Biotech. The target achievement of the plan was 0% as at December 31, 2023. No BB Biotech shares will be allocated.

Under the « BB Biotech Long-term Incentive Plan 2020», André Rüegg received an entitlement to 1 700 shares in BB Biotech. The target achievement of the plan was 0% as at December 31, 2022. No BB Biotech shares were allocated.

The percentage ratio of fixed compensation to variable compensation for the entire Group Executive Board is 52% fixed compensation and 48% variable compensation (2022: 44% fix and 56% variable). For the CEO, the total amount of fixed compensation amounts to 48% and the variable compensation is 52% (2022: 36% fix and 64% variable).

Gebhard Giselbrecht, designated CEO as of January 1, 2024, has already been employed at Bellevue as an employee as of December 1, 2024 in order to hand over the business. He was paid a fixed compensation of CHF 29 167 in the month of December. In addition, social security contributions of CHF 7 672 were due. Furthermore, due to the earlier commencement of employment a compensation of CHF 300 000 was already paid out in cash in December 2023 for valuable claims against the previous employer. Social security contributions of CHF 19 000 were due on this amount. The total amount of CHF 319 000 will be submitted to the 2024 Annual General Meeting for approval in accordance with Art. 27 para. 2 of the Articles of Association.

The values in the table above differ in certain respects from the Remuneration Reported in note 9 «Transactions with related companies and persons» of the consolidated financial statements 2023 of Bellevue Group AG, which were prepared in accordance with the International Financial Reporting Standards (IFRS). The differences relate to the valuation date of stock awards in connection with the bonus and the individual long-term incentive plans, which are subject to service period conditions. Under IFRS, their value is spread over the future vesting period («service period»), but for the purposes of this report, the amount granted is fully recognized on the date of grant.

During the reporting year, no compensation was paid to related parties of members of the Group Executive Board on conditions other than the customary market conditions.

6.3 Loans and credits

At the end of 2023 and 2022, no loans and no credits had been granted either to the members of the Group Executive Board or former members of the Group Executive Board or any related parties.

6.4 Holdings of shares in the Company

The members of the Group Executive Board owned the following Company shares at the end of 2023 and 2022:

Number of shares	31.12.2023	31.12.2022
André Rüegg, CEO and CEO Bellevue Asset Management AG	93 009	300 000
Michael Hutter, CFO	38 125	71 162

6.5 Activities in other companies

André Rüegg, CEO

Bellevue Funds (Lux) SICAV	Luxembourg	Chairman of the Board of Directors	Private
----------------------------	------------	------------------------------------	---------

7. Compensation of the Board of Directors and Executive Board subject to approval at the Annual General Meeting in 2024

7.1 Approval of maximum total fixed compensation for the Board of Directors

The proposed maximum remuneration of the Board of Directors remains unchanged from the previous year's proposal. The effectively lower fixed remuneration is related to the assumptions used to determine the imputed maximum value of the non-monetary value of the potential shares allocated under the voluntary share purchase programs. Maximum total compensation thus consists of the following components:

- Maximum fixed compensation of CHF 742 000 (previous period: CHF 742 000 approved)
- Maximum non-monetary benefit of CHF 114 000 applicable toward voluntary stock purchase programs (previous period: CHF 114 000 approved)
- Maximum employer contributions of CHF 24 000 for compulsory social insurance schemes (previous period: CHF 24 000 approved)

The Board of Directors proposes approval of maximum total compensation of CHF 880 000 (previous period: CHF 880 000 approved) for the Board of Directors for the term of office ending with the conclusion of the next Annual General Meeting. The payment will be made partly in Company shares and in cash.

7.2 Approval of the maximum total fixed compensation and long-term variable compensation for the Group Executive Board

The Board of Directors has decided to expand the Group Executive Board to four members from March 1, 2024 and likely to five members at a later date in 2024. Patrick Fischli and Markus Peter, who will join the Group Executive Board as of March 1, 2024, have been members of the Executive Board of the Bellevue Asset Management AG for around 15 years. The new CEO will also be compensated for valuable claims against the previous employer. Analogous to the Board of Directors, fixed compensation includes a potential non-monetary benefit for participation in voluntary stock purchase programs (restricted shares) at a discount. Fixed compensation for 2024 or partially 2023 thus consists of the following components:

- Maximum fixed compensation of CHF 1 170 000 (2023: CHF 620 000);
- Valuable Claims against previous employers in cash CHF 525 000, thereof CHF 300 000 paid-out in 2023 already (2023: none)
- Valuable Claims against previous employer in shares of the Company CHF 911 000 (2023: none)
- Maximum non-monetary benefit from voluntary stock purchase programs of a maximum of CHF 565,000 (2023: CHF 270 000);
- Maximum employer contributions of CHF 432 500 for compulsory social insurance schemes, as well as other insurance schemes and pension plans (2023: CHF 182 400).

The proposed amount of fixed compensation for the Group Executive Board for the 2024 financial year or partially 2023 is thus CHF 3 603 500. The changes shown are mainly related to the expansion of the Group Executive Board and the compensation for valuable claims against previous employer of the new CEO.

Members of the Group Executive Board participate in a long-term incentive plan in connection with the asset management mandate of BB Biotech AG. In 2024 they are entitled to receive a maximum of 5 100 shares (2023: 1 700 shares) of BB Biotech AG. Based on the closing price as of December 31, 2023, this corresponds to a maximum compensation of CHF 219 000 (2023: 93 900) plus compulsory social security contributions of CHF 16 500 (2023: 7 000). This corresponds to a maximum total amount of CHF 235 500 (2023: CHF 100 900).

The Board of Directors proposes the approval of maximum total fixed and long-term variable compensation of CHF 3 839 000 (2023: CHF 1 173 300) that can be awarded and paid to the members of the Group Executive Board during the current 2024 fiscal year.

7.3 Approval of the total short-term variable compensation for the Group Executive Board

Subject to approval by the Annual General Meeting, the members of the Group Executive Board will be paid short-term variable compensation related to performance based on annually agreed targets and expectation. The following proposal is based on performance and target achievement in the 2023 fiscal year. The components and the calculation of the variable compensation for the Group Executive Board are described in section [4.2](#) and disclosed in section [6.2](#).

The Board of Directors proposes the approval of total short-term variable compensation of CHF 611 000 (2022: CHF 1 322 955) for the Group Executive Board for the 2023 financial year.

Report of the statutory auditor to the general meeting of Bellevue Group AG Küsnacht

Report on the audit of the remuneration report

Opinion

We have audited the remuneration report of Bellevue Group AG (the Company) for the year ended 31 December 2023. The audit was limited to the information pursuant to article 734a-734f CO in the tables in chapters 5 and 6 of the remuneration report.

In our opinion, the information pursuant to article 734a-734f CO in the remuneration report (chapters 5 and 6) complies with Swiss law and the Company's articles of incorporation.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the «Auditor's responsibilities for the audit of the remuneration report» section of our report. We are independent of the Company in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report, but does not include the tables marked «audited» in the remuneration report, the consolidated financial statements, the financial statements and our auditor's reports thereon.

Our opinion on the remuneration report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the remuneration report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the audited financial information in the remuneration report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the remuneration report

The Board of Directors is responsible for the preparation of a remuneration report in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of a remuneration report that is free from material misstatement, whether due to fraud or error. It is also responsible for designing the remuneration system and defining individual remuneration packages.

Auditor's responsibilities for the audit of the remuneration report

Our objectives are to obtain reasonable assurance about whether the information pursuant to article 734a-734f CO is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this remuneration report.

As part of an audit in accordance with Swiss law and SA-CH, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement in the remuneration report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Foreword

Sustainability – operational progress, detailed reporting

Sustainability is and will remain an important factor in Bellevue Group's business strategy, because it is crucial to the success of our business over the long term and for creating value for all stakeholders. In order to deliver on this claim as best as possible going forward, we strengthened Bellevue's sustainability governance and organization in 2023. All relevant roles and responsibilities were reviewed at management level as well as throughout the workforce and changes were made where necessary.

We have expanded the sustainability section of our company's 2023 annual report in compliance with the Swiss non-financial reporting rules and regulations. This ESG report meets the requirements of the pertinent art. 964a et seq. of the Swiss Code of Obligations and was approved by the Board of Directors of Bellevue Group on February 19, 2024.

An important part of the Swiss non-financial reporting rules is the disclosure and presentation of climate-related matters. This ESG report therefore includes a section with such data that, for the first time, is in alignment with the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). It provides an overview of how Bellevue is addressing the issue of climate change and how it is managing the opportunities and risks that arise from the transition towards a low-carbon and climate-resilient economy. Since Bellevue does not operate in a carbon-intensive industry, climate change has a rather small impact on its business activities. Climate change does, however, have a major impact on investment product regulations and transparency requirements.

Bellevue also thoroughly reviewed and revised its ESG materiality matrix during the past year. Our reporting is now based on the principle of «double materiality». This means we report on the impact that the relevant ESG issues have on Bellevue's business operations, reputation and financial performance and on the impact that our business activities have on environmental, social and community issues.

In 2023, we made operational progress on several ESG fronts:

- For example, the proportion of women on Bellevue Group's Board of Directors has been 50% since the annual general meeting held in March 2023, which means we have already achieved and exceeded our initial goal of having 30% female representation on the Board of Directors by 2025.
- In August 2023, we analyzed the salaries of our employees using the Swiss government's national salary analysis tool and were pleased that this revealed no indications of a gender pay gap.
- Acting on the findings of the latest employee survey conducted in 2022, a number of measures pertaining to employee information channels, employee development and collaboration between executive management teams were implemented in 2023.
- All employees received training on data protection and market conduct rules during the year under review, and all new hires additionally received training on compliance issues.
- Furthermore, Bellevue Group was certified by Swiss Climate for the fourth consecutive year in 2023.

We also protect the long-term interests of our investors by making active use of our voting rights at the general meetings of the companies in our portfolios via proxy voting. In 2023, our portfolio managers and analysts participated in 572 general meetings and cast votes on 909 of a total of 934 votable proposals – which represents a participation rate of 97.3%.

During the 2023 financial year, the employee turnover rate rose above 10%. There are several reasons for this: On the one hand, long-serving employees left the company to pursue new career challenges and, on the other hand, strategic management decisions led to the voluntary departure of some employees as well. In 2024, we are aiming to bring the turnover rate below 10% again. This is in alignment with our efforts to continuously expand and integrate sustainability at both the corporate and the product level.

Veit de Maddalena
Chairman of the Board of Directors

Gebhard Giselbrecht
Chief Executive Officer

Sustainability achievements 2023

Sustainability strategy

GRI 2-22

Sustainability is an important factor in the Bellevue Group's business strategy. It is the key to securing our long-term success and at the same time creating value for all of our stakeholders. In line with the «triple bottom line» principle, we seek to generate growth while simultaneously taking into account the needs of the environment and society. As an independent asset manager, we are in a position to promote sustainable development to the benefit of all of our stakeholders.

Our sustainability thrusts 2030 support our aspiration and was developed as part of our stakeholder engagement process, which also incorporated a materiality assessment.

2030 sustainability agenda

Integration of sustainability into business strategy

The importance of ESG and sustainable investing is now widely recognized. Bellevue Group endeavors to continuously increase and integrate sustainability at corporate as well as portfolio level. Our values lay the foundation for the sustainable, responsible and values-driven business practices that guide our employees every day and they are absolutely essential for creating long-term value for our stakeholders. Based on these core values, we have established clearly defined, transparent ESG policies and investment guidelines that integrate binding environmental, social and governance aspects into our standards and conduct. Please consult the [ESG policy](#) document that we have published on our website for further information.

Reducing the CO₂ footprint of business operations and initiation of the net zero process

We measured Bellevue's carbon footprint at company level for the first time in 2021 for the year 2020. Business travel, commuting travel, heating and electricity are the main sources of our carbon emissions and we have therefore introduced sustainability measures in all of these areas. For example, video conferences are now a prioritized form of communication; we give employees financial incentives to commute by public transport; and we use lake

water to cool or heat our company headquarters in Küsnacht. Having offset its CO₂ emissions by supporting top-quality climate projects in Switzerland (a forest management project in the canton of Schwyz), Bellevue was certified by Swiss Climate for the fourth consecutive year in 2023. We are also committed to achieving net zero by 2050 and our 2030 climate strategy therefore includes a pledge to reduce our carbon emissions per employee (FTE) by 30%.

Improving gender diversity and fostering inclusion

Bellevue Group values employee diversity and believes this is an integral part of its success as a business. Our approach is founded upon mutual respect and a collaborative work culture across languages, cultures and nationalities. This variety of perspectives and approaches, experiences, ideas and talents leads to innovation and underpins Bellevue's success on a lasting basis – including its ability to attract qualified specialist personnel. Our goal of increasing the proportion of women on the Board of Directors to 30% was achieved in 2023. The proportion of women on the board as of December 31, 2023, was 50%. The targeted minimum proportion of women at executive management level remains 20%. This goal should be achieved by 2030 within the scope of our succession planning.

Anchoring sustainability throughout the investment process

Sustainability aspects have been an integral part of Bellevue's investment and risk management processes for many years. In 2018, we launched the Bellevue Sustainable Healthcare Fund, which adheres to strict formal ESG requirements. This was followed in 2021 by our second sustainability fund, Bellevue Sustainable Entrepreneur Europe, which is managed in accordance with internationally recognized ESG quality standards. Environmental, social and governance factors are taken into consideration across all portfolios within the scope of our ESG integration policy. In addition to clearly defined exclusion criteria based on global norms and values, these include, in particular, the relevant ESG risks are integrated into the fundamental analysis of investment candidates. The ESG profiles of potential investments and their impact alignment in connection with the UN's sustainable development goals are also screened. Potentially adverse effects of our investments on sustainability factors are monitored centrally and are formally included in the assessment of an investment as part of its sustainability profile. An internal working paper «Consideration of PAI» regulates the details. Environmental and climate aspects are an integral part of the overall assessment. Financed greenhouse gas emissions have also been systematically measured in accordance with the PCAF standards (Partnership for Carbon Accounting Financials) since 2023 and disclosed in accordance with the TCFD recommendations. Lastly, our portfolio managers are actively engaged in a constructive dialog with executive managers and relevant stakeholders on ESG matters. Bellevue Asset Management AG firmly embraces the United Nations Principles for Responsible Investment (UN PRI) and continuously adapts its ESG investment guidelines to meet the latest PRI reporting framework.

Sustainability governance

GRI 2-12

GRI 2-13

GRI 2-14

Over the past three years, Bellevue has strengthened its sustainability governance practices and its corporate sustainability framework and introduced new roles and responsibilities at management level as well as throughout the organization.

Sound sustainability governance is essential for ensuring that we continue to embed sustainability within our business practices and product offer, achieve steady progress towards our sustainability targets, and identify potential opportunities and challenges at an early stage. In September 2023, the Board of Directors introduced a new corporate framework for sustainability.

- Responsibility for sustainability-related performance, the monitoring of sustainability-related developments and the adoption of sustainability policies and strategies lies with the Board of Directors. It is also responsible for approving the sustainability report.
- The Group Executive Board is responsible for developing and implementing measures to achieve the sustainability strategy and objectives defined by the Board of Directors. Further information about the members of the Board of Directors and the Group Executive Board can be found in the Corporate Governance report.
- A sustainability working group has also been tasked with overseeing the implementation and integration of sustainability policies across all areas of the business. This working group is headed by the Group's CFO and includes representatives from various functions/ departments, as shown in the diagram above. It monitors the latest developments on the sustainability front and forecasts their impact on Bellevue Group's business model. It supports the Group Executive Board in formulating and developing the sustainability strategy. The sustainability working group meets at least once every quarter and reports to the Group Executive Board and the Board of Directors. It is additionally responsible for managing and implementing sustainability-related projects within the various business areas and functions and areas of activity.

Stakeholder engagement

GRI 2-29

We believe interaction with our stakeholders is crucial in identifying, analyzing, planning, prioritizing and implementing our 2030 sustainability goals, as well as the underlying objectives and measures. That is why we maintain regular contact with internal as well as external stakeholders.

In 2023, the following stakeholders were asked to participate in our double materiality assessment:

- Shareholders (interview and survey)
- Employees (survey)
- Clients/distribution partners (interview and survey)
- Suppliers (survey)
- Portfolio companies (survey)

Stakeholder	Engagement	Activities	Topics discussed
Shareholders and analysts	<p>Bellevue is in regular contact with its shareholders and analysts, in particular through the publication of its semi-annual and annual results. Investor Relations maintains a constant dialog with investors and analysts through the year. In accordance with the Listing Rules of SIX Exchange Regulation, key business developments are published via media releases or ad-hoc notices on at least two electronic information systems. These announcements are simultaneously published on the corporate website, having been sent to SIX Exchange Regulation in advance.</p> <p>The shareholder notices required under Swiss company law are published in the Swiss Official Gazette of Commerce (SOGC).</p>	<ul style="list-style-type: none"> • Annual general meeting • Conferences and events • Corporate website • Media releases • Annual and interim reports • ESG survey • Interview major shareholder 	<ul style="list-style-type: none"> • Business performance • Share price performance • Sales developments • Product developments • Sustainability
Employees	<p>Employees are given information about business developments, changes within the company and product updates on a regular basis. Material topics identified

GRI 3-1

GRI 3-2

GRI 2-29

The materiality analysis supports the Group Executive Board and the management teams of the subsidiaries in identifying key sustainability issues by considering the expectations and needs of external and internal stakeholders. The results of the materiality analysis are used to continuously improve sustainability management by sharpening the company's understanding of stakeholder needs and their shifting perceptions of what they regard as material sustainability issues. The materiality matrix forms the basis for managing corporate processes and helps to identify and manage potential opportunities and risks.

Bellevue thoroughly revised its materiality matrix during the year under review. Its sustainability reporting is now based on the principle of «double materiality».

Outside in: The impact of sustainability issues on Bellevue's business operations, reputation or financial success. Here the term «impact» refers to the actual or potential impacts on Bellevue's business model or value drivers (e.g., sales, cash flow, margins) in the short, medium or long term. For example, Bellevue depends on electricity to operate and it is likely to be significantly affected by rising energy prices.

Inside out: Bellevue's impact on sustainability issues. Here the term «impact» refers to the actual or potential effect, negative or positive, that Bellevue has or could have on the environment, the economy and on society, including basic human rights, in the short, medium or long term.

To ensure that all of the most important issues for Bellevue are identified, we have taken the following measures:

- Peer review
- Assessment of sector requirements
- Interviews with key stakeholders
- Surveys of all stakeholders

For the survey, the working group reviewed a list of 150 potential topics, including the topics of the previous year, discussed their relevance to our business and our sector, and drew up a definitive list of 20 topics that were then included in the survey. 200 stakeholders were asked to evaluate the topics on a scale ranging from «no impact» (1) to «very high impact» (5). 57% of the stakeholders contacted completed the survey.

Respondents assessed the materiality of the 20 topics from both an outside-in and an inside-out perspective. Material topics were discussed with senior management during two meetings at which all survey responses were presented and evaluated.

The Group Executive Board made the final decisions to ensure alignment with long-term strategy.

Materiality matrix

Change in material topics from year to year

	Material topic 2023	Material topic 2022	Explanation
ESG	Responsible investment	Investing more responsibly / sustainable products	Same content
E	Climate change	CO ₂ emissions	Same content
S	Talent attraction and retention	Employee development and retention Employee engagement	Changed name, includes our strategy for talent attraction, retention, development, safe employment terms and engagement.
	Diversity and inclusion	Diversity and inclusion	Same content
G	Economic performance	Business performance	Same content
	Business Ethics and integrity	Corporate governance and corporate ethics Transparency	This governance topic in 2023 is a merge between several identified topics: Ethics, integrity, transparency, corporate governance, compliance, business resilience, risk management and client data protection.
	-	Digitalization and innovation	These are important topics for us, which are addressed by the IT policy, but are not identified as a material topic in 2023.
	-	IT security	

Responsible investment

GRI 3-3

The materiality assessment above indicates that responsible investment is one of the key issues in the area of sustainability. Bellevue is striving for full and comprehensive integration of ESG criteria at the investment process and investment portfolio levels while remaining compliant with the constantly growing regulatory requirements.

Various sustainability approaches have been embedded into our ESG framework, which we have systematically implemented and are continuously developing.

Source: Bellevue Asset Management AG, as of December 31, 2023

Bellevue’s ESG investment guidelines basically comprise the following elements:

Exclusion criteria based on norms and values

We are committed to adhering to internationally recognized norms and systematically exclude from the managed investment portfolios any companies that seriously violate human rights, the environment or labor norms, or are involved in corruption. To this end, we apply the MSCI ESG controversies methodology and standards. MSCI ESG Controversies is intended to reflect all areas of adverse impact covered by the Organisation for Economic Co-operation and Development’s (OECD) Guidelines for Multinational Enterprises on Responsible Business Conduct. In addition, MSCI ESG Research provides a mapping of ESG controversy cases to the underlying principles of the following global norms: the UN Global Compact (UNGC), the UN General Principles of Business and Human Rights (UNGP) and the International Labor Organization (ILO) Conventions (both core and broad).

MSCI ESG Research has a dedicated team of analytical staff who identify and assess the severity of controversy cases that involve companies in its coverage universe on an ongoing basis. ESG analytical staff review the reported allegations and apply consistent scoring and a color-coded flag for each controversy case, based on the severity of impact in each case, the alleged role of the company in each case and the status of each case (which is determined by the state of resolutions, if any, between involved stakeholders). MSCI ESG Controversies – evaluation framework:

ENVIRONMENT	SOCIAL			GOVERNANCE
	HUMAN RIGHTS & COMMUNITY IMPACT	LABOR RIGHTS & SUPPLY CHAIN	CUSTOMERS	
Biodiversity & Land Use	Impact on Local Communities	Child Labour	Product Safety & Quality	Bribery & Fraud
Energy & Climate Change	Human Rights Concerns	Collective Bargaining & Unions	Anticompetitive Practices	Controversial Investments
Supply Chain Management	Civil Liberties	Discrimination & Workforce Diversity	Customer Relations	Governance Structures
Water Stress	Other	Labor Management Relations	Marketing & Advertising	Other
Toxic Emissions & Waste		Supply Chain Labor Standards	Privacy & Data Security	
Operational Waste (Non Hazardous)		Health & Safety	Other	
Other		Other		

Source: MSCI ESG Research Inc.

In contrast to exclusions based on violations of global principles and standards, value-based exclusions are based on social, ethical or moral values. Thresholds have been defined for the percentage of overall revenues that can be generated from business areas with high ESG risk scores such as conventional weapons, thermal coal and tobacco production. Companies that exceed the generally accepted annual revenue thresholds in the business areas below are excluded:

Business area	Revenue threshold
Controversial weapons	0%
Conventional weapons	10%
Thermal coal	5%
Fracking/oil sands	5%
Production of tobacco	5%
Sale of tobacco	20%
Adult entertainment	5%
Gambling	5%
Palm oil	5%

The revenue thresholds are unchanged from the prior-year period.

Compliance with these revenue thresholds is systematically reviewed, even though in the case of most of Bellevue's investment products – particularly in the healthcare sector – there is no involvement in these business areas. The specified revenue thresholds serve primarily for the practical implementation of the exclusion criteria and are based on empirical values in collaboration with institutional investors and industry experts. More far-reaching and/or stringent exclusion criteria may be applied for individual strategies with a dedicated sustainability focus.

Bellevue maintains an exclusion list, which is monitored and updated on a quarterly basis. Based on this list, just over 900 companies from across our investment universe were excluded from direct investment as at the end of 2023. Compliance with exclusion criteria is monitored monthly by an internal risk management unit.

ESG integration

As a specialist investment boutique with largely autonomous investment desks, the implementation of ESG integration policy is largely the responsibility of the respective portfolio management teams, although certain higher-level ESG activities are also carried out by ESG specialists assigned to the central product management function. Environmental, social and governance factors are integrated into the fundamental analysis of every company through an ESG integration process in which the associated financial risks or opportunities are evaluated with respect to future stock market performance. This approach gives our portfolio managers a holistic picture of an enterprise.

The environment subcategory focused on aspects such as whether a company systematically measures and discloses its emissions or carbon intensity or such as monitoring the CO₂ intensities of companies in the context of the average value for the relevant industry. The Social subcategory covers aspects such as product quality, data privacy policies, employee development and gender balance/diversity at management level. Examples of Governance issues are board independence, board compensation and corporate ethics.

A system of ESG ratings forms the basis by which sustainability criteria are integrated into the asset manager's investment decision process. Every issuer of securities in our investment universe is assigned an ESG rating based on various subscores. These scores are based on data from independent third-party providers MSCI ESG Research and Morningstar Sustainalytics. Their relevance, and consequently their weightings, can vary sharply depending on the sector in question. When calculating ESG scores, there is a special focus

on so-called key ESG issues, i.e., on those sustainability aspects where a company excels or performs particularly poorly, as the case may be.

Despite the continuous improvement and adaptation of ESG rating methodologies, aggregated ESG ratings still had to be interpreted with caution and a critical eye during the past year. Most ESG rating methods are based on a predefined systematic approach that does not always result in an objective or «fair» assessment of risks. In fact, such methods often systematically disadvantage start-ups and small-cap companies relative to large-cap companies. A lack of manpower and experience in handling ESG issues can result in a company being underrated. Also, the given comparison group used to determine ESG ratings within a certain industry may not be entirely applicable. That is why our portfolio managers always take a closer look at potential or ostensible «ESG laggards» (CCC, B rating) and reach out to the ESG specialists at our external ESG research providers and at the companies with lagging ESG ratings. Investments in «ESG laggards» must be documented in detail. Bellevue Asset Management does not apply a «best-in-class» approach for the reasons mentioned above, unless otherwise dictated by a specific investment strategy.

A breakdown of Bellevue's liquid investment strategies (net invested assets of Bellevue's equity and fixed income strategies excluding cash, Private Equity, Ventures, company pension fund and dedicated derivative strategies) by MSCI ESG rating is given below:

Breakdown of MSCI ESG ratings as of December 31, 2023

Source: Bellevue Asset Management, MSCI ESG Research

At the end of 2023, Bellevue's liquid strategies were again invested primarily in companies with high to very high ESG ratings (MSCI rating of BB or higher). These MSCI ESG ratings reflect sustainability risks and opportunities. Only 3.4% (8.9% in the previous year) of all investments were in so-called ESG laggards (B) and the percentage of investments with the lowest rating of CCC was negligible (0.2%). Only 2.9% of all asset-weighted investments had no rating (compared to 3.5% in the previous year). The breakdown of ESG ratings shown above covers approximately 94% of Bellevue's total assets under management (92% in the previous year).

Following the introduction of the EU Sustainable Finance Disclosure Regulation in March 2021 and the Delegated Regulation (EU) 2021/1253 on MiFID II sustainability preferences (art. 9), Bellevue established the two investment categories of «investments with sustainable

characteristics» and «sustainable investments». In the absence of a uniform European-wide classification system, the two categories are applied in the investment processes of the respective strategies to the best of our knowledge based on current practices and the, in some cases limited, data available, in accordance with clearly defined principles.

Investments with sustainable characteristics (EU SFDR)

Most of Bellevue's investment strategies take into account social, environmental as well as governance-related characteristics (ESG) as part of the implementation of their investment objectives, in accordance with the provisions of Article 8 of the EU Disclosure Regulation 2019/2088 (EU SFDR), but do not have sustainability as their objective. In principle, the aim is to invest all of the assets of the relevant strategies in investments with sustainable characteristics. However, as there is not yet a sufficient amount of ESG data available in every asset class and sector and, given that some companies do not yet have an ESG rating, a minimum allocation threshold to investments with sustainable characteristics has been set as a percentage of total invested fund assets.

For strategies with a considerable allocation to small and mid-cap investments and/or significant emerging market exposure where ESG research coverage is low, the minimum allocation threshold to «investments with sustainable characteristics» is 50%. Strategies that are less affected by these factors must adhere to a higher minimum allocation of 75% to «investments with sustainable characteristics».

Detailed information on the individual investment strategies as well as the methodology can be found in the product-specific documents available via the following link:

<https://www.bellevue.ch/all-de/all/esg/nachhaltigkeit/nachhaltigkeit-auf-portfolioebene>

Sustainable investments (MiFID II and EU SFDR)

In addition to taking into account the most important adverse effects on sustainability factors (PAIs) at portfolio level, Bellevue has defined minimum allocations to sustainable investments for every investment strategy pursuant to Article 2 (17) of the Disclosure Regulation 2019/2088. This defines a «sustainable investment» as an investment in an economic activity that contributes to the achievement of an environmental and/or social objective and do no significant harm with respect to such objectives. Furthermore, the investee companies must follow good governance practices.

Investments are included under the «sustainable investment» allocation if, firstly, they have a positive alignment with at least on of the 17 UN Sustainable Development Goals and, secondly, if they meet the aforementioned sustainability characteristics and, thirdly, if they have no significant adverse impact on sustainability factors. The MSCI ESG methodology is also used to measure contributions towards the UN SDGs (see section on «Alignment with UN SDGs»). Minimum thresholds of 25% and 50% were defined for the sustainable investment category. Here as well, the existing ESG-related research coverage and the specific investment focus (e.g. small and mid caps) play an important role.

Based on the above definitions and the methodologies applied, approximately 94% (87% in the previous year) of the liquid net invested assets at Bellevue as of December 31, 2023, qualified as «investments with sustainable characteristics» and 62% (54% in the previous year) as «sustainable investments» in the context of the EU SFDR:

Investment products with sustainable characteristics (based on EU SFDR)

Sustainable investment (based on EU SFDR)

Once again, we would like to point out that an industry-wide comparison of these percentage proportions is not meaningful due to the current lack of harmonization of the

applicable classification screens and evaluation methodologies within the meaning of the EU SFDR.

Principal adverse impacts on sustainability factors (PAI)

Bellevue takes into account the principal adverse impact (PAI) of its investment decisions on sustainability factors in its investment processes and portfolio management activities. PAI indicators can be considered both explicitly and implicitly. In explicit consideration, thresholds are determined for each PAI criterion, defining when a specific PAI criterion has a «principal adverse impact» on a sustainability factor («supercritical»). If an issuer is assessed as having a «principal adverse impact», it cannot be categorized as a sustainable investment, no matter if the issuer makes a positive contribution to one of the UN's 17 Sustainable Development Goals.

In implicit consideration, aspects of the relevant PAI indicators are incorporated into the ESG ratings methodology developed by MSCI ESG, resulting in indirect consideration of PAI performance by defining minimum rating scores that are used to calculate the share of sustainable investments or of investments with sustainable characteristics for each investment fund.

Within the framework of a PAI analysis, sustainability factors such as carbon intensity, programs to reduce carbon emissions, water- and waste-related controversies, or gender mix at board level, for example, are explicitly taken into account.

The consideration of adverse impacts on sustainability is subject to data availability. The required data is not always available in sufficient quantity and quality for every entity in which Bellevue invests. As a result, the list of PAI indicators taken into account is continuously reviewed based on data availability and data quality.

As of December 31, 2023, 7.7% of weighted-average portfolio assets had a significantly negative PAI indicator, which resulted in a corresponding reduction in the share of «sustainable investments».

ESG stewardship

As a responsible long-term investor, Bellevue supports all measures and proposals designed to increase the value of portfolio companies over the long term in the interests of shareholders and investors. This includes engagement activities as well as the exercising of voting rights at general meetings of shareholders.

Engagement

Active management means investing with conviction. We know what we are investing in and pursue this with great discipline. At Bellevue Group you will not find any overarching investment committees or a CIO. Working independently in their own product areas, the relevant specialist teams are all committed to personal responsibility, respect, and the strength of their own vision. As well as being investment experts, our employees are simultaneously entrepreneurs who through their own investments have a stake in the success of Bellevue clients.

This commitment to active investment management also highlights the importance of engagement as a key element of our ESG framework. Portfolio managers are engaged in an active and constructive dialog with the executives and other relevant representatives of portfolio companies on environmental, social and governance issues. If there are any indications of a significant controversy related to ESG issues, they are constructively discussed with the investee company and subsequent developments (e.g. change in

strategy or processes, improvement of ESG rating) documented over time. Engagement activities are undertaken in the context of materiality and proportionality considerations. The level of engagement can vary depending (among other things) on the size of the position held by an investment strategy, the market capitalization of the investee company, and the entity's stage of corporate development.

Written records of ESG engagement activities are maintained as part of the regular documentation of conversations with company representatives. In 2022 we also established a proprietary tool in which ESG engagement activities are systematically recorded and subsequent developments documented over time. The engagement guidelines were elaborated in more detail in 2023. For example, we defined which topics are prioritized in our engagement approach. These are listed below:

Broad topics:

- Violations of international norms
- Human rights violations
- Climate change
- Serious controversies
- Business ethics
- Labor rights
- Corporate governance
- Transparency

Specific topics:

- Access to medicines
- Data protection and privacy
- Product quality and safety
- Employee satisfaction
- Human capital
- Public health
- Gender diversity

Instruments for escalation strategies were also determined. If an investee company is not making the progress we would like to see, the responsible investment manager has a range of measures at their disposal and is free to pursue the engagement action they believe is the most appropriate. Escalation measures include:

- Engagement with higher levels of management, including the non-executive directors
- Voting against management proposals at general shareholder meetings
- Collaborative engagement efforts

If no visible or measurable progress is made after 36 months of engagement, a strategic reassessment of the situation can result in:

- A «quarantine» of the investment, meaning it can no longer be increased
- A sale of the investment

Since a sale of the investment significantly reduces the potential for meaningful conversations and our influence on the company in question, we view this action as a very last resort.

Formal records of our engagement activities have been kept since 2022 and in the meantime 15 engagements have been concluded and 10 of the engagement outcomes were successful in full or in part. Our ESG engagement did not produce the desired results at 5 investee companies. One company was subsequently taken over and the positions in 3 other companies were closed.

Regarding the latter, for example, we had engaged with a small-cap US healthcare company that had gone public only a few years earlier on ESG matters over a period of 10 months. Various suggestions for improving corporate governance scores (management compensation and other areas) were made during the course of a constructive dialog. Collaborative engagement with a like-minded group of shareholders was also considered. Since our discussions with the company’s management were not fruitful either and we saw no grounds to expect an improvement in the company’s corporate governance in the foreseeable future, we decided to exit this position. We are confident that we made the right decision because the company’s MSCI ESG rating has not improved in the meantime. During the 2023 fiscal year, 20 new ESG engagements were initiated, and our portfolio management teams were involved in a total of 32 engagement processes. These pertained to the three pillars of sustainability – environmental, social and governance. As a substantial share of all investments are in companies within the US healthcare sector, most of the engagement activities also took place in that sector.

Breakdown of ESG engagements by sector in 2023

Breakdown of ESG engagements by region in 2023

Breakdown of ESG engagements by ESG criteria (multiple answers possible) in 2023

Selected ESG engagement case studies show that our portfolio managers and analysts are in very close contact with companies and through constructive dialog they endeavor to bring about the best possible corporate performance in terms of sustainability criteria too. Qualified opinions of third parties such as proxies are included in the process, although ultimately we always act in the interests of our investors.

Engagement Case: Example – Company from the Biopharma small-cap sector (USA)

Virtually every listed company is now aware of the high relevance of sustainability as part of its strategic agenda. Despite this increased awareness, organizations differ in their capacity to devote financial and human resources to sustainability issues. Again in 2023, some small caps lagged behind larger competitors on these issues.

Details of the engagement

With an MSCI ESG rating of B («laggard»), the company described here had a below-average sustainability rating at the initiation of our ESG engagement. The company lags behind competitors particularly in the area of talent retention. Given the organization's reliance on highly qualified staff, difficulties in recruiting and retaining staff could pose challenges. Performance-related incentives or programs are essential in this industry in particular.

During a conference call with three company representatives (including Investor Relations & Human Resources), the responsible portfolio manager assessed priority and progress on sustainability, primarily focusing on the human capital issues criticized by MSCI ESG. The company says it has a bonus program to which all employees are entitled. The program rewards milestone achievements such as FDA approvals and contributes significantly to employee retention. Furthermore, all employees are granted shares as part of a stock option plan, allocated based on target achievement. Additionally, the company scores higher on employee satisfaction compared to the corresponding US peer group. We were told during the meeting about plans to raise visibility with relevant stakeholders (rating agencies, shareholders, etc.) and publish a sustainability report.

Outcome

We are monitoring further developments and taking potential progress into account in our investment decision. We anticipate that increased visibility would improve the ESG rating, which would be expected to have an overall positive impact on the organization.

Engagement case: Example – Husqvarna (Sweden)

The Swedish group is the world's leading supplier of innovative products and solutions for forestry, park and garden maintenance, marketed under the global Husqvarna and Gardena brands. With an MSCI ESG rating of AA, Husqvarna has been an ESG leader for many years and is an international pioneer in sustainability management.

Details of the engagement

The Husqvarna Group reports annually on the progress of sustainability integration under the name «Sustainovate». The program's sustainability targets are geared towards the year 2025. Our conversations with Husqvarna focused on: 1) the feasibility of the Sustainovate program 2) the progress made towards achieving their ambitious goals and 3) the importance of further enhancing the ESG rating, not just for a potential re-rating of stock valuation but for overall business development.

We had the opportunity to discuss the development of the Sustainovate program together with the Head of Investor Relations. It was highly gratifying to see that the company is well on the way to achieving its ambitious sustainability goals. With a 32% reduction in carbon across the entire value chain by 2022, Husqvarna is well on track to reach the targeted 35% reduction by 2025. That said, we emphasized the importance of publishing new sustainability targets soon. The current objectives are set for 2025, and we believe that shareholders and rating agencies would appreciate the company establishing a new set of ambitious sustainability targets (e.g., for 2027 or 2030) in 2024. This contributes to reinforcing the «best-in-class» reputation within the ESG landscape and further elevating the organization's already commendable AA rating towards the coveted AAA rating.

Outcome

Husqvarna has not yet commented on specific new sustainability targets. The current focus is on achieving the Sustainovate 2025 program targets. We hope for new objectives upon the release of the sustainability report for the fiscal year 2023 and will remain in contact with Husqvarna in this regard.

Proxy voting

Bellevue also protects the long-term interests of its investors by making active use of its voting rights at the general shareholder meetings of investee companies through proxy voting.

International Shareholder Services (ISS) provides us with proxy advisory services. ISS has many years of experience in proxy advisory and sets the bar with its voting policies. However, there is no obligation to vote in the same way as ISS recommends. Bellevue may vote against the recommendations of third-party organizations if it deems that their voting recommendations are not in the best interests of investors. Bellevue Asset Management AG actively exercises its voting rights as a rule.

Voting rights can be exercised in person by attending a general meeting; electronically via online voting platforms or through an appointed representative or representatives / proxy voting firms.

Overview of voting activities in 2023

In 2023, our portfolio managers and analysts participated in 572 general meetings (2022: 583) and cast votes on 909 (898) of a total of 934 (910) possible proposals, which represents a participation rate of 97.3% (98.7%). This figure can be below 100% because some markets require an equity blocking period in connection with voting, which would in turn restrict trading in the securities concerned. In order to maintain portfolio liquidity, however, no voting takes place in such cases.

Detailed information on our voting activity is given in the following tables:

Meeting overview

Category	2023		2022	
	Number	Percentage	Number	Percentage
Number of votable meetings	589		593	
Number of meetings voted	572	97.1%	583	98.3%

Climate-change factors – CO₂ emissions at portfolio level

The following environmental and climate-related portfolio evaluations refer exclusively to our investment strategies for listed securities (approx. 96% of total assets under management); private equity investments (approx. 3%) and derivatives-based strategies (approx. 1%) cannot be systematically assessed at the present time due to the lack of data and/or of viable methodological approaches.

In order to categorize financed carbon emissions, we have broken down invested assets by investment sector and investment region, as depicted below:

AuM by sector

AuM by country

As a highly specialized provider of healthcare investment solutions, approx. 94% of our investments are in the healthcare sector, 4% are in the manufacturing, consumer, tech, communications, and financial sectors, and only 2% are in the energy, commodities, utilities and real estate sectors. Three-quarters of the invested positions are domiciled in the US, European positions account for 4% of total investments and 7% is domiciled in Asia and emerging markets.

With respect to the TCFD, as of December 31, 2023, financed CO₂ emissions – i.e., the CO₂ emissions at the investment portfolio level – were systematically calculated for the first time. Using the PCAF method (Partnership for Carbon Accounting Financials, see box below for methodology), the respective Scope 1, Scope 2 and (largely estimated) Scope 3 emissions per portfolio position were recorded as of the reporting date using MSCI ESG data. The table below lists the calculated financed Scope 1, 2 and 3 emissions (absolute amount in million metric tons of CO₂e) at portfolio level as of December 31, 2023, as well as the respective data quality score (Data Quality Score according to PCAF)³:

Financed GHG Emissions (t CO ₂ e)	Scope 1 & 2 ¹⁾	Scope 3 ²⁾	Data Coverage in %	PCAF Data Quality Score ³⁾	PCAF Data Quality Score ³⁾
				Scope 1 & 2	Scope 3
BB Biotech AG	4 872.65	64 415.44	97%	3	4

¹⁾ Aggregate GHG emissions financed for Scope 1 and 2 (on the basis of EVIC). Based on reported emissions data when available. Otherwise estimated. Units: t CO₂e. Calculated using MSCI ESG data inputs and methodology.

²⁾ Aggregate GHG emissions financed for Scope 3 (on the basis of EVIC). Based on reported emissions data when available. Otherwise estimated. Units: t CO₂e. Calculated using MSCI ESG data inputs and methodology.

³⁾ PCAF Data Quality Score: Standardized measure for determining the data quality of the financed emissions; score 1 = highest quality/certain (reported and verified emissions of issuer in line with the GHG protocol); score 5 = lowest quality/uncertain (calculated based on emissions factors for the sector per unit of revenue). Calculated using MSCI ESG data inputs and methodology.

IMPORTANT NOTE: The given CO₂ emissions must only be understood as abstract absolute amounts that will rise or fall as portfolio assets (AUM) increase or decline. Changes in portfolio assets, for example through subscriptions or redemptions of fund shares by investors, will have a significant impact on reported CO₂ emissions. As such, this data is NOT suitable for comparative purposes, i.e., these figures cannot be used for historical or comparative contextual analysis, nor as KPI/target values.

In contrast, the CO₂ footprint, i.e. the ratio of financed emissions (GHG Scope 1 and 2 and GHG Scope 3) to total invested assets, is more meaningful:

Financed emissions – CO₂ footprint (in t CO₂/mn CHF invested)

Source: Bellevue Asset Management AG, MSCI ESG Research

In addition to the financed emissions, the asset-weighted sum of aggregate CO₂ intensity, i.e. total portfolio carbon emissions in metric tons per million USD of turnover (WACI Scope 1, 2, 3), has been calculated for each strategy:

CO ₂ intensity	WACI Scope 1, 2 & 3 ¹⁾	Data Coverage in %	Est. EU Taxonomy Alignment ²⁾

Private Equity	n/a	n/a	n/a
Asset weighted average	528.31		

¹⁾ GHG emissions in tons per million dollars of turnover for Scope 1, 2 and 3 emissions. Based on reported emissions data, if available, otherwise estimated emissions; units: metric tons of CO₂e / 1 million of revenues in the portfolio base currency. Calculated using MSCI ESG data inputs and methodology.

²⁾ Estimated EU Taxonomy Alignment: Estimated maximum percent of weighted-average investee turnover that makes a substantial contribution to one or more of the EU Taxonomy's climate or environmental objectives without having a significant adverse impact on the other objectives and that is also in compliance with minimum human and labor rights. Calculated using MSCI ESG data inputs and methodology.

The Bellevue African Opportunities Fund and the Bellevue Global Income Fund are Bellevue's most carbon-intensive investment funds. Both invest in energy and mining companies, two industries with the highest amounts of CO₂ emissions. Healthcare funds, in contrast, have lower if not the lowest CO₂ intensities. Examples here are the Bellevue Biotech (CH), Bellevue Sustainable Healthcare and Bellevue Healthcare Strategy funds as well as BB Biotech AG. The Bellevue Emerging Markets Healthcare Fund also has a very low carbon of 292 t CO₂/USD 1 mn turnover, which reflects the high weighting of healthcare services providers on the one hand and the in some case still moderate estimates of Scope 3 emissions on the other. The diversified healthcare strategies are therefore all within the range of the MSCI World Healthcare Index, which had a CO₂ intensity of 361.9 t CO₂/USD 1 mn turnover as of December 31, 2023.

By comparison, the Entrepreneur funds, the Bellevue Global Macro Fund and the StarCapital funds invest in a wide range of industries, including the energy and manufacturing industries, and therefore have higher average intensities than the healthcare strategies.

With 528.3 t CO₂/USD 1 mn turnover for all measurable Bellevue investment strategies (approx. 94% of Bellevue's total AUM), the CO₂ intensity or WACI Scope 1, 2, 3, is approximately 42% below the calculated carbon intensity of the index-weighted constituents of the MSCI AC World Index (905.9 t CO₂/USD 1 mn turnover).

With reference to the alignment of Bellevue's investment strategies with the EU Taxonomy's climate and environmental objectives, the Bellevue Entrepreneur Europe Small Fund and the Bellevue Sustainable Entrepreneur Europe Fund have the highest taxonomy alignment scores at around 11% and 9%, respectively, of weighted-average company revenue. The StarCapital Dynamic Bond Fund (6%) and the StarCapital Multi Income Fund (just under 5%) also make moderate contributions to the environmental objectives of the EU Commission. Based on the total assets under management of Bellevue, the share of weighted-average turnover that meets at least one of the EU Taxonomy environmental and climate objectives is around 0.4%. This is mainly due to the fact that 94% of our investments are in the healthcare sector, which, by its very nature, cannot make a substantial contribution to any of the 6 environmental objectives of the EU Taxonomy (the weighted-average turnover within our EU Taxonomy-aligned healthcare investments is 0.04%; of the almost 300 healthcare investees, a mere 8 meet the applicable Taxonomy requirements to substantially contribute to at least one of the EU Taxonomy's environmental objectives and their level of alignment is very low).

We therefore again emphasize that our investment strategies seek to provide long-term capital growth by investing in companies with positive sustainable characteristics. None of our investment strategies has specified a minimum proportion of portfolio investment in environmentally sustainable economic activities as defined in Article 3 of the EU Taxonomy Regulation (2020/852). The EU Taxonomy-aligned turnover data above is for informational purposes only.

PCAF methodology (Partnership for Carbon Accounting Financials):

The financed emissions of a loan or an investment in a company are determined by multiplying the attribution factor by the emissions of the borrower or investee. Total funded emissions of a portfolio of listed equities and corporate bonds are calculated as follows:

$$Financed\ emissions = \sum_c Attribution\ factor_c \times Company\ emissions_c$$

(with c = borrower or investee company)

The attribution factor represents the proportional share of a given company, i.e., the outstanding amount divided by EVIC for listed equity or the outstanding amount divided by total equity and debt for traded bonds to private companies:

For listed companies:

$$\text{Financed emissions} = \sum_c \frac{\text{Outstanding amount}_c}{\text{Enterprise Value Including Cash}_c} \times \text{Company emissions}_c$$

For bonds to private companies:

$$\text{Financed emissions} = \sum_c \frac{\text{Outstanding amount}_c}{\text{Total equity} + \text{debt}_c} \times \text{Company emissions}_c$$

The financed emissions from listed equity and corporate bonds can be calculated in different ways depending on the availability of financial and emissions data specific to the borrower and investee: Overall, PCAF distinguishes three different options to calculate the financed emissions from listed equity and corporate bonds depending on the emissions data used: Option 1: Reported emissions (verified/unverified); Option 2: emissions are estimated based on data collected from the borrower or investee company; Option 3: emissions are estimated based on sector-specific average emissions per economic activity.

The definitions of the PCAF data quality scores for listed equities and corporate bonds are as follows:

Data quality	Options for estimating the financed emissions	When to use each option	
Score 1	Option 1: Reported emissions	1a	Outstanding amount in the company and EVIC are known. Verified emissions of the company are available.
		1b	Outstanding amount in the company and EVIC are known. Unverified emissions of the company are available.
Score 2	Option 2: Physical activity-based emissions	2a	Outstanding amount in the company and EVIC are known. Reported company emissions are not known. Emissions are calculated using primary physical activity data of the company's energy consumption and emission factors specific to that primary data. Relevant process emissions are added.
Score 3		2b	Outstanding amount in the company and EVIC are known. Reported company emissions are not known. Emissions are calculated using primary physical activity data of the company's production and emission factors specific to that primary data.
Score 4	Option 3: Economic activity-based emissions	3a	Outstanding amount in the company, EVIC, and the company's revenue are known. Emission factors for the sector per unit of revenue are known (e.g., tCO ₂ e per euro or dollar of asset in a sector) are known.
Score 5		3b	Outstanding amount in the company is known. Emission factors for the sector per unit of asset (e.g., tCO ₂ e per euro or dollar of asset in a sector) are known.
		3c	Outstanding amount in the company is known. Emission factors for the sector per unit of revenue (e.g., tCO ₂ e per euro or dollar of asset in a sector) and asset turnover ratios for the sector are known.

Score 1 = highest data quality; Score 5 = lowest data quality

Source: Financed Emissions, The Global GHG Accounting & Reporting Standard, PCAF Partnership for Carbon Accounting Financials, December 2022

As mentioned in the section on ESG integration/PAI indicators above, carbon emissions data is used to determine sustainability scores, either implicitly based on the MSCI ESG rating, which is relevant for calculating the proportional share of investments that promote sustainable characteristics, or explicitly based on the reported carbon intensity of each issuer. The reported figure is checked to see if the carbon intensity threshold exceeds 70 t CO₂/USD mn revenue (i.e., is higher than the «low» range used in MSCI ESG methodology). If yes, it is compared against the relevant industry average. If the reported value of the issuer is found to exceed 50% of the given sector average, the issuer cannot be categorized as a «sustainable investment», even if it makes a positive contribution to one or more of the 17 UN SDGs.

Using this methodology, there were a total of 8 issuers (or 0.1% of total assets under management) in all of Bellevue's portfolios as of the end of 2023 whose CO₂ intensity scores were categorized as non-sustainable.

In addition, according to MSCI ESG Research, 30 issuers or 0.4% of total assets under management, were lacking carbon emission reduction measures.

Greenhouse gas emissions and the CO₂ footprint are also fundamental components of a company's MSCI ESG rating and are thus indirectly included in the assessment and weighting of sustainable investments.

With regard to investments in companies in high-carbon industries (oil, gas, coal), these investments accounted for 0.19% of total assets under management at year-end (0.22% in the previous year).

Comeback for infrastructure investments – sustainable investment opportunities

Renewable energy, energy security, electrification, and deglobalization are some of the biggest challenges the world faces today and they can only be met through massive government as well as private-sector investment programs, which have already been initiated in various developed countries. From an investor's perspective, the dynamics and the scale of these developments offer a wide range of investment opportunities, and that is also true to Swiss and other European companies. For Bellevue as a fundamentally oriented stockpicker, the global transformation of infrastructure is a key factor in the positioning of Bellevue's Entrepreneur Funds. Whether it be compressor systems from Switzerland, green storage solutions for renewable energy from Finland or offshore winds from Norway – the opportunities are vast and compelling from an environmental-sustainable standpoint as well as from a business standpoint.

KPIs of responsible investments

	Target	2023	2022
ESG Coverage as % of AuM at year-end	>90%	97.1%	96.5%
Investments with sustainable characteristics as % of AuM at year-end	>75%	94.0%	87.1%
Sustainable investments as % of AuM at year-end	>25%	61.0%	54.3%
Reduction in the sustainability rate due to supercritical PAI values	–	7.7%	n/a
Number of processed engagements in the calendar year	–	32	22
Exercise of voting rights in % of the proposals eligible for voting	>90%	97.0%	98.0%
Asset-weighted GHG intensity (WACI Scope 1, 2, 3) of total assets at the end of the year	–	528.3 t CO ₂ c	n/a
Investments in the carbon sector as % of AuM at year-end	–	0.2%	0.2%

Business ethics and integrity

GRI 3-3

GRI 2-23

GRI 2-24

As a specialty investment manager, our mission is to provide access to attractive and innovative investment opportunities, thereby creating value for investors and shareholders. We commit to doing so in alignment with applicable legal requirements, in particular including counterterrorism and anti-corruption efforts.

Reputation and trust are the cornerstones of our business success as a specialty investment manager. Reputation and trust amongst stakeholders must be earned over the long haul. For a financial group with regulated asset management operations in Switzerland, Germany and the UK, compliance with all relevant laws and regulations, including best practice guidelines, is vital from both a regulatory and a business perspective.

We have built a solid reputation based on a history of transparency and respect towards our stakeholders. Integrity is part of our DNA, and our stakeholders expect it in everything we do. We place great importance on accountability and ethics in our business practices to maintain our good reputation. We adhere to the highest ethical and corporate governance standards, to which every Bellevue employee is contractually obligated. Infringements can lead to disciplinary measures. The existing whistleblower hotline gives internal and external stakeholders the opportunity to identify potential cases.

As an international financial services group headquartered in Switzerland and listed on the SIX Swiss Exchange, we meet the requirements of the Directive on Information Relating to Corporate Governance of the SIX Swiss Exchange as well as all of the national and local requirements wherever we do business.

Bellevue is committed to respecting, protecting and promoting the human rights enshrined in the Swiss Federal Constitution and the European Convention on Human Rights in all its activities.

Training everyone on our staff on relevant compliance topics (including anti-corruption) is an important part of adhering to our compliance requirements. New employees receive compliance training when they join the company. In addition, specific in-person training sessions are held periodically.

We communicate our corporate governance approach to our shareholders, potential investors and the public through our Corporate Governance Report and this Sustainability Report. The following important directives and regulations can also be downloaded from our website:

Rules/Policies	Short description	Last changes	Responsible for content	Implementation
Code of conduct	As a FINMA-regulated manager of collective assets, Bellevue endeavours to comply with all regulatory requirements. In doing so, it adheres to the principles and rules of conduct of the Asset Management Association Switzerland "AMAS".	01/01/2022	For Information purposes to the Executive Committee. Issued by the AMAS	n/a
Compliance policy	Bellevue endeavours to comply with all regulatory requirements at all times and to implement them accordingly. It has an exemplary control and compliance culture, with individual employees leading by example and complying with all applicable laws, regulations and directives at all times	12/13/2021	Legal und Compliance	Executive Committee
Best execution policy	The directive covers the execution principles and the best execution approach in accordance with local regulatory requirements, the Federal Act on Financial Services (FinSA) and Markets in Financial Instruments Directive 2014/65/EU (MIFID II).	11/13/23	Legal und Compliance	Executive Committee
Conflict of interest policy	Bellevue takes the necessary precautions to identify and avoid conflicts of interest in its business activities and to protect investors from disadvantages. The aim is to ensure its reputation as an honest and fair manager of collective assets, to fulfil regulatory requirements and to maintain the trust of clients and business partners.	10/10/2020	Legal und Compliance	Executive Committee
Proxy voting policy	As a responsible and long-term investor, Bellevue supports all measures and initiatives that increase the value of the company in the interests of shareholders and investors in the long term. Management proposals to the AGM are scrutinised with regard to the long-term interests of shareholders as well as environmental and social aspects. Proposals that BAM considers to be contrary to these interests may be rejected in the interests of investors.	06/14/2021	Legal und Compliance	Executive Committee
ESG policy	The directive provides a binding framework for portfolio managers with regard to ethical, responsible and sustainable corporate practices.	06/15/2023	Legal und Compliance	Executive Committee
Whistleblowing policy	Bellevue endeavours to comply with all regulatory requirements at all times and to implement them accordingly. To support this purpose, Bellevue expects its employees to speak up if they know of or suspect behaviour or incidents that violate laws, regulations or internal instructions.	07/14/2022	Legal und Compliance	Executive Committee

Bellevue has a directives system in place, and we disclose these directives to the public. These are reviewed semi-annually with the head of sales and supplemented as necessary or as requested by clients (in RFPs). All regulations and directives are scrutinized annually and adapted if necessary. Regulations are submitted to executive management and are subject to approval by Bellevue's Board of Directors. Directives are approved by executive management case by case. Certification through an online tool provided by ComplySci is issued to employees annually, requiring each individual to understand and adhere to the content at all times. Violations of regulations and directives may have employment law consequences and possibly entail claims for damages.

New employees are informed about regulations and directives upon joining the organization and must confirm their understanding and compliance within one month.

Bellevue recognizes the importance of having and consistently upholding a robust human rights framework, both for Bellevue itself and the investee companies in its investment portfolios. Investments undergo systematic assessment for sustainability risks and human rights violations, with MSCI's ESG data and ratings used for reference. In the event of issues, discussions are initiated with portfolio companies, and investments may be subject to review. Bellevue upholds human rights in its employment policies and practices. Bellevue does not invest in entities responsible for serious environmental damage or human rights violations, or in those subject to targeted sanctions. Due diligence is conducted before making any investment decisions. A Human Rights Directive is scheduled for development and publication in 2024.

Bellevue pledges to prevent incidents related to corporate ethics and integrity as far as possible. In addition, these aspects will be considered in management performance evaluations.

Activities carried out in 2023 to achieve set goals included the following:

- Data protection and market conduct training for all employees
- Team-specific training is mandatory in certain areas (e.g., ESG for all; cross-border for the sales team).
- Annual certification of compliance with all regulations and directives by all employees
- New employees undergo 1-to-1 training, including an explanation of the directives system, followed by confirmation of understanding and compliance.
- Annual reviews of all regulations and directives are conducted, and adjustments are made in-year in response to any changes.

Despite the absence of incidents or major violations in 2023 and 2022, vigilance remains high in this area because potential incidents can have serious consequences.

Anti-corruption

GRI 205-1

GRI 205-2

GRI 205-3

Bellevue is committed to complying with internationally recognized standards, with anti-corruption being a crucial part of our compliance requirements. Effective compliance is the basis for long-term business success and therefore a linchpin of our operations. Bellevue implements comprehensive measures to ensure consistent compliance with laws and regulatory requirements. As part of a Group-wide risk analysis and using appropriate compliance processes, all subsidiaries and business units are checked at least annually for compliance with the law.

A major focus of our risk analysis is identifying risks related to money laundering or funding terrorism, with the aim of avoiding business relationships susceptible to these and other such risks. Additionally, Bellevue avoids establishing relationships with politically exposed persons (PEPs). Any PEP relationships established by way of exception are closely monitored. Compliance adherence is reported to management monthly. Significant cases are presented to Bellevue's Audit and Risk Committee.

In addition to compliance, our Group-wide risk management also covers fraud and cyber risks, encompassing all our locations in the reporting year and the previous year.

The Anti-Money Laundering Unit is part of the Compliance Office. New employees are told about the compliance obligations applicable to them and how they are implemented in day-to-day operations. The Compliance Office keeps employees informed about new rules and their consequences. All Bellevue employees, including the Board of Directors, are regularly required to complete e-learning modules in the area of cyber security, including anti-corruption and data privacy.

There were no cases of corruption or suspicious activity reports to the Money Laundering Reporting Office Switzerland («MROS») in the 2023 and 2022 fiscal years. Despite no incidents being recorded in either fiscal year, this is still a pivotal issue as a potential incident can have serious consequences.

Corporate Governance

GRI 2-9

GRI 2-10

GRI 2-11

GRI 2-17

GRI 2-18

Bellevue Group AG acknowledges that robust corporate governance practices and a clear management structure with clearly defined roles and responsibilities are critical to the company's long-term success. The corporate governance practices of Bellevue Group AG comply with the rules and regulations of SIX Swiss Exchange. We disclose transparent information about our governance practices. This enables our stakeholders to analyze qualitative aspects of the company and supports investors in their investment decisions.

Corporate Governance Directive: As a listed company, we disclose transparent information on corporate governance matters in our annual report in accordance with the Directive on Information relating to Corporate Governance (DCG).

Compensation: A compensation report that is audited by independent auditors contains information on compensation paid to members of the Board of Directors and the Group Executive Board.

Competence: The four-member Board of Directors is an international and interdisciplinary body of experts with profound knowledge in various subjects. A clearly defined, balanced separation of roles and responsibilities between the Board of Directors and the Group Executive Board is an important element of corporate governance. All country-specific legal requirements are adhered to. The issue of sustainability is addressed at every regular meeting.

Please consult the Corporate Governance section for further information on the leadership structure, the composition, the nomination and selection process for the highest governance body, the chair of the highest governance body, the aggregate knowledge of the highest governance body, and the measurement and evaluation of the performance of the highest governance body.

Compliance with laws and regulations

GRI 2-16

GRI 2-25

GRI 2-26

GRI 2-27

Responsibilities for compliance with laws and regulations are clearly assigned at Bellevue. Our employees are informed about their individual duties and responsibilities and receive regular training on legal requirements at least once a year to ensure they possess the knowledge they need to act correctly. There were no significant breaches of laws or regulations in the reporting year or the previous year and no fines were paid or non-monetary sanctions imposed on Bellevue.

If there are critical concerns or cases of suspected violations of legal or regulatory provisions, internal guidelines or ethical standards, employees and third parties have the opportunity to report these incidents anonymously via the external Bellevue whistleblowing platform. Employees can access the whistleblowing tool straight from the start menu of their PCs. Third parties can access it directly via the Bellevue website (using the link in the Whistleblowing Directive). If an incident is reported, the HR department will be notified. The HR department, CFO and/or Head of Compliance agree on how to proceed and which governing body should be involved, depending on the severity. Bellevue investigates every incident brought to its attention. In the last two fiscal years, no incidents were reported by internal employees or third parties via the whistleblowing platform.

If Bellevue receives a customer complaint in writing or by telephone, Compliance ensures that it is dealt with appropriately. Compliance responds to and documents complaints in writing within three working days of receipt. In addition, a «complaints register» log is maintained for all complaints, recording the type and reason for the complaint, date of receipt of the complaint, and complainant's name. If any irregularity is discovered, the necessary steps and optimizations are initiated to prevent a recurrence. If a complaint cannot be resolved to the satisfaction of the complainant, the customer is referred to Bellevue's ombudsman's office, FINOS. Information about the ombudsman's office is provided in the «Legal information» section of the Bellevue website. The Compliance Department always informs the Group Executive Board. The Board of Directors is notified if necessary. The «Complaints» directive is not made public but can be provided at any time at a client's request.

Conflicts of interest

GRI 2-15

Bellevue commits to the transparent disclosure of potential or existing conflicts of interest to ensure that reporting and decision-making are objective and responsible. We have established mechanisms to identify potential conflicts of interest. All employees and members of the Board of Directors are obligated to report conflicts of interest as soon as they become aware of them. This includes personal interests, financial interests, family relationships or other relevant connections that could cause a conflict of interest. Bellevue has issued a «Conflicts of Interest Directive» outlining the company's guidelines for managing conflicts of interest, with the aim of protecting Bellevue's reputation as an honest and fair manager of collective assets and pension fund assets, complying with regulatory requirements and maintaining the trust of clients and business partners. Transactions with related entities or individuals are disclosed in Annex 9 to the consolidated financial statements.

Client data confidentiality

GRI 418-1

The trust our clients place in us is the basis for long-term and successful collaboration and a valuable asset that we prize and prioritize at Bellevue. Protection of client identifying data and compliance with all applicable legal provisions are therefore paramount in our organization. Any privacy breach could have major implications for our business, reputation and client relationships.

We mitigate this threat with the following measures:

- **Policy:** Our privacy policy can be accessed via the following [link](#), last updated 01.10.2023
- **Training:** Our employees receive regular training on cybersecurity and the importance of protecting client data. All new employees must successfully complete privacy training within three months. Everyone on staff has been trained or retrained within the last two years.
- **Technology:** We use state-of-the-art security technology and procedures to ensure integrity and confidentiality.
- **Risk assessment:** We conduct regular, at least annual, risk assessments to identify and proactively address potential vulnerabilities. We identified no losses of client data in fiscal years 2023 and 2022, and no sanctions were imposed by any authorities for breaches of client privacy or client data losses.
- **Compliance:** Adherence to legal provisions governing protection of client data (including the various data protection regulations and laws) is imposed and monitored by the cross-functional Legal & Compliance and IT departments. Checks conducted in 2023 revealed no significant vulnerabilities in terms of privacy breaches.

Consult our website for more details on how we collect and process personal data.

ESG reporting

Bellevue Asset Management AG became a signatory to the United Nations Principles for Responsible Investment (UN PRI) on August 19, 2019. PRI reporting is the world's largest responsible investment reporting project. It was developed with investors for investors. Reporting on our sustainability efforts and our goal progress is one of the UN's six Principles for Responsible Investment (PRI) and such disclosures are a high priority.

We fulfill our ESG reporting responsibilities as follows in the interests of our stakeholders:

Investment fund fact sheets

Monthly updates are published for the various investment funds containing information on key ESG data, in addition to information on portfolio activity and performance. As of the year under review, we have also published ESG-specific fact sheets for our investment funds. These contain information on ESG research coverage, ESG rating ranges, ESG rating trend, CO₂ intensity, and contributions to the UN Sustainable Development Goals at the portfolio level of each fund. The ESG fact sheets are published on a quarterly basis and have been well received by our clients.

Proportion of sustainable investments

Asset allocation in accordance with EU SFDR 2020/858 RTS Level 2 - net invested fund assets are classified as sustainable investments that promote environmental or social characteristics (in compliance with global standards, while also adhering to the principles 'do no significant harm' and 'to good governance' (see graph). The proportion of investments that pursue a sustainable objective is calculated based on the threshold approach. In this method, if a company is positively aligned with a UN SDG (net score >= 0) and below target approach we will consider as a sustainable investment that contributes to an environmental or social objective.

Quota sustainable characteristics

Investments with sustainable characteristics: 88.0%

Quota sustainable investments

Sustainable investments (art. 2 / Jan. 17 EU SFDR): 62.0%

Other investments with sustainable characteristics: 26.0%

Cash, forwards, etc.: 0.0%

Positive contributions of the sustainable investments to the UN SDGs

The UN SDGs that receive a positive target contribution from the proportion of sustainable investments are highlighted in color.

Bellevue website

On our website www.bellevue.ch we have created a sustainability section that details our ESG approach at both the corporate and portfolio level. Progress toward our ESG goals and other news concerning our sustainability efforts are updated on a continual basis. Information about the latest regulatory requirements (EU SFDR / MiFID II sustainability preferences) is also available in this section.

UN Principles for Responsible Investment (PRI) reporting

The UN PRI reporting must be completed every year. This reporting ensures accountability and transparency regarding the responsible investment activities of the UN PRI signatories and supports dialog among and within the signatories' organizations as well as with their clients and other stakeholders. The latest report can be viewed on our website or directly on the UN's PRI website.

Internal ESG reporting

ESG reporting on every investment strategy is presented to executive management and the Board of Directors on at least a quarterly basis for review and the aforementioned bodies may formulate specific measures based on the information reported.

Economic performance

GRI 3-3

GRI 201-1

GRI 201-2

GRI 201-3

GRI 201-4

As a pure-play, specialized asset manager with a particular focus on the healthcare sector and other promising growth strategies, Bellevue pledges value creation for customers and shareholders. Our entrepreneurial business model is straightforward, clear and highly scalable. Our financial profile is robust and low-risk.

Financial solidity and long-term profitability are the qualities underpinning Bellevue's reputation as a reliable and value-adding partner for all its stakeholders.

The organization's sound economic performance enables Bellevue to invest in infrastructure and employee development, provide long-term profitability for shareholders, and be a responsible corporate citizen that gives back to the community through tax payments and support for charitable causes, culture, and sports.

Overall responsibility for economic performance lies with the Board of Directors and the Group Executive Board. Long-term goals and performance records are available in the [Business Report](#) and [Consolidated financial statements](#) sections of our website.

The economic value directly generated and distributed for 2023 is made up as follows:

Bellevue creates sustainable value for its clients, the supply chain, and other stakeholder groups. The company contributes significantly to the state (taxes), employees (compensation and social insurance contributions), shareholders (dividends), and suppliers and service providers (purchased goods and services). A portion of the generated value is retained in the company for future investments.

Further details on pension expense and liabilities are provided in [appendix 3.8](#) of the consolidated financial statements. For information on the financial implications of climate change for the company, please refer to the [TCFD section](#). Bellevue did not receive any financial support from the public sector in the fiscal years 2023 and 2022.

Employee development and retention

GRI 3-3

For a service company like Bellevue, employees are the most critical asset for long-term success. High employee engagement and strong identification with the company underpin our success. We foster a strong entrepreneurial culture with flat hierarchies, high self-responsibility, and flexibility in terms of working hours, workload and work location. The historically low voluntary turnover rate and high average length of service are testimony to strong employee identification with the company.

The value Bellevue creates for clients is inseparable from the expertise, motivation and high identification of Bellevue employees with the company, so we attach great importance to selecting the right kind of talent. The suitability of a candidate is typically evaluated in a process involving multiple selection stages and assessments, with special consideration given to soft skills such as teamwork and compatibility with company values, in addition to professional expertise. From an employee perspective, the manageable size of the company and resultant ease in establishing personal connections is a major success factor. Discrimination by criteria such as age, background and gender is not acceptable.

Our goals:

- Bellevue aims for a voluntary turnover rate of under 10%
- Bellevue also aims for an employee survey response rate above 80%

In fiscal 2023, the voluntary turnover rate rose to over 10%. The increase was driven by various factors, including long-term employees seeking new challenges elsewhere and strategic decisions prompting some employees to leave Bellevue in 2023. For 2024, we expect the turnover rate to return to levels seen in previous years.

The last employee survey took place in 2022. Findings from the last survey were addressed by measures implemented in 2023 (see «Employee engagement» for further details). The next employee survey is planned for 2025.

Employment

Part-time employees at Bellevue enjoy the same social insurance benefits as full-time employees. All permanent employees are given the option to increase their pension contributions. Pension contribution rates can be changed once every calendar year. In fiscal 2023, 8% of employees made use of this opportunity. Since Bellevue is not a party to any

collective bargaining agreements, the terms and conditions of employment for its employees are not affected by such agreements.

In fiscal 2023, a total of 10 employees were hired across all regions.

Number of new hires	2023	2022	2021
Switzerland	6	13	7

Training and education

GRI 404-1

GRI 404-2

GRI 404-3

As a highly specialized investment boutique, Bellevue employs dedicated, reliable, and well-trained staff who stay current and upgrade their skills. The company supports its employees in maximizing their development potential by providing an environment and tools that foster personal and professional growth and continuing education at all levels and in all areas of responsibility. Through regular employee performance and career development reviews (MBO approach), individual profiles are identified and strengthened by targeted measures such as specialist education, leadership and management training, upgrading of skills in various work techniques, internal and/or external IT training, and language courses.

The company distinguishes between two career paths: «executive» and «expert». These are considered to be of equal value and can be pursued complementarily based on personal aptitude. Potential employees suited for an executive career undergo a management development program to prepare them for their future role.

Every employee has a formal, structured annual review to evaluate their progress, discuss individual career development measures and define next steps, with the emphasis on evaluating individual education opportunities. Bellevue covers a significant portion of the costs and, if necessary, provides paid time off for training.

Bellevue does not yet have consolidated data on the average number of training and education hours per employee. A process is being implemented to disclose these figures starting from the 2024 fiscal year.

Training and education was provided as follows in 2023:

- **Cyber security:** All Bellevue employees are required to complete online cyber security courses.
- **Sustainability:** Employees received training on CO₂ emissions, through presentations by external experts (Swiss Climate) and other means.
- **Compliance:** The following internal compliance training courses were organized for employees: Code of Conduct (portfolio managers), Cross Border Sales (Sales Switzerland), new Swiss Data Protection Act (all employees in Switzerland), creation of marketing documents (Sales, Marketing and Product Management) as well as general compliance/ internal directives training (all new employees).
- **External training:** Five employees of the Private Markets unit attended a refresher course to renew their registration as consultants in the Register of Advisors. Two employees have started or completed training to become CFA.
- **Executive career path:** In 2023, 7 people attended a management training program consisting of various modules and individual coaching inputs.

Employee engagement

In 2022, Bellevue carried out a group-wide employee survey for the first time. This was done in cooperation with iCommit, an independent research firm. The aim was to measure employee satisfaction and any attendant need for improvement. The results were discussed by the Group Executive Board, then at team level with employees. Specific action points

were defined jointly with the employees so that improvements can then be brought about. The following topics were addressed in 2023:

Employee information channels

In order to address employees' increased need for internal information updates, a total of 4 quarterly employee information events were held in 2023. Besides the latest operating results, information is given about specific products, new developments, the projects being developed and pursued by individual teams and so on. The presentations are prepared in collaboration with the directly involved employees, which gives them an opportunity to present their specific tasks and related challenges in their own words.

Employee development

Due to Bellevue's flat organizational hierarchy, employee development activities focus more on advancement as an expert and less on the executive career path. In addition to the annual review, employees have opportunities during the year to suggest and pursue suitable training and education initiatives (see «Training and education» for further details).

Collaboration between executive management teams

Due to its historically and geographically diverse structure, Bellevue operates with multiple executive management teams. A level of merging and consolidation has now taken place, and interaction has been stepped up through regular meetings.

For further information on the 2022 employee survey, please consult the 2022 sustainability report.

Employee bonus programs

In the spirit of identification with the company and the entrepreneurial activities of each employee at his or her level, we give employees across all hierarchical levels a share in the success of the company.

The compensation system for Bellevue employees is conceived to motivate employees at all operating units to strive for excellence. This is «entrepreneurial compensation with commitment» – a meritocratic model. It comprises an attractive entrepreneurial profit-sharing bonus as variable compensation. This profit-sharing bonus is directly linked to the operational financial performance of Bellevue Group. In addition, part of this variable profit-sharing bonus is paid out in the form of blocked shares and stakes in the products we manage (we believe in «eating our own cooking»). This approach promotes a long-term high-performance culture. Further information is disclosed in the annual compensation report.

Furthermore, Bellevue periodically offers an employee share ownership program. The Board of Directors approves a voluntary employee stock ownership plan on an annual basis under which employees are entitled to purchase shares of Bellevue Group at a discount to the market price.

Diversity and inclusion

GRI 3-3

GRI 405-1

GRI 405-2

GRI 406-1

Bellevue provides equal employment and advancement opportunities to all individuals regardless of age, race, gender, sexual orientation, disabilities, religion or other characteristics, as laid down in its internal employment regulations. We therefore benefit from a diverse workforce and the competitive advantages that offers: With their different perspectives and approaches, experiences, ideas and skills, employees inspire and learn from each other. This, in turn, enhances the company's creativity, innovation and success.

We foster a culture of gender equality and promote a balanced mix of gender and age across all hierarchical levels and functions of the company. Employee compensation is periodically reviewed (every 2 years) for unjustified differences and adjusted if necessary.

Both genders should be represented on the Group Executive Board and on the Board of Directors. Discriminatory behavior will not be tolerated and improper conduct will be punished by line managers. To that end, a whistleblowing policy was approved and an internal reporting system created in 2022.

The diversity and equity highlights of 2023 are as follows:

- With the election of Barbara Angehrn Pavik as a new member of the board, the female proportion of the Board of Directors rose to 50%.
- In August, an analysis was carried out using the Swiss government's standard salary analysis tool («Logib»). No gender pay gap was identified.
- To date, no complaints or reports of discrimination have been submitted through the aforementioned whistleblowing or internal reporting system.

The following tables provide a breakdown of diversity by employee category. The figures refer to the actual number of employees as of December 31 of the respective year.

Diversity – Board of Directors	2023	2022	2021
Male	50%	75%	75%
Female	50%	25%	25%
>50 years	75%	100%	100%

>50 years	35%	31%	30%
30 - 50 years	63%	62%	65%
<30 years	2%	7%	5%

Climate change

GRI 3-3

Bellevue recognizes that climate change, if left unchecked, will have negative effects on the environment, on society and on the world economy. We actively support the transition to a low-carbon and climate-resilient economy and are committed to making a positive contribution to climate change mitigation. Bellevue has integrated sustainability and climate-related aspects into the risk management processes that govern its business operations and assesses the actual and potential impacts of climate-related risks and opportunities on its business activities and financial planning. These risks and potential impacts are reported to the Board of Directors on an annual basis.

Since Bellevue does not operate in a carbon-intensive industry, the impact of climate change on its business activities is rather small. Climate change does, however, have a major impact on investment product regulations and transparency requirements, and Bellevue must meet these requirements in order to continue offering attractive products going forward. Please refer to the material topic of «Responsible investment» for further information.

The Bellevue has set the following goals with respect to climate change mitigation:

- 30% reduction in carbon emissions per FTE by 2030 (Baseline year: 2020 adjusted for COVID-19 effects on commuting/remote work/business travel)
- Reduction of carbon emissions from business travel and commuting
- Net zero by 2050 in compliance with applicable law

Business travel and commuting travel are the two main sources of our carbon emissions. The emissions data for 2019 adjusted for the impact of COVID-19 was used as the baseline for the carbon reduction goal. In the initial phase of the «post-COVID period», the annual reduction targets were exceeded by a significant margin. 2023 was the first year in which travel activity increased again. Nevertheless, Bellevue is still on target to achieve the targeted reduction per FTE by 2030. In order to raise employee awareness of carbon emissions, a training course taught by a climate expert was organized in 2023.

Bellevue has published a section with information regarding the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) in its ESG report for the first time. It provides an overview of Bellevue's efforts to address climate change and how it is managing physical risks and the risks and opportunities arising from the transition to a low-carbon and climate-resilient economy.

Emissions

GRI 305-1

GRI 305-2

GRI 305-3

GRI 305-4

GRI 305-5

GRI 305-6

GRI 305-7

Bellevue has produced a greenhouse gas inventory since 2021. This is calculated in accordance with the requirements of the ISO 14064-1 standard and the accounting principles of the GHG Protocol. All figures comprise all «Kyoto greenhouse gases» (CO₂, CH₄, N₂O, HFCs, PFCs, SF₆, NF₃) and are reported as units of CO₂e (CO₂ equivalent). Bellevue does not burn biomass to produce electricity and/or heat.

The normalized GHG inventory data for 2020 is used as a reference to assess the effectiveness of the measures implemented within the scope of our climate policy and to track improvements in the company's carbon balance. Due to the far-reaching impact of the COVID-19 pandemic, the 2020 carbon balance was not chosen as the baseline carbon balance, instead the data from the commuting and business travel categories was normalized. Under commuting travel, the assumed share of teleworking was 0%. Under business air travel, it was assumed that the number of kilometers flown in the various travel classes is a linear function of air travel costs. The number of kilometers flown was extrapolated based on average air travel expenses for 2018 and 2019.

At Bellevue, the organizational boundaries are determined by operational control and the assets and activities subject to operational control are included within the system boundaries.

Total emissions (in t CO ₂ e)	Base year ¹⁾	2023	2022	2021
CO ₂ e-emissions scope 1 ²⁾	32	10	21	27
- Heating	27	7	15	23
- Business trips	5	3	6	4
CO ₂ e-emissions scope 2 ³⁾	44	23	20	28
- Electricity	26	15	12	16
- Heating	18	8	8	12
CO ₂ e-emissions scope 3 ⁴⁾	725	575	576	193

- Business trips	499	468	396	98
- Commuting	186	90	152	57
- IT equipment	14	2	7	18
- Other	6	5	7	5
Total CO₂e-emissions	801	608	617	248
CO₂e-emissions/full-time position	8.2	6.1	6.2	2.7

¹⁾ Baseline year: 2020 adjusted for COVID-19 effects (on commuting/remote work/business travel)

²⁾ Scope 1: Direct greenhouse gas emissions

³⁾ Scope 2: Indirect greenhouse gas emissions from externally sourced energy

⁴⁾ Scope 3: Energy supply (emissions arising from the use of energy not covered by Scope 1 or 2): Business travel (external vehicles), commuting, IT equipment, paper, print jobs, waste, water

Bellevue does not emit significant amounts of ozone-depleting substances, nitrogen oxides (NOx), sulfur oxides (SOx) or any other air pollutants.

As it is active in the financial sector, its Scope 1 and Scope 2 emissions are rather low. Areas of focus are heating, electricity and business travel with company cars. Most of its CO₂ emissions relate to Scope 3 emissions and are mainly attributed to business travel and commuting. In 2020 and 2021, action to prevent the spread of the coronavirus led to a sharp reduction in business air travel (air travel) and commuting travel. From 2022 on, CO₂ emissions in these two areas has increased significantly, but are still below pre-pandemic levels.

Bellevue has been working with Swiss Climate since 2020 to calculate its carbon CO₂ emissions and to develop measures to reduce them. Up to and included 2023, Bellevue has received the highest level of certification from Swiss Climate (a pioneer with exemplary, holistic carbon management solutions). By purchasing carbon credits in an amount equivalent to our annual greenhouse gas emissions, we support projects that reduce or remove the same quantity of emissions released into the atmosphere. We have decided to offset our carbon emissions through a project focused on «climate protection and sustainable forest management in Switzerland». The project ensures CO₂ storage and sustainable management of 7 279 hectares of forest in the canton of Schwyz. This protects the climate, preserves biodiversity in Swiss forests and enables the production of timber for renewable energy production.

Since the first publication of its greenhouse gas inventory, Bellevue has striven to reduce its greenhouse gas emissions. Currently available data does not allow it to measure the direct impact of its efforts. These efforts can only be analyzed on an aggregate basis per category. The reductions achieved in the individual categories compared to the baseline year can be summarized as follows:

- **Business travel**
Total distance traveled by air has been reduced by 15% (or 210 014 km). This led to a decline in emissions of 36 t CO₂. Motor vehicle travel increased by 14% (or 5 324 km) over the same period. This led to an increase in emissions of 1 t CO₂e. Travel by public transport increased by 208% (84 509 km). Consequently the share of sustainable business travel has increased from 3% to 10%.
- **Commuting travel**
Commuting emissions were reduced by 52% (or 97 t CO₂e) due to the widespread use of teleworking arrangements. The share of sustainable commuting travel was increased from 49% to 71%, which is well above the Swiss average.
- **Electricity**
Bellevue's transition to 100% renewable electricity has reduced electricity emissions by 44% (14 t CO₂e). 78% of the electricity consumed now comes from clean energy sources.

Mobility

All of our offices are easily accessible by public transit. Employees are requested to use public transit to commute to work. We actively encourage this by offering financial incentives. Employees must pay to use a parking space at company locations. Showers and changing rooms are available at company headquarters, which makes commuting to work by bicycle an attractive alternative. With the relocation of company headquarters from Küsnacht to Zurich City in 2025, access to public transportation will become even more attractive. We expect this will lead to a significant reduction in commuting emissions.

International contacts are important given our global investment strategies and distribution activities with employees at different locations. All locations have video conferencing infrastructure. Most of the meetings are through telephone and video conferencing instead of physical meetings to limit travel. Where possible and appropriate, we substitute air travel with public transportation such as train travel and coordinate joint site visits.

The Group Executive Board is regularly informed about the travel activities of the employees.

Key climate-relevant memberships

GRI 2-28

Bellevue is a member of various organizations and a signatory of various investor initiatives as part of its active engagement to promote sustainability for the benefit of the planet. The following memberships and collaborations are climate-relevant:

- Signatory of the United Nations Principles for Responsible Investment (UN PRI) (08-2019)
- Member of Swiss Sustainable Finance (11-2022)
- Certification by Swiss Climate (from December 2021)

Signatory of:

Sustainable Development Goals (SDGS)

The UN Sustainable Development Goals are the centerpiece of the Agenda 2030 adopted by the United Nations in autumn 2015. They define the social, economic and environmental milestones that are to be jointly achieved on a worldwide basis by 2030. Companies can make a crucial contribution to the Agenda 2030. Bellevue takes its responsibilities seriously and its sustainability management and core business are aligned as closely as possible with the SDGs.

Four SDGs play a central role: quality education (4), gender equality (5), decent work and economic growth (8) and climate action (13). It is in these areas that Bellevue can have the greatest impact at company level.

Source: MSCI ESG Inc.

Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Bellevue supports the training and development for all employees and promotes lifelong learning. For further information, please consult the section on [Employee development and retention](#).

Goal 5: Achieve gender equality and empower all women and girls

Bellevue fosters a culture of gender equality and promotes a balanced mix of gender and age across all hierarchical levels and functions of the company. For further information, please refer to the section on [Diversity and inclusion](#).

Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Bellevue offers attractive, family-friendly working conditions, promotes diversity, has established competitive pay policies with equal pay for women and men, and is committed to training and education for its employees. For further details, please refer to the sections on [Economic performance](#), [Employee development and retention](#) and [Diversity and equity](#).

Goal 13: Take urgent action to combat climate change and its impacts

Bellevue ensures that responsible corporate environmentalism contributes to reducing carbon emissions. The remaining emissions are offset by purchasing carbon offsets equal to the annual greenhouse gas emissions. Further information can be found in the section on [Climate change](#).

Climate-related Financial Disclosures (TCFD)

About this Chapter

This chapter describes Bellevue's progress towards implementing our climate change commitment in accordance with the Swiss regulation and global best practice standards. It serves as a summary and overview on our endeavours in advancing how we manage climate-related risks and opportunities. Bellevue recognizes that climate change poses a significant risk to society, nature, our business, our customers and partners. Our goal is to support the economy-wide transition to net zero with our ongoing climate engagement at corporate as well as at the level of our investment portfolio. A transition to a net zero future yields not only environmental but also long-term financial benefits for all our stakeholders including our clients, shareholders, employees and society in general.

This chapter has been prepared in accordance with the Swiss Federal Council's adopted ordinance on mandatory climate disclosures for large Swiss companies and thus, the binding implementation of the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). As a medium-sized enterprise, Bellevue is not obliged by the Ordinance on Climate Disclosures to publish a TCFD report. Nevertheless, as a responsible investor committed to the goals of the Paris Agreement, we have sought to incorporate the requirements laid out in the articles of the Ordinance on Climate Disclosures, the recommendations of the TCFD (2017), the cross-sectoral and sector-specific guidance outlined in the TCFD Implementation Guidance (2021) and, where possible and appropriate, the «Guidance on Metrics, Targets, and Transition Plans» (2021).

¹⁾ See communication by Federal Council on bringing the ordinance on mandatory climate disclosures for large companies into force as of 1 January 2024.

²⁾ Final Report – Recommendations of the Task Force on Climate-related Financial Disclosures, June 2017.

³⁾ Implementing the Recommendations of the Task Force on Climate-related Financial Disclosures, October 2021.

⁴⁾ TCFD Guidance on Metrics, Targets, and Transition Plans, October 2021.

Governance

A) DESCRIBE THE BOARD'S OVERSIGHT OF CLIMATE-RELATED RISKS AND OPPORTUNITIES

Climate-related opportunities and risks can potentially affect all areas of Bellevue and its business – in terms of our own business activities as well as the investments (portfolio level) – hence the fact that ultimate responsibility for this issue lies with Bellevue's Board of Directors (BoD).

The BoD has ultimate responsibility for sustainability (including climate- and ESG-related matters). It approves the Group's sustainability and climate strategy and plan. The BoD is informed and decides upon climate-related matters, such as goals and targets (including performance objectives), strategy, internal organisation, major plans of action, monitoring implementation and performance, risk management, and associated major capital expenditures (including acquisitions, and divestitures).

As the highest authority for strategic issues, the BoD is informed quarterly by the Group Executive Board and/or the ESG Working Group (management function) about measures and

progress in the areas of sustainability and climate and is involved in the decision-making process.

The Audit & Risk Committee (ARC) oversees risk management activities for the company, including those associated with climate. It examines whether all systems created to monitor compliance with legal provisions are appropriate and whether they are being applied properly, and guides and monitors Bellevue's risk policy and profile, which covers climate-related risks amongst other topics. Other Board-level committees further integrate ESG including climate-related considerations into their agendas and mandates. The ARC reports to the BoD and makes recommendations to the same via the Group Executive Board. The ARC is regularly informed by Risk Management (management function), including on climate- and ESG-related risks.

B) DESCRIBE MANAGEMENT'S ROLE IN ASSESSING AND MANAGING RISKS AND OPPORTUNITIES

The Group Executive Board is the highest management body in matters of sustainability and is responsible for the sustainability strategy, including climate. Within the Group Executive Board, sustainability is headed by the Group CFO, in collaboration with the CFO of Bellevue Asset Management AG. To this end, the Group Executive Board defines climate-related operational objectives and approves the implementation plans. The Group Executive Board is responsible for managing risks and ensures that the risk assessment process is conducted in an encompassing manner. It is also responsible for the enactment of the relevant directives for risk assessment, risk management and risk control and the adequacy of the internal control system. This assessment is driven by a yearly strategic risk review. The Group CFO (at the same time CRO) is responsible for any risk control activities and leads the compliance department.

The ESG Working Group is responsible for coordinating and managing the measures at Group level. It monitors the latest developments on the sustainability and climate front and anticipates their impact on the business model of Bellevue Group. It supports the Group Executive Board with formulating and developing the sustainability strategy. The Group Executive Board ensures that the defined focal points of the Group-wide sustainability strategy are integrated and implemented in the divisions. The ESG Working Group also ensures that the Group Executive Board is involved as a steering body, reports on progress and liaises with key stakeholder groups at Group level.

The organization of the ESG Working Group is based on the Bellevue Group organization and is made up of sustainability officers from the various departments and teams. The ESG Working Group is led by a co-management team. This consists of one corporate and a product representative. The sustainability managers of the departments/teams ensure that the Group-wide sustainability and climate strategy is implemented through corresponding measures and initiatives, considering local regulatory requirements. It also initiates and supports relevant ESG training courses together with the ESG managers of the departments/teams.

The management of the ESG Working Group reports to the Group Executive Board on a quarterly basis. This in turn reports to the Board of Directors on a quarterly basis. In the event of urgent matters, the Group Executive Board should be informed immediately by the chairperson of the ESG Working Group.

The portfolio management team is responsible for implementing the investment strategy, with a focus on sustainability and climate themes as well as overarching principles and policies. It is also responsible of calculating and managing the financed emissions of our portfolio.

Strategy

A) DESCRIBE THE CLIMATE-RELATED RISKS AND OPPORTUNITIES THE ORGANIZATION HAS IDENTIFIED OVER THE SHORT, MEDIUM, AND LONG TERM

Bellevue places great emphasis on environmental and climate protection. We consider the wide-ranging impact of climate change on its own business, shareholders, customers, and partners. We endorse and are committed to the goals of the Paris Agreement. We can play our part in achieving them through the way we structure our portfolios, as well as by analyzing climate-related risks and showing how they influence our investment decisions. Naturally, we apply exclusions for controversial industries (e.g. fracking/oil sands, thermal coal), maintain an active dialog with companies or other stakeholders regarding their climate strategy, and exercise our voting rights. We have worked to embed climate-related considerations into our group-wide sustainability strategy. To accelerate the pace of our own climate action and the support for our customers in an orderly transition to net zero, we have identified the relevant climate-related opportunities for our business model and assessed associated risks over short, medium, and long term.

We have applied the TCFD recommendations to identify climate-related physical and transition risks and opportunities that may not only influence our overall reputational standing but also our market, operations and regulatory exposure or financial outcomes. The identification of the relevant risks and opportunities was performed by an interdisciplinary group of executives from management, the heads of relevant departments (sustainability, strategy, finance, controlling, communication) and selected subject-matter experts. The process was mediated and supported by an external consulting company (Swiss Climate).

Our major priorities for future climate-related opportunities are anchored in the following streams:

- Clean operations:** We are committed to reduce the carbon footprint from our own operations to support the goals of the international and Swiss community that aim to attain net zero greenhouse gas emissions by 2050. We have set clear targets to reduce our operational emissions and assess our direct and indirect emission from Scope 1, Scope 2 and operational Scope 3 categories (mainly: business trips, employee commuting, IT equipment, paper and printing, waste and water) as well as Scope 3 financed emissions. The decarbonization targets are outlined in the section Metrics & Targets c). We outline our measures to reduce the carbon footprint and communicate on our short-, medium- and long-term climate targets transparently. For example, at Bellevue's headquarters in Küsnacht, the building as well as the premises of our data centres are heated and cooled with natural lake water. When procuring electronic devices such as computers, monitors, printers, etc., we make sure to use energy-efficient equipment. Wherever possible, power consumption settings are configured to automatically switch IT equipment – whether entire groups of systems or individual devices – to stand-by mode at certain times. The buildings are only lit when they are in use. We use additional energy consumers such as air conditioners or radiators only for extreme external weather conditions. Our locations are very easy to reach by public transport. Employees are motivated to travel by public transport. We actively support this through financial incentives. Parking spaces are not

subsidized and are charged at full market rates. Showers and changing rooms are available at company headquarters, which makes commuting to work by bicycle an attractive alternative. Public transport options will become even more attractive when the head office is relocated from Küsnacht to central Zurich in 2025. International contacts are important given our global investment strategies and distribution activities with employees at different locations. All locations have video conferencing infrastructure. Most of the meetings are through telephone and video conferencing as a substitute for physical meetings to limit travel. Where possible and appropriate, we substitute air travel with public transportation such as train travel and coordinate joint site visits.

- **Low Carbon Investment Portfolios:** Bellevue invests mainly in healthcare industries, thus we contribute to the well-being of millions of people throughout the world. We also contribute to improving the medical research and technological improvement in the healthcare sector. When investing, we take special care to select firms, which have limited impact on the environment and that have a clear climate transition plan in place. For example, the first calculation of the carbon intensity of our financed emissions at portfolio level in 2023 revealed that Bellevue is not heavily invested in climate-sensitive sectors. Using the WACI (Weighted Average Carbon Intensity) methodology, we were able to analyze our different funds and we have determined the funds that were more carbon intensive than others. We aim to increase the proportion of low carbon investments over time. This allows us to manage the future carbon intensity of the portfolio in a direction that reduces the carbon intensity (see section on Metrics & Targets). We are committed to adhering to internationally recognized norms and systematically exclude from the managed investment portfolios any companies that seriously harm the environment and climate. No investments may be made in companies that are implicated in serious environmental issues. Compliance with the principles and guidelines of the UN Global Compact and the UN Principles for Responsible Investment (UN PRI) serve as an indicator in such cases. ESG factors, including climate-related factors, are integrated into the fundamental analysis of every company through an ESG integration process in which the associated financial risks or opportunities are evaluated with respect to future stock market performance. This approach gives our portfolio managers a holistic picture of an enterprise. Within the scope of our ESG integration approach, strict exclusion criteria are applied and climate-related factors are an integral part of our fundamental research and analysis across all portfolios and funds. At the same time, our experts strive to build climate-friendly portfolios and they maintain an active and constructive dialog on ESG aspects with company executives and relevant stakeholders. In 2023, a dedicated focus on climate-related metrics in our ESG integration process to measure and manage carbon intensity has been established. For example, the environment sub-category focused on aspects such as whether a company systematically measures its carbon footprint and discloses the related data. A system of ESG ratings forms the basis by which sustainability and climate-related criteria are integrated into the asset manager's investment decision process. Every issuer of securities in its investment universe is assigned an ESG rating based on various sub-scores. These scores are based on data from independent third-party providers MSCI ESG Research and Morningstar Sustainalytics. Bellevue believes in the importance to interpret ESG scores with caution and a critical eye. Most ESG rating methods are based on a predefined systematic approach that does not always result in an objective or «fair» assessment of risks. In fact, such methods often systematically disadvantage start-ups and small cap companies relative to large cap companies. A lack of manpower and experience in handling ESG issues can result in a company being underrated. That is why our portfolio managers always take a closer look at potential or ostensible «ESG laggards» (CCC, B rating) and reach out to the ESG specialists at our external ESG research providers and at the companies with lagging ESG ratings. Investments in «ESG laggards» must be documented in detail. Bellevue does not apply a «best-in-class» approach for the reasons mentioned above, unless otherwise dictated by a specific investment strategy.
- **ESG Stewardship:** Bellevue acts as a responsible long-term investor on behalf of its clients. We believe that the enduring influence of climate risk can be impacting businesses and economies worldwide. While the impact may vary across sectors and geographical locations, we consider this transition a significant investment factor with the potential to

significantly affect numerous companies. To that end, we consider ESG Stewardship a fundamental tool to effectively investing in and promoting sustainable enterprises. Sustainable financial investments and services not only help reduce investment risks, but also positively support desired economic, societal and environmental changes. Bellevue integrates ESG Stewardship into its investment processes to promote a more sustainable and value-enhancing economy, and also to help increase the long-term return for our clients, adjusted for sustainability and climate risks. For example, in 2022, Bellevue established a proprietary tool in which ESG engagement activities are systematically recorded and subsequent developments documented over time. During the financial year 2023, Bellevue led a total of 32 ESG engagements (22 in 2022), out of which 6 were related to climate and/or environmental issues. Bellevue is firmly committed to the UN Principles for Responsible Investment (UN PRI) and continuously adapts its ESG investment guidelines to reflect the latest findings, including on climate-related aspects. For the near future (see section on Metrics & Targets), Bellevue's ambition is to be compliant with the Swiss Stewardship Code, drawn up by the Asset Management Association Switzerland and Swiss Sustainable Finance, which provides recommendation and guidance for integrating stewardship into investment processes. The Code includes nine stewardship principles – governance, stewardship policies, voting, engagement, escalation, monitoring of investee entities, delegation of stewardship activities, conflicts of interest, transparency and reporting – and describes the most important elements for effective and successful implementation.

While changes associated with a transition to a lower-carbon economy presents substantial opportunities to Bellevue, they also create significant climate-related risks for the organization. We have identified the following major climate-related risks for our business model:

- **Strategy risk:** Strategy risk(s) arises due to climate-related market developments such as increasingly changing behaviour of current and future customers concerning climate-friendly investments. Relating thereto are potential untapped strategic opportunities (see climate-related opportunities) if realized by competitors, which may lead to losses in market share or lower revenues from transition savvy clients. This risk is mostly related to our sustainable product/investment offerings, such as a lack of climate-friendly ESG investment solutions and related loss of clients/market share.
TCFD risk category: Transition risk – Market
- **Reputation risk:** Bellevue is exposed to reputation risk related to climate change due to increased stakeholder concerns, e.g. through rating agency channels (e.g. S&P ESG Rating), clients or shareholders. The reputation risk is tied to changing customer or community perceptions of Bellevue's relative contribution to or detraction from the transition to a low-carbon economy. The risk is thus directly related to Bellevue's current and future climate engagement and measures to realize its transition plan, such as the relative speed and magnitude of Bellevue's transition in comparison to peers and other market participants (or rather the transition of Bellevue's AuMs).
TCFD risk categories: Transition risk – multiple (Policy and Legal, Reputation)
- **ESG (Compliance) Risk:** A compliance risk may emerge for Bellevue if existing and emerging regulatory requirements are not met by the Company. Bellevue has identified two types of climate-related compliance risks:
 - Type 1: Policy actions that attempt to constrain actions that contribute to the adverse effects of climate change or policy actions that seek to promote adaptation to climate change.
 - Type 2: Legal risk in the form of litigation in case of «non-adherence» with law/regulation or if climate-related litigation claims are being brought forward.
 Direct consequences may be additional compliance efforts for internal processes and reporting (increased internal cost), and potential litigation cost.
TCFD risk category: Transition risk – Policy and Legal
- **Market risk:** Climate-born market risk may adversely affect the performance of Bellevue's investment portfolio and strategies (including default of a company in the investment

portfolio). Market volatility or capital market fluctuations may occur due to technological progress (e.g. due to the substitution of lower emissions services/goods) and/or market-side developments (e.g. due to changes in customer demand/preferences).

TCFD risk categories: Transition risk – multiple (Technology, Market)

- **Counterparty (credit) risk:** Counterparty default risk due to climate change for relevant financial institutions such as banks, brokers, custodians is considered rather low (e.g. due to technological progress, changes to policy, legal and market-side developments).

TCFD risk category: Transition risk – Market

- **Physical risk:** Physical risks resulting from climate change mainly materializes in the investment portfolio, for example due to acute or chronic physical risk for a specific company in our portfolio. We consider immediate physical risks to be rather low for Bellevue.

TCFD risk category: Physical risk – Acute, Chronic

An important aspect for organizations to consider is the time horizon for assessing climate-related risks and opportunities. While some of those risks or opportunities may materialize in the short term, others may be of higher relevance in the long-term. Bellevue thus carefully considered the relevant time horizons that are used to evaluate any impact from climate-related issues in alignment with our transition plan. We have defined time horizons consistent with the one mentioned in the Explanatory Report to the Ordinance on Climate Disclosures issued by the Swiss Federal Council on November 23, 2022:

- Short term is 1 – 5 years
- Medium term is 6 – 15 years
- Long term is 16 – 30 years

The above-mentioned time horizons were determined based on considerations on our business activities, existing targets and goals, existing law, emerging Swiss and EU regulations, current market developments and the national and international climate agenda.

In the sections that follow, we provide an overview on the impact of climate-related risks and opportunities for the above mentioned short-, medium- and long-term horizons.

Reference

Annual Report: [ESG - Sustainability strategy](#)

Internal documents: Sustainability guidelines, Sustainability organization regulations

B) DESCRIBE THE IMPACT OF CLIMATE-RELATED RISKS AND OPPORTUNITIES ON THE ORGANIZATION'S BUSINESSES, STRATEGY, AND FINANCIAL PLANNING

The impacts of climate change on Bellevue are driven by the identified climate-related opportunities and risks. Bellevue has assessed the impact of the relevant risks and opportunities on the organization in terms of:

- **Likelihood (Low/Medium/High):** The probability that the climate-related risk might materialize or the climate-related opportunity can be realized in the given time horizon
- **Impact (Low/Medium/High):** Qualitative assessment of the impact on Bellevue in the defined time horizon
- **Time horizon (Short term/Medium term/Long term):** The time horizon in which the impact will occur (earliest possible), in accordance with the relevant time horizons for Bellevue

The results of the assessment are described below:

	Impacts	Probability	Time horizon
Top opportunities			
Clean operations	Low	High	Short term
Low Carbon Investment Portfolios	High	High	Short term
ESG Stewardship	Medium	Medium	Medium term
Top risks			
Strategy risk	High	Medium	Medium term
Reputation risk	High	Medium	Medium term
ESG (Compliance) Risk	Medium	Medium	Short term
Market risk	High	High	Medium term
Counterparty (credit) risk	Low	Low	Medium term
Physical risk	Low	Low	Medium term

The impact assessment was performed by an interdisciplinary group of executives from management, heads of relevant departments (sustainability, strategy, finance, controlling, communication) and selected subject-matter experts. The analysis in terms of impact and likelihood also serves as an indication on our prioritization for future climate-related initiatives, action plans and the relative importance of each stream during the respective time horizon.

Overall, the impact assessment indicates that implementing Low Carbon Investment Portfolios is considered the most material climate-related opportunity for Bellevue in terms of impact. We also consider ESG Stewardship as medium impact opportunity. While the impact for further measures to establish Clean Operations is considered rather low, the likelihood is considered high. The latter also applies for implementing Low Carbon Investment Portfolios.

For climate-related risks, market risks associated with our societies' climate transition are considered most material, both in terms of impact and likelihood. Climate-related risks considered high in terms of impact and medium in terms of likelihood are strategy risks related to climate-related market developments and our ability to offer sustainable product/ investment solutions, as well as reputation risks related to Bellevue's current and future climate engagement and measures to realize its transition plan. Further, climate-related risks considered medium in terms of impact and likelihood are ESG (compliance) risks related to Bellevue's compliance to existing and emerging regulatory requirements. Counterparty (credit) risks as well as physical risks are considered low both in terms of impact and likelihood.

Generally, the fact that all opportunities and risks are expected to materialize or are to be realized in the short to medium term indicates our commitment to our ongoing and future climate engagement. However, climate-related risks with high impact are rather to be expected to materialize in the medium term. This is mainly driven by current market expectations and regulatory developments.

See further details on the process to assess climate-related risks and opportunities outlined in the section Risk Management.

C) DESCRIBE THE RESILIENCE OF THE ORGANIZATION'S STRATEGY, TAKING INTO CONSIDERATION DIFFERENT CLIMATE-RELATED SCENARIOS, INCLUDING A 2°C OR LOWER SCENARIO

We are convinced that our strategy is directly affected by climate-related risks and opportunities. It is for this reason that we have established a transition plan that serves as a blueprint for our own business in the transition to a low-carbon economy. It is our assumption that such a transition occurs in an orderly fashion that is consistent with a 2°C or lower scenario. Targets and measures taken by Bellevue are consistent with this assumption.

Our encompassing identification and impact assessment of climate-related opportunities described under Strategy a)/b) of this report was guided by questions such as:

- How do we believe is our strategy affected by climate-related risks and opportunities?
- Which strategic changes need to be addressed such that these opportunities can be realized, or the risks can be managed?
- What is the impact and relevance of these climate-related issues for our company and business model?
- What is the associated time horizon?

Currently, multiple elements contribute to the resiliency of our climate strategy:

- The top climate-related opportunity (Low Carbon Investment Portfolios) is directly related to Bellevue's investment focus in the healthcare sector. When investing, we take special care to select firms, which have limited impact on the environment and that have a clear climate transition plan in place in line with the Paris Agreement. According to the carbon intensity of our financed emissions at the portfolio level in 2023, Bellevue is not heavily invested in climate-sensitive sectors.
- Bellevue measures its carbon footprint and has set ambitious targets to reduce its emissions over short, medium and long term. The ambitious targets are backed by effective measures to decarbonize our direct and indirect emissions (see section on Metrics & Targets).
- We continuously integrate climate-related risks as a risk driver in our existing risk management framework and the associated processes.
- Diversity in geographic areas in terms of investments and clients, which mitigates both physical and transition risks.

While we have not yet performed a climate-related scenario analysis to assess the resiliency of our strategic considerations under different scenarios, we plan to perform such an assessment in the upcoming years. Any additional regulatory requirements by the Swiss Financial Market Supervisory Authority (FINMA) will be considered in the development of such an analysis.

Risk Management

A) DESCRIBE THE ORGANIZATION'S PROCESSES FOR IDENTIFYING AND ASSESSING CLIMATE-RELATED RISKS

B) DESCRIBE THE ORGANIZATION'S PROCESSES FOR MANAGING CLIMATE-RELATED RISKS

C) DESCRIBE HOW PROCESSES FOR IDENTIFYING, ASSESSING AND MANAGING CLIMATE-RELATED RISKS ARE INTEGRATED INTO THE ORGANIZATION'S OVERALL RISK

Our climate-related risk management framework

In accordance with FINMA's understanding on climate risk management, we consider climate risk as a risk driver to other «classical» financial sector risk categories. Climate-related risks – in the form of physical risks and transition risks – are thus not considered a separate risk category but are rather managed as part of the existing risk management framework. Transition risks driven by technology, policy and legal, market or reputational concerns or chronic and acute physical risks in accordance with the TCFD categorization are managed through the existing processes for managing financial and non-financial risks. The mapping of climate-related risks against our traditional risk categories is disclosed in the section Strategy a).

The existing risk governance is outlined in the section Governance and applies to climate-related risks. As part of the existing risk policy and our framework for risk management and risk control, we have established processes for:

- Risk identification and assessment;
- Risk management and control; and
- Risk reporting and disclosure.

To ensure that climate-related risks are identified, assessed and managed, they are integrated as part of the Group-wide risk policy and in the above-mentioned processes for risk management and risk control.

Risk identification and assessment

We identified the relevant climate-related risks for Bellevue and assessed their impact as part of the encompassing analysis outlined in section Strategy a)/b). The analysis was performed by an interdisciplinary group with the participation of executives from management, the heads of relevant departments (sustainability, strategy, finance, controlling, communication) and selected subject-matter experts. The identification of relevant risks for Bellevue was performed in accordance with the TCFD recommendations and was based on guidance by regulatory bodies, best practice, peers and professional judgement by the relevant stakeholders within the company. The encompassing analysis also included a qualitative assessment for all relevant climate-related risks of Bellevue with regards to impact, likelihood and the associated time horizons. The results of this assessment are outlined in section Strategy b).

Bellevue has risk identification and assessment processes in place that are performed by risk management at Group level but also at the individual operating unit level on a regular basis. To ensure that the initial assessment of climate-related risks outlined above is institutionalized, we are planning to integrate the encompassing analysis as part of the existing risk- and/or business-specific processes (e.g. annual Risk Assessment).

In addition to this overarching process, the assessment of relevant climate-related risks is further performed as follows (see further details under Metrics & Targets):

- Strategy risks: Our ESG Working Group is assessing the transition risk related to climate-related market developments and our ability to offer sustainable product/investment solutions, and informs our Group Executive Board and the BoD on a regular basis. A quantitative and qualitative metric are in place to ensure that our proportion of AuM linked to carbon-related assets is assessed.
- Climate-related reputation risks are periodically assessed by the Group Executive Board. The Group Executive Board directly manages and supervises those risks, recognizing their significance for Bellevue and the difficulty to quantify them.
- Climate-related compliance risks are overseen by the ARC and managed by Compliance where an active monitoring on existing and emerging laws and regulation related to climate change (e.g. Climate and Innovation Act, EU regulation, regulatory requirements or communications by the FINMA, etc.) is implemented.
- Climate-related market risks are periodically assessed by the Group Executive Board and are measured and monitored as part of the existing risk management processes. A quantitative measure is in place to monitor the Weighted Average Carbon Intensity (WACI) of all funds over time.

Risk management and control

We are convinced that the limitation of climate-related risks is crucial to ensure that the understanding of the level and type of those risks that is accepted in pursuit of our strategy is aligned. Bellevue has processes in place that allow the company to mitigate, transfer, accept and control risks, including climate-related risks:

- Definition and monitoring of risk appetite / limits / tolerances (incl. escalation procedure in case of breach). Limitation of climate-related risks serve as a crucial decision-making tool for the BoD and the Group Executive Board. Our risk appetite and tolerance limit framework is approved by the BoD and integrated in our risk policy. For example, the BoD approved a quantitative tolerance to limit the reduction path for GHG emissions for our defined climate reduction targets to assess Bellevue's progress in the transition towards a net zero economy.
- Climate-related ESG criteria integration in investment processes: When investing, we take special care to select firms, which have limited impact on the environment and that have a clear climate transition plan in place. ESG factors, including climate-related factors, are systematically integrated into the fundamental analysis of every company through an ESG integration process in which the associated financial risks or opportunities are evaluated with respect to future stock market performance. This approach gives our portfolio managers a holistic picture of an enterprise. It includes climate change factors to be considered to measure climate-relevant indicators (e.g. carbon intensity) and plans as well as intentions to reduce carbon emissions at portfolio level. Additionally, while considering principal adverse impact on sustainability criteria (PAI) analysis, if a security exhibits an absolute CO₂-Intensity in the range of «mid» to «very high» (according to MSCI ESG) and if its intensity exceeds the industry average by more than 50%, the security cannot be classified as a sustainable investment which then impacts our sustainable investment quota (most investment products under EU SFDR article 8 require a minimum quota of sustainable investments). Moreover, this can culminate in an ESG engagement. Furthermore, in the frame of our TCFD implementation process, we have identified Low Carbon Investment Portfolios as one key climate-related opportunity, for which we will further elaborate strategic priorities and actions as well as related risk management criteria in the short term (next 1 – 5 years) (see chapter on Strategy).
- Mitigation through ESG stewardship with investees: Our portfolio managers are engaged in an active and constructive dialog with the executives and other relevant stakeholders of portfolio companies on ESG issues. Climate change is amongst our key priorities of engagement in terms of ESG considerations. If there are any indications of a significant controversy related to ESG issues, including climate-related, they are constructively discussed with the company and subsequent developments (e.g. change in strategy or processes, improvement of ESG rating) documented over time.. Engagement activities are undertaken in the context of materiality and proportionality considerations. Written

records of ESG engagement activities are maintained as part of the regular documentation of conversations with company representatives. In 2022 we also established a proprietary tool in which ESG engagement activities are systematically recorded and subsequent developments documented over time. In addition, Furthermore, we seek compliance with the Swiss Stewardship Code and its 9 principles (governance, stewardship policies, voting, engagement, escalation, monitoring of investee entities, delegation of stewardship activities, conflicts of interest, transparency and reporting) in order to effectively manage our climate-related risks.

Risk reporting and disclosure

The relevant climate-related risks are continuously monitored and reported as part of the existing risk governance structures (see also section Governance), notably the following:

- The BoD, assisted by the ARC, is ultimately responsible for the management of climate-related risks as part of Bellevue's risk management framework and sustainability mandate.
- The ARC oversees risk management activities for the company, including those associated with climate, on a regular basis.
- The Group Executive Board is responsible for managing risks and ensures that the risk assessment process is conducted in an encompassing manner. It is also responsible for the enactment of the relevant directives for risk assessment, risk management and risk control and the adequacy of the internal control system. This assessment is driven by a yearly strategic risk review.
- The CFO (at the same time CRO) is responsible for any risk control activities and leads the compliance department.

Reporting provided to any of those bodies covers the specific climate-related risks and includes, if appropriate, respective assessments of these risks (e.g. metrics) and the climate-related risk tolerance.

Bellevue fulfils its responsibilities in relation to ESG and climate reporting via the following channels:

- Monthly factsheets on individual strategies, with information on portfolio positioning and performance as well as summarized ESG and climate data (CO₂-intensity Scope 1 and 2). In 2023, we expanded our reporting by making dedicated sustainability fact sheets available to our investors sharing a quarterly update.
- Our website www.bellevue.ch includes a dedicated page focused on sustainability at both corporate and portfolio level. Advances and news on sustainability matters are posted on a continuous basis, including information regarding the regulatory requirements (EU SFDR/MiFID II sustainability preferences).
- Annual UN PRI Report to provide accountability and transparency regarding our responsible investment activities.
- Annual Report including a dedicated section on ESG, including our TCFD disclosure.

Internal documents: Risk Management Framework, Risk Management and Risk Control Directive

Metrics and Targets

A) DISCLOSE THE METRICS USED BY THE ORGANIZATION TO ASSESS CLIMATE-RELATED RISKS AND OPPORTUNITIES IN LINE WITH ITS STRATEGY AND RISK MANAGEMENT PROCESS

Based on the recommendations by TCFD, and our sustainability and risk strategy, we measure and monitor metrics that allow us to assess the climate-related risks and opportunities identified under section Strategy a). The following metrics are considered relevant for Bellevue to further accelerate the transition of our business model towards a net zero economy:

GHG emissions

- Measure, monitor and manage the absolute carbon emissions based on our carbon footprint for Scope 1, Scope 2 and operational Scope 3 (Scope 3.1–3.14) in accordance with the GHG Protocol.
- Measure, monitor and manage the financed emissions associated with the investment portfolio in accordance with the PCAF Standard, and based on MSCI ESG data.

Short to long term targets have been defined for this metric (see Metrics & Targets c) to assess and monitor our ongoing measures to reduce our carbon footprint as well as our exposure to climate-sensitive sectors. These metrics and associated targets are crucial to monitor our key climate-related opportunities such as Clean Operations and Low Carbon Emissions Portfolio.

Exclusion criteria

- Apply thresholds for the percentage of overall revenues that can be generated from morally or ethically controversial business areas, in particular carbon-intensive such as fracking/oil sands or thermal coal. Exclude companies that exceed the generally accepted annual revenue thresholds in their specific business areas.

The metric and associated targets is important to monitor our key climate-related opportunity on Low Carbon Emissions Portfolio.

ESG integration

- Assess ESG ratings as basis by which climate-related criteria are integrated into asset manager's investment decision process.
- Detailed documentation of investments in «ESG laggards».
- Periodic PAI # 3 (carbon intensity) analysis with quantitative implementation into our sustainable investments quota.
- Bellevue does not apply a «best-in-class» approach for the reasons mentioned below, unless otherwise dictated by a specific investment strategy.

ESG stewardship

- Qualitative description of our ESG Stewardship engagement processes over time by systematically recording and documenting subsequent developments with our established proprietary ESG engagement tool.
- Qualitative assessment of compliance to the 9 principles of the Swiss Stewardship Code (governance, stewardship policies, voting, engagement, escalation, monitoring of investee entities, delegation of stewardship activities, conflicts of interest, transparency and reporting).
- Note: Climate-related voting is currently not in scope for Bellevue.

Transition risk

- Strategy risk: Scanning of sustainable finance journals to get an understanding of the ESG trends, and report on the findings (qualitative metric). Tolerance limit: When a specific

topic is reported more than 5 times from different sources, then report to Management. Control frequency: semi-annually.

- Strategy risk: Assess the proportion of AuM linked to carbon-related assets as share of carbon-intensive AuM (classified as unsustainable) of total AuM. Tolerance limit: A carbon-intensive AuM is considered unsustainable if the absolute intensity of an emitter exceeds 70 t CO₂ / USD 1 mn turnover (i.e. higher than «low» value according to the MSCI ESG methodology), and if this value of the emitter exceeds 50% of the relevant industry average. Control frequency: quarterly. Based on this methodology, a total of 8 emitters (or 0.1% of AuM) whose carbon intensity was classified as unsustainable were identified in the portfolio under management as at the end of 2023.
- Reputation risk: Assess the transition of Bellevue's AuMs, peers and other market participants towards a low-carbon economy by scanning ESG ratings (e.g. S&P) and review Bellevue's transition plan considering peers' commitments and the evolution of market players (e.g. commitments to SBTi or NZAM). Tolerance limit: When a specific climate-related issue (e.g. a specific firm or sub-sector is impacted by a scandal) is reported more than 5 times from different sources, then report to Management. Control frequency: semi-annually.
- Reputation risk: Assess the total exposure to climate-sensitive sectors (in mn USD). Bellevue identifies climate-sensitive assets through industry-identifying attributes. As defined by the TCFD, Bellevue includes the following non-financial sectors addressed by the TCFD: fossil fuel extraction, carbon-based power generation, transportation (air, sea, rail, and auto manufacture), metals production and mining, manufacturing industries, real estate development, chemicals, petrochemicals, and pharmaceuticals, building and construction materials and activities, forestry, agriculture, fishing, food and beverage production, as well as trading companies that may trade any of the above (e.g., oil trading or agricultural commodity trading companies). This metric is agnostic of risk rating, and therefore may include exposures of companies that may be already transitioning or adapting their business models to climate risks. According to the European Union's definition, the NACE («nomenclature statistique des activités économiques dans la Communauté européenne») sectors A - H and L are classified as «high climate impact sectors». As of December 31, 2023, 59.6% of assets under management are allocated to these sectors according to the EU nomenclature.
- ESG (compliance) risk: Assess the future development of climate-related legislation and regulation (Switzerland, EU, US), relevant market developments, and the national and international climate agenda. Tolerance limit: When new regulations or market best practices arise, the Management should be informed and decide on actions to be taken. Control frequency: annually.
- Market risk: Monitor and assess the Weighted Average Carbon Intensity (WACI Scope 1, 2, 3) of all AuM (in t CO₂e / USD 1 mn turnover). Currently no specific tolerance limit defined, but comparison with the index-weighted positions of the MSCI AC World Index. Control frequency: annually. In 2023, the carbon intensity (WACI Scope 1, 2, 3) of our measurable investment strategies (approx. 94% of all AuM) was 528.3 t CO₂e / USD 1 mn turnover, which is 42% below the index-weighted positions of the MSCI AC World Index (905.9 t CO₂e / \$M USD turnover).
- Counterparty (credit) risk: Monitor and assess the likelihood of possible default from counterparties due to climate-related impacts. Tolerance limit: If there are signs, then report to Management. Control frequency: annually.

Internal carbon pricing

Bellevue does not apply an internal carbon price mainly due to the following reasons:

- We are not directly exposed to the EU or Swiss emission trading system (EU ETS).
- We are not subject to a complex organization and/or business model, which requires an elaborated carbon price system.
- The existing metrics outlined above are considered sufficient to incentivise and drive business decisions to facilitate a transition to a net zero economy.

While such a carbon price mechanism is helpful for larger organizations to incentivize the business and mobilise resources by allocating the effective cost of carbon, such an instrument does not add any additional benefit to the existing metrics and targets at Bellevue. The necessity to implement an internal carbon price (e.g. on business travel) is and further will be assessed on a regular basis.

B) DISCLOSE SCOPE 1, SCOPE 2, AND, IF APPROPRIATE, SCOPE 3 GREENHOUSE GAS (GHG) EMISSIONS, AND THE RELATED RISKS

Our measurement and disclosure of the GHG emissions for Scope 1, Scope 2 and operational Scope 3, as well as the financed emissions of our portfolio are included in the Annual Report under the chapter ESG.

C) DESCRIBE THE TARGETS USED BY THE ORGANIZATION TO MANAGE CLIMATE-RELATED RISKS AND OPPORTUNITIES AND PERFORMANCE AGAINST TARGETS

We have established short term, medium term and a long term target to ensure that we uphold our commitment to facilitate the transition to a net zero economy. The targets are aligned with our relevant time horizons on the short- medium- and long-term.

The following targets are in place:

- Short term target for 2026 to reduce the absolute carbon emissions from commuting Scope 3.7) by 40% (basis year 2019).
- Medium term target for 2030 to reduce the absolute carbon emissions from Scope 1, Scope 2 and operational Scope 3 (scope 3.1.–3.14) per employee (FTE) by 30% (basis year 2019).
- Medium term target for 2035 to reduce the absolute carbon emissions from Scope 1, Scope 2 and operational Scope 3 (Scope 3.1.–3.14) by 40% (basis year 2019).
- Net zero target in 2050 that includes Scope 1, Scope 2 and operational Scope 3 (Scope 3.1.–3.14) emissions (basis year 2019), as well as a reduction of the Scope 3.15 emissions (financed emissions) by 90%.

A detailed decarbonization plan with concrete reduction measures will be developed in 2024, based on the transition plan outlined in this TCFD reporting.
